Fairway Formula
GREENVIEW®
Spring Fertilizer
with Crabgrass Preventer

Prevents crabgrass for up to 120 days

Extended time release feeding of nitrogen greens into summer without excess growth

Covers 5,000 sq. ft.
26-0-5
Net Weight 17 lbs. (7.7 kg.)
ACTIVE INGREDIENT:
Dithiopyr .......................................................... 0.13%
OTHER INGREDIENTS: .............................................. 99.97%
TOTAL ................................................................. 100.00%

CAS. No. 97868-45-8
EPA Reg. No. 961-392

KEEP OUT OF REACH OF CHILDREN

CAUTION

See back panel for First Aid and additional Precautionary Statements
READ THE ENTIRE LABEL BEFORE USING THIS PRODUCT.
USE ONLY ACCORDING TO LABEL INSTRUCTIONS.
If terms are not acceptable, return the unopened container at once.

In this State of New York, do not exceed 4.4 lbs. product per 1000 sq. ft. (0.25 lb. active ingredient per acre) per year. Do not apply more than once per year to the same area.
PRECAUTIONARY STATEMENTS
Hazards to Humans and Domestic Animals
CAUTION: Causes eye irritation. Harmful if inhaled. Avoid contact with eyes or clothing. Avoid breathing dust. Wash thoroughly with soap and water after handling. Remove contaminated clothing and wash before reuse. Prolonged or frequently repeated skin contact while handling this material may cause allergic reaction in some individuals.

First Aid

If in eyes:
- Hold eye open and rinse slowly and gently with water for 15-20 minutes.
- Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.
- Call a poison control center or doctor for treatment advice.

If inhaled:
- Move person to fresh air.
- If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth if possible.
- Call a poison control center or doctor for further treatment advice.

Environmental Hazards:
This product is toxic to fish and highly toxic to other aquatic organisms including oysters and shrimp. Use with care when applying to turf areas adjacent to any body of water. Drift and runoff from treated turf may adversely affect aquatic organisms in adjacent aquatic sites. Do not apply when weather conditions favor drift from treated areas. To protect the environment, do not allow pesticide to enter or run off into storm drains, drainage ditches, gutters or surface waters. Applying this product in calm weather will help to ensure that wind does not blow pesticide off the treatment area. Sweeping any product that lands on a driveway, sidewalk, or street, back onto the treated area of the lawn will help to prevent run off to water bodies or drainage systems.

PRODUCT INFORMATION FOR TURF USE

Directions for Use
It is a violation of Federal law to use this product in any manner inconsistent with its labeling.

This product contains DIMONTM, a herbicide that can be applied up to 4 weeks later than other crabgrass preventer and still provides season-long control. Greenview Fairway Formula Spring Fertilizer with Crabgrass Preventer prevents crabgrass and other grass and broadleaf weeds up to 4 months, when applied prior to their germination in lawns and ornamental turfgrasses. It also provides postemergence control of seedling crabgrass for up to 4 weeks after it germinates.

Greenview Fairway Formula Spring Fertilizer with Crabgrass Preventer should be applied to lawns and ornamental turfgrasses that are well established (See "Precautions and Restrictions" section below for a list of the tolerant turfgrasses). It will not harm nearby established ornamentals when used according to directions, given below.

Precautions and Restrictions
NOT FOR USE ON TURF BEING GROWN FOR SALE OR OTHER COMMERCIAL USE AS SOD, OR FOR COMMERCIAL SEED PRODUCTION, OR FOR RESEARCH PURPOSES.

NOT FOR USE ON NEWLY SEEDED LAWNS.

Use of Greenview Fairway Formula Spring Fertilizer with Crabgrass Preventer on lawns and ornamental turfgrasses that are not well established, or have been weakened by stress due to mechanical operations, pests, excessive temperatures, or lack of moisture may increase the chances for turfgrass injury. Do not apply to lawns or turfgrasses that are under stress.

Reseeding, overseeding, or sprigging of turfgrasses into areas that have been previously treated with this product should be delayed until after 3 weeks from the time of application. Reseeding, overseeding, or sprigging before 8 weeks or earlier after application may injure or prevent the establishment of the newly reseeded, overseeded or sprigged turfgrasses.

Do not plant a crop on the treated turf for food or feed and do not allow animals to access the treated area before the turf has been established.

Do not allow application of this product on turf that is to be used as food or feed crops within 14 days of application.

DO NOT apply more than 8.6 lbs. of this product per 1000 sq. ft. per application, and no more than 26.4 lbs. of this product per 1000 sq. ft. per year.

