Supplemental Labeling

For Control of Terrestrial Weeds found near and up to the Water’s Edge

Not for Sale, Distribution, or Use in New York State
Not For Sale, Distribution, or Use in the San Luis Valley of Colorado

This supplemental label expires on September 30, 2019 and must not be used or distributed after this date.

ATTENTION

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- This labeling must be in the possession of the user at the time of application.
- Read the label affixed to the container for GrazonNext® HL herbicide before applying. Carefully follow all precautionary statements and applicable use directions.
- Use of GrazonNext HL according to this supplemental labeling is subject to all use precautions and limitations imposed by the label affixed to the container for GrazonNext HL.

Directions for Use

For control of annual and perennial broadleaf weeds including invasive and noxious weeds, certain annual grasses, and certain woody plants and vines, that are near and up to the water’s edge.

Environmental Hazards

This product is toxic to aquatic invertebrates and may be toxic to fish. Drift or runoff may adversely affect aquatic invertebrates and nontarget plants. Do not apply directly to water. Take care to minimize the incidental overspray along the shoreline when applying to terrestrial plants at the water’s edge or to water in areas where surface water is present. Do not apply directly to intertidal areas below the mean high water mark, except as permitted on this label. Drift and runoff may be hazardous to aquatic organisms in water adjacent to treated areas. Do not contaminate water when disposing of equipment washwater or rinsate.

Use Information

Control of Terrestrial Weeds that are near and up to the Water’s Edge

GrazonNext HL can be used to treat terrestrial weeds that extend up to the water’s edge. Do not apply directly to water. This product must not be used to treat vegetation standing in the water. When controlling terrestrial weed species near and up to the water’s edge, take precautions to minimize incidental overspray to the adjacent water. Consult local public water control authorities before applying this product near public waters. Permits may be required to treat such areas. Apply the specified rate, listed in the table below, as a coarse low-pressure spray as ground broadcast or spot applications. Do not apply aerially for control of weeds growing at or near the water’s edge. Spray volume should be
sufficient to uniformly cover foliage. Increase the spray volume to ensure thorough and uniform coverage when target vegetation is tall and/or dense. It is also permissible to treat target weeds within dry non-irrigation ditches and seasonally dry transitional areas between upland and lowland sites (such as flood plains, deltas, marshes, prairie potholes or vernal pools), but only at times when those sites are dry and are forecasted or managed by water control systems to remain dry for at least 2 weeks following application.

Application rates in the table below are based on treating an area of 1000 sq ft. An area of 1000 sq ft is about 10.5 by 10.5 yards in size. Mix the amount of GrazonNext HL (fl oz or milliliters) corresponding to the desired broadcast rate in 0.5 to 2.5 gallons of water, depending upon the spray volume required to treat 1000 sq ft. A delivery volume of 0.5 gallons per 1000 sq ft is equivalent to 22 gallons per acre and 2.5 gallons per 1000 sq ft is equivalent to 109 gallons per acre.

<table>
<thead>
<tr>
<th>Amount of GrazonNext HL per 1000 sq ft to Equal Broadcast Rate</th>
</tr>
</thead>
<tbody>
<tr>
<td>Broadcast Rate</td>
</tr>
<tr>
<td>(fl oz/acre)</td>
</tr>
<tr>
<td>19</td>
</tr>
<tr>
<td>24</td>
</tr>
<tr>
<td>34</td>
</tr>
</tbody>
</table>

Note: 1 mL = 1cc and 1 fluid ounce (fl oz) = 29.6 milliliters (mL) = 2 tablespoons = 6 teaspoons

To calculate the amount of GrazonNext HL for areas larger than 1000 sq ft: Multiply the table value (fl oz or milliliters) by the area to be treated in "thousands" of square feet. For example, if the area to be treated is 3500 sq ft, multiply the table value by 3.5 (3500 sq ft divided by 1000 sq ft = 3.5).

Use Rate Restrictions:
Limited to 2 applications per year
Minimum of 30 days between applications
Maximum of 2.1 pints (34 fluid oz)( 0.87 lbs ae)/acre per broadcast application.
Do not apply more than 2.1 pints (34 fluid oz) per acre per year.

Spot treatments may be applied at an equivalent broadcast rate of up to 4.2 pints (68 fluid oz) of GrazonNext HL (1.75 lbs acid equivalent) per acre per annual growing season; however, not more than 50% of an acre may be treated at that rate.
