Reduced preharvest interval (PHI) in Bermudagrass and other perennial warm-season grasses grown for forage or hay production, or in pastures or rangeland

This supplemental label expires April 30, 2020, and must not be used or distributed after this date.

**Active Ingredient**: 
pendimethalin: N-(1-ethylpropyl)-3,4-dimethyl-2,6-dinitrobenzenamine ...................................................... 38.7%

**Other Ingredients**: ...................................................................................................................................... 61.3%

**Total**: ........................................................................................................................................................... 100.0%

*1 gallon contains 3.8 pounds of pendimethalin formulated as an aqueous capsule suspension.

EPA Reg. No. 241-418
CAUTION/PRECAUCION

---

**Directions For Use**

- It is a violation of federal law to use this product in a manner inconsistent with its labeling.
- The supplemental labeling and the entire Prowl® H2O herbicide container label, EPA Reg. No. 241-418, must be in possession of the user at the time of application.
- Read the label affixed to the container for Prowl H2O before applying.
- Use of Prowl H2O according to this labeling is subject to the use precautions and restrictions imposed by the label affixed to the container for Prowl H2O.

---

**Application Instructions**

Prowl H2O may be applied by ground or chemigation, by air, or on dry bulk fertilizer.

**Use Method, Rate, and Timing**

**Established Bermudagrass and other Perennial Warm-season Grasses**

Apply Prowl H2O in fields of Bermudagrass (and other perennial warm-season grasses including Bahiagrass, buffalograss, switchgrass, and others) grown for forage or hay production, and/or grown in pastures or rangeland for livestock grazing.

Apply Prowl H2O only to established (defined as planted in fall or spring which has gone through a first cutting/mowing) Bermudagrass and other perennial warm-season grasses.

Apply Prowl H2O before target weed germination in the dormant season [i.e., when grasses are not actively growing in fall (postharvest), during winter dormancy period, or in early spring before greenup] or in-season between cuttings. DO NOT apply to Bermudagrass and other perennial warm-season grasses after greenup in spring before the first cutting.

---

**Product Information**

Prowl H2O is a selective herbicide for controlling most annual grasses and certain broadleaf weeds as they germinate. Refer to the Prowl H2O container label for a complete list of weeds controlled.
Uniformly apply at a broadcast rate of 1.1 quarts (1.0 lb ai/A) to 4.2 quarts (4.0 lbs ai/A) of Prowl® H2O herbicide per acre in a single application.

Prowl H2O may also be applied as a sequential or split program when the initial application(s) is made in the dormant season and the subsequent application(s) is made in-season between cuttings. **DO NOT** apply more than a maximum cumulative total of 4.2 quarts of Prowl H2O per acre per year.

Apply the higher rate of Prowl H2O when higher weed pressure is anticipated or when a longer duration of residual weed control is desired.

Prowl H2O may be applied in a sequential use program or as a tank mix with other registered herbicides that control emerged weeds.

Prowl H2O may cause temporary injury to Bermudagrass and other perennial warm-season grass stands. Disease, extremely cold weather, drought, extensive frost heaving, salinity, low pH, or high pH may weaken stands and make the crop more susceptible to herbicide injury.

**Chemigation Application**

Prowl H2O may be applied through sprinkler irrigation systems. Follow all directions, special instructions, and restrictions about chemigation in the **Spraying Instructions** section of the Prowl H2O container label.

**Tank Mixes**

Prowl H2O may be tank mixed with other herbicides labeled for use in Bermudagrass and other perennial warm-season grass fields. BASF recommends testing Prowl H2O tank mixes on a small portion of the target crop to determine if damage is likely to occur.

Application of postemergence herbicides may cause crop injury, such as stunting or chlorosis of Bermudagrass and other perennial warm-season grasses. Consult your local BASF dealer for local tank mix options. Always perform a mixing test to check the compatibility of Prowl H2O with all potential tank mix partners and fertilizers. Follow all precautions and restrictions on the labels of all products applied in combination with Prowl H2O. Always follow the most restrictive label.

**Physical incompatibility, reduced weed control, or crop injury may result from mixing Prowl H2O with other pesticides, additives, or fertilizers.**

**Crop-specific Restrictions**

- **DO NOT** apply Prowl H2O if surface water is present in the field.
- **DO NOT** apply more than a maximum cumulative total of 4.2 quarts of Prowl H2O per acre per year.
- There is no preharvest interval for grass forage or hay, or for livestock grazing after application of Prowl H2O.
Conditions of Sale and Warranty

The Directions For Use of this product reflect the opinion of experts based on field use and tests. The directions are believed to be reliable and must be followed carefully. However, it is impossible to eliminate all risks inherently associated with the use of this product. Crop injury, ineffectiveness or other unintended consequences may result because of such factors as weather conditions, presence of other materials, or use of the product in a manner inconsistent with its labeling, all of which are beyond the control of BASF CORPORATION ("BASF") or the Seller. To the extent consistent with applicable law, all such risks shall be assumed by the Buyer.

BASF warrants that this product conforms to the chemical description on the label and is reasonably fit for the purposes referred to in the Directions For Use, subject to the inherent risks, referred to above.

TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, BASF MAKES NO OTHER EXPRESS OR IMPLIED WARRANTY OF FITNESS OR MERCHANTABILITY OR ANY OTHER EXPRESS OR IMPLIED WARRANTY.

TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, BUYER’S EXCLUSIVE REMEDY AND BASF’S EXCLUSIVE LIABILITY, WHETHER IN CONTRACT, TORT, NEGLIGENCE, STRICT LIABILITY, OR OTHERWISE, SHALL BE LIMITED TO REPAYMENT OF THE PURCHASE PRICE OF THE PRODUCT.

TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, BASF AND THE SELLER DISCLAIM ANY LIABILITY FOR CONSEQUENTIAL, EXEMPLARY, SPECIAL OR INDIRECT DAMAGES RESULTING FROM THE USE OR HANDLING OF THIS PRODUCT.

BASF and the Seller offer this product, and the Buyer and User accept it, subject to the foregoing Conditions of Sale and Warranty which may be varied only by agreement in writing signed by a duly authorized representative of BASF.
