Precautionary Statements

Hazard to Humans & Domestic Animals

Caution
Contact product may result in transient tingling and redness of the skin. Avoid contact with skin or clothing. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, or using tobacco.

Environmental Hazards
This product is extremely toxic to fish and aquatic invertebrates. To protect the environment, do not allow pesticide to enter or runoff into storm drains, drainage ditches, gutters, or surface waters. Applying this product in calm weather when rain is not predicted for the next 24 hours will help to prevent that wind or rain can then blow or wash pesticide off the treatment area. This product is highly toxic to bees exposed to direct treatment or residues on blooming crops or weeds. Do not apply this product or allow it to drift to blooming crops or weeds if bees are visiting the treatment area.

Physical or Chemical Hazards
Do not apply this product in or on electrical equipment due to possibility of shock hazard.

Directions for Use
It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Stop: Read entire label before use.

General Information: Hold container upright. Do not spray up into air. Apply to surfaces only as a spot and crack & crevice treatment. Hold approximately 12 inches from surface to be sprayed. Squeeze trigger to spray until surface is slightly moist but not to the point of runoff. Over-application may cause damage. Test in an inconspicuous area before applying. Do not allow children or pets to contact treated surfaces until spray has dried.

PetSpot® Home Barrier Insect Killer®s long-lasting action keeps on killing American & German Cockroaches and Argentine Ants for up to 18 months on non-porous surfaces and flies up to 150 days after you spray. More frequent applications may be necessary on concrete surfaces.

Check these areas in 4 weeks and retreat if insect activity continues. Contact kill gives you immediate results when spraying insects directly, while residual activity kills when insects enter the home.

PetSpot® Home Barrier Insect Killer® is designed to be used in and around residences and their immediate surroundings such as (but not limited to): apartments, attics, automobiles, basement, bathrooms, boats, cabins, campers, carpets, cat sleeping quarters, clothes storage, condomsimia, dens, doors, driveways, garages, gazebos, homes, kitchens, lanais, living rooms, parlors, patio, pet sleeping areas, play rooms, porches, recreational vehicles, rooms, railings, storage areas, sun rooms, utility rooms and verandas. Do not use in commercial food handling establishments, restaurants or other places where food is commercially processed or prepared.

Indoors
Cockroaches (including Adult and Immature Stages of both Non-Resistant and Organophosphate and Carbamate Resistant Strains), Ants, Roaeder Bugs, Centipedes, Crickets, Derestmites, Fireboats, Flies, Palmetto Bugs, Silverfish, Ticks, and Webbugs: Apply as a spot and crack & crevice treatment to areas where these pests crawl and hide, especially in hidden areas around sinks and storage areas, behind baseboards, around doors and windows, behind and under refrigerators, cabinets, sinks and stoves, the underside of shelves, drawers, bookcases, and similar areas. Cover all food handling surfaces and cover or remove all food and cooking utensils or wash thoroughly after treatment. Exposure food should be covered or removed. Repeat as necessary but not more than once per week.

Carpet Ants: For effective control, locate and treat nests and surrounding areas. Apply around doors and windows and other places where ants enter premises and where they crawl and hide. Spray into infested wood through existing openings.

Ticks and Fleas on Surfaces: Remove pet bedding and destroy or clean thoroughly. Spray pet resting quarters.

Carpenter Ants: Remove pet bedding and destroy or clean thoroughly. Spray pet resting quarters.

Ticks and Fleas on Surfaces:
Carpenter Ants:
Ants:
Cockroaches (including Adult and Immature Stages of both Non-Resistant and Organophosphate and Carbamate Resistant Strains), Ants, Roaeder Bugs, Centipedes, Crickets, Derestmites, Fireboats, Flies, Palmetto Bugs, Silverfish, Ticks, and Webbugs: Apply as a spot and crack & crevice treatment to areas where these pests crawl and hide, especially in hidden areas around sinks and storage areas, behind baseboards, around doors and windows, behind and under refrigerators, cabinets, sinks and stoves, the underside of shelves, drawers, bookcases, and similar areas. Cover all food handling surfaces and cover or remove all food and cooking utensils or wash thoroughly after treatment. Exposure food should be covered or removed. Repeat as necessary but not more than once per week.

Cockroaches (including Adult and Immature Stages of both Non-Resistant and Organophosphate and Carbamate Resistant Strains), Ants, Roaeder Bugs, Centipedes, Crickets, Derestmites, Fireboats, Flies, Palmetto Bugs, Silverfish, Ticks, and Webbugs: Apply as a spot and crack & crevice treatment to areas where these pests crawl and hide, especially in hidden areas around sinks and storage areas, behind baseboards, around doors and windows, behind and under refrigerators, cabinets, sinks and stoves, the underside of shelves, drawers, bookcases, and similar areas. Cover all food handling surfaces and cover or remove all food and cooking utensils or wash thoroughly after treatment. Exposure food should be covered or removed. Repeat as necessary but not more than once per week.

Carpet Ants: For effective control, locate and treat nests and surrounding areas. Apply around doors and windows and other places where ants enter premises and where they crawl and hide. Spray into infested wood through existing openings.

Ticks and Fleas on Surfaces: Remove pet bedding and destroy or clean thoroughly. Spray pet resting quarters.
Arts: Spray freely around ant trails and hills. Spray around nests hidden under steps, brickwork, concrete, etc. Break apart accessible nests and spray freely on and around debris. Repeat as necessary but not more than once per week.

Asian Lady Birds (Lady bugs): Spray areas where bugs crawl or rest, especially around doors, on and around screens, windows, doorframes and areas where insects can enter the home. Remove screens prior to spraying them, allow to dry and then reinstall them.

Lone Star Ticks, Dog Ticks, Crickets and Fleas: Apply thoroughly to infestation in bushes, grass or weeds.

Wasps, Hornets, Yellowjackets and Bees: Spray nests and other surfaces where bees may rest. Aim spray at nest openings. Applications should be made late in the evening when insects are at rest.

Whiteflies, Aphids, Japanese Beetles, Lace Bugs, Leaffiders, Mealybugs, Mites and Spider Mites on house plants. Prior to spraying, remove plants from living and eating areas. Put in an area not likely to come in contact with pets, children or food. Plants can be returned to original location when leaves dry. If plants cannot be moved, cover or remove exposed food and food handling surfaces. Avoid spraying surrounding areas.

Apply spray to upper and lower surfaces of foliage. Avoid wetting blossoms if possible. Repeat applications as necessary but not more than once per week.

For Control of Ornamental Garden Insects: For use on roses, dahlia, asters and other ornamentals to kill Japanese Beetles hit by spray, as well as Whiteflies, Aphids, Armyworms, Lace Bugs, Mealybugs, Exposed Thrips, Pavement Ants, Spiders, Spider and Red Mites, Clover Mites and Leafminers.

For use on plants grown for sale or other commercial use.

When spraying plants, do not operate closer than 18 inches. Use sweeping motion. Be cautious about wetting tender foliage, young plants and new growth. Do not spray plants when temperatures exceed 90°F. Over application may cause damage. DO NOT apply to vegetable plants or other plants used for food. Spray insects directly whenever possible. Repeat treatment as necessary but not more than once per week.

Storage: Store in a cool, dry area away from children and pets and away from heat, sparks and open flame. If freezing occurs, allow product to thaw and shake well before using. Freezing does not adversely affect performance.

CONTAINER DISPOSAL: If empty: Non-refillable container. Do not reuse or refill this container. Place in trash or offer for recycling if available. If partly filled: Call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.
