IN CASE OF EMERGENCY:

See back panel for Precautionary and Emergency Handling Information.

EMERGENCY HANDLING:

In case of contamination or decomposition – Do not handle, pour or clean up. For disposal or cleaning of equipment. FOR DISPOSAL OF A CONTAMINATED OR DECOMPOSING PRODUCT SEE “EMERGENCY HANDLING”.

PHYSICAL and CHEMICAL HAZARDS:

• Do not use this product in a container or dispensing device that has been reused for any purpose.
• Use only clean dry equipment to dispense this product.
• Keep all foreign matter, including other water treatment products, away from this product. Add only into water.
• Can react with other materials, including other water treatment products, to produce heat and toxic gases and spatter. Do not add water to this product. Add only into water.
• If product is exposed to small amounts of water, it can react violently to produce heat and toxic gases and spatter. Do not add water to this product. Add only into water.
• Do not get in eyes, on skin or on clothing. Do not handle with bare hands.
• Open in a well-ventilated area. Avoid breathing dust and fumes.
• Do not use this product in a container or dispensing device that has been reused for any purpose.
• Use only clean dry equipment to dispense this product.
• Keep all foreign matter, including other water treatment products, away from this product. Add only into water.
• Can react with other materials, including other water treatment products, to produce heat and toxic gases and spatter. Do not add water to this product. Add only into water.
• If product is exposed to small amounts of water, it can react violently to produce heat and toxic gases and spatter. Do not add water to this product. Add only into water.
• Do not get in eyes, on skin or on clothing. Do not handle with bare hands.
• Open in a well-ventilated area. Avoid breathing dust and fumes.

DIRECTIONS FOR USE:

For best results, see “WATER USE” directions on this package. Allow 30 minutes for product to disperse. Test free available chlorine residual with a pool test kit. Repeat treatment as needed.

ROUTINE CHLORINATION:

Add 3-5 ounces per 10,000 gallons every other day or as often as needed to maintain the free available chlorine residual at 1.5 to 3 ppm. Use a test kit or test strip, or other testing method. Test for chlorine residual twice weekly.

OPENING YOUR POOL:

Add 5-7 ounces of this product per 10,000 gallons of pool water daily or as often as needed to maintain the free available chlorine residual above 1 ppm. Use a test kit or test strip, or other testing method. Test for chlorine residual twice weekly.

FOR UNSTABILIZED POOLS:

Add 5-7 ounces of this product per 10,000 gallons of pool water daily or as often as needed to maintain the free available chlorine residual above 1 ppm. Use a test kit or test strip, or other testing method. Test for chlorine residual twice weekly.

IN CASE OF EMERGENCY:

NOTE TO PHYSICIAN:

Have the product container or label if possible. Call a poison control center if person is not breathing, call 911 or if person is unconscious. Do not give anything by mouth to an unconscious person. Call a poison control center or doctor immediately for treatment advice. If person is not breathing, call 911 or if person is unconscious. Do not give anything by mouth to an unconscious person. Call a poison control center or doctor immediately for treatment advice.

IF INHALED:

Do not use an atomizer or similar aerosol spray, as it may increase the risk of aspiration. Remove to fresh air. Call a physician if symptoms continue.

IF SWALLOWED:

15-20 minutes. Call a poison control center immediately with plenty of water for flush mouth and never give anything by mouth to an unconscious person. Call a physician if symptoms continue.

IF ON SKIN OR CLOTHING:

Remove contaminated clothing and wash skin with soap and water. Rinse clothing before reuse.

IF IN EYES:

Hold eye open and rinse immediately with plenty of water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a physician if symptoms continue.

FIRST AID:

WASH THOROUGHLY WITH SOAP AND WATER AFTER HANDLING AND BEFORE EATING, DRINKING, CHewing GUM, USING TOBACCO OR GOING TO RESTROOM.

BEFORE TREATMENT:

WHEN ADDING POWER BLAST II:

Power Blast II is formulated for use in pools stabilized with stabilizer and conditioner. Before adding, test pH and alkalinity. Maintain pH above 7.2. A pH below 7.2 may cause intense fire, explosion, and the release of toxic gases. If the alkalinity is below 60 ppm, use a thiol treatment to increase alkalinity. Use only clean dry equipment to dispense this product. Use only clean dry equipment to dispense this product. Follow label directions for each product.

