PRODUCT INFORMATION

Neutral Seed Protectant is a systemic seed dressing designed to protect seedlings from a broad spectrum of foliar and stem diseases. Neutral Seed Protectant provides consistent and reliable disease control for seed and soil transmitted diseases. Neutral Seed Protectant is ideal for corn, soybean and other high-value crops. Neutral Seed Protectant is applied to the seed before planters or hoppers are filled. Neutral Seed Protectant contains active ingredients Metalaxyl, Ipconazole, and Thiophanate-Methyl.

A-FUNGICIDES AND INSECTICIDES SEED TREATMENT PRODUCT PROVIDING SYSTEMIC SEED AND SEEDLING PROTECTION AGAINST LISTED EARLY SEEDLING DISEASES AND INSECTS OF SOYBEANS.

Neutral Seed Protectant is a systemic seed dressing designed to protect seedlings from a broad spectrum of foliar and stem diseases. Neutral Seed Protectant provides consistent and reliable disease control for seed and soil transmitted diseases. Neutral Seed Protectant is ideal for corn, soybean and other high-value crops.