In the State of New York, do not exceed 1.1 lbs. of this product per 1000 sq. ft. (0.25 lb. active ingredient per acre) per year.

DO NOT use clippings from treated turf for mulching, vegetables, vines, or fruit trees from which feed or food products may be harvested.

Keep people and pets off treated areas until dust has settled.

Weeds Controlled and/or Suppressed
Grass Weeds - Annual Bluegrass, Annual Ryegrass, Barnyardgrass, Crabgrass, Crowfootgrass, Goosegrass, Green Foxtail, Kikuyugrass (sheathing), Perennial Ryegrass, Smutgrass (sheathing), Yellow Foxtail.

APPLICATION DIRECTIONS

Greenview Fairway Formula Spring Fertilizer with Crabgrass Preventer can be applied to the following turfgrasses when used as directed:

Cool-Season Turfgrasses - Creeping Bentgrass, Fine Fescues, Kentucky Bluegrass, Perennial Ryegrass, Tall Fescues.
Warm-Season Turfgrasses - Bahiagrass, Bermudagrass, Buffaloagrass, Carpetgrass, Centipedeagrass, St. Augustinegrass, Zoysiaagrass.

Application Timing
Greenview Fairway Formula Spring Fertilizer with Crabgrass Preventer should be applied in the spring or in the fall prior to weed seed germination for control of weeds in established lawns and ornamental turfgrasses. When this product is applied in the fall, a sequential or second application must be made the following spring to provide season-long control of weeds. If this product is applied in the fall, DO NOT reseed, overseed or spring turfgrasses before 12 weeks after application due to potential turfgrass injury to the newly reseeded, overseeded or sprigged turfgrasses.

When establishing a new lawn of Kentucky Bluegrass, Perennial Ryegrass and/or Tall Fescue, this product may be applied 2 weeks after the first sign of grass germination. For other turfgrass, wait until the grass is well established (2 mowings) before applying this product. Do not apply this product within an 8 week period prior to seeding, reseeding, overseeding or sprinkling.

Improved weed control may occur when this product is applied within a few days after mowing and further mowing is delayed until the turfgrass has been watered or received rainfall to dissolve the fertilizer granules.

Note: Supplemental applications of lawn fertilizer are needed to achieve a minimum 1 pound nitrogen per 1000 sq. ft.

Length of Control
Greenview Fairway Formula Spring Fertilizer with Crabgrass Preventer will provide up to 4 months of weed control if applied according to label directions. The actual length of control will vary depending on use rate, weather conditions, condition of the turfgrass, and intensity of weed pressure.

Post Emergence Crabgrass Control
For post emergent crabgrass control, apply Greenview Fairway Formula Spring Fertilizer with Crabgrass Preventer when crabgrass is small (3-4 leaf). It will not control large tillered crabgrass.

Product Use Rate Table
(Lbs. Per 1,000 Sq. Ft.)

<table>

Application Equipment and Instructions
Greenview Fairway Formula Spring Fertilizer with Crabgrass Preventer can be applied with a drop or rotary type spreader designed to apply granular fertilizers. For best results, apply this product evenly and uniformly over the turfgrass area, avoiding streaking, skips or overlaps. Avoid the use of spreaders that would apply this product in narrow rows or concentrated bands. Before each application, calibrate the spreader according to the equipment manufacturer's directions. Adjust the spreader settings so the spreader delivers the appropriate application rate as specified above.

A more uniform application can be made by spreading one-half of the specified amount of this product over the turfgrass area and then applying the remaining one-half at a right angle to the previous direction. Check spreader frequently to insure it is functioning properly and distributing the granules uniformly.
**SPREADER SETTINGS**

**Drop Spreader Settings**
- Apply in a single pass at a rate of 3.4 lbs. per 1,000 sq. ft. Start on the outside border and apply in a rectangular path working back and forth across the length of the lawn. Overlap the coverage slightly, and shut off spreader before making hard turns.

To calibrate your spreader: 1 lb. of material should cover approximately 294 sq. ft.

If your spreader model is not listed, go to our website www.greenviewfertilizer.com, or call toll-free 800-233-1067, 8 A.M. – 5 P.M. EDT, Monday - Friday, for additional model settings.

**Broadcast Spreader Settings**
- Apply in a single pass at a rate of 3.4 lbs. per 1,000 sq. ft. Start on the outside border and apply in a circular path working toward the center. Overlap the coverage slightly, and shut off spreader before making hard turns.