Power Blast II is a powerful liquid oxidizing chlorine product that is formulated to provide intense shock treatment for a variety of pool conditions. It is effective in destroying organic pollutants, algae, and bacteria, and is designed to be used in most pool environments. Power Blast II is ideal for use with power chlorinators, such as those manufactured by Applied Biochemists. This product is safe for use in pools containing fiberglass, metal, vinyl, or concrete.
**DIRECTIONS FOR USE:**

**ROUTINE CHLORINATION:**

- For best results, see the WATER BALANCE section on "How to Use." Follow label directions for each product.
- For pools stabilized using STABILIZER AND CONDITIONER: Use 5 to 10 ppm available chlorine.
- For pools containingRAZOR BITER® or other water treatment products: Use 5 to 10 ppm available chlorine.

**OPENING YOUR POOL:**

- For pools stabilized using STABILIZER AND CONDITIONER: Use 40 to 60 ppm available chlorine.
- For pools containingRAZOR BITER® or other water treatment products: Use 30 to 50 ppm available chlorine.

**HOW TO USE:**

- For pools stabilized using STABILIZER AND CONDITIONER:
  - Do not add to the same pool water day after day. Do not add more than once a day. Follow "SHOCK TREATMENT/SUPERCHLORINATION" directions on this label. Add this product as close as possible to any algae on the sides or bottom of the pool. If necessary, repeat the treatment. To prevent algae growth, maintain the free available chlorine level at 5 to 10 ppm. Maintain pH in the range of 7.2 to 7.6. Maintain total alkalinity in the range of 60 to 120 ppm. Maintain calcium hardness above 200 ppm. Use a test kit or test strip, or other testing method to check available chlorine and other parameters.

**NEW POOL:**

- For pools stabilized using STABILIZER AND CONDITIONER: Use 40 to 60 ppm available chlorine.
- For pools containingRAZOR BITER® or other water treatment products: Use 30 to 50 ppm available chlorine.

**SHOCK TREATMENT/SUPERCHLORINATION:**

- Use 70 to 80 ppm available chlorine. Follow label directions for each product.
- For pools stabilized using STABILIZER AND CONDITIONER: Add 70 to 80 ppm available chlorine. Follow "SHOCK TREATMENT/SUPERCHLORINATION" directions on this label. Add this product as close as possible to any algae on the sides or bottom of the pool. If necessary, repeat the treatment. To prevent algae growth, maintain the free available chlorine level at 5 to 10 ppm. Maintain pH in the range of 7.2 to 7.6. Maintain total alkalinity in the range of 60 to 120 ppm. Maintain calcium hardness above 200 ppm. Use a test kit or test strip, or other testing method to check available chlorine and other parameters.

**ALGAE CONTROL:**

- Use 70 to 80 ppm available chlorine. Follow label directions for each product.
- For pools stabilized using STABILIZER AND CONDITIONER: Add 70 to 80 ppm available chlorine. Follow "SHOCK TREATMENT/SUPERCHLORINATION" directions on this label. Add this product as close as possible to any algae on the sides or bottom of the pool. If necessary, repeat the treatment. To prevent algae growth, maintain the free available chlorine level at 5 to 10 ppm. Maintain pH in the range of 7.2 to 7.6. Maintain total alkalinity in the range of 60 to 120 ppm. Maintain calcium hardness above 200 ppm. Use a test kit or test strip, or other testing method to check available chlorine and other parameters.

**STORAGE:**

- This product is poisonous. Do not allow children to touch or eat this product. Keep this product dry in its tightly closed container when not in use. Store in a cool, dry, well-ventilated area. Do not store in a cold environment. Do not store near heat, flame or burning material (like a lighted cigarette). Do not allow this product to contact any foreign matter, including other water treatment products, or water. Keep this product from keying, freezing, or any other adverse condition.

**FIRST AID:**

- FOR INHALED:
  - Move person to fresh air.
  - IF SWALLOWED:
    - Do not give anything by mouth to an unconscious person.
    - IF IN EYES:
      - Hold eye open and rinse slowly and gently with water for 15-20 minutes.
      - IF ON SKIN OR CLOTHING:
        - Take off contaminated clothing.
        - Rinse skin with water for 15-20 minutes.
        - IF IN EYES:
          - Hold eye open and rinse slowly and gently with water for 15-20 minutes.
        - IF INHALED:
          - Move person to fresh air.
        - IF SWALLOWED:
          - Do not give anything by mouth to an unconscious person.
          - Call a poison control center or doctor for treatment advice.
          - IF ON SKIN OR CLOTHING:
            - Take off contaminated clothing.
            - Rinse skin with water for 15-20 minutes.
            - IF IN EYES:
              - Hold eye open and rinse slowly and gently with water for 15-20 minutes.
      - Call a poison control center immediately for treatment advice.

**EMERGENCY HANDLING:**

- In case of contamination or decomposition – Do not allow this product to contact any foreign matter, including other water treatment products, or water. Keep this product from keying, freezing, or any other adverse condition.
