**SURFACE SPRAY APPLICATION METHODS:**

When spraying wood, metal, or other surfaces, use non-thermal mechanical or compressed air equipment that is adjusted to deliver a fine mist. Close doors and windows to minimize drift. For initial clean up of severe insect infestation, dilute at a rate of 1 part Pyranha Stock Guard® Concentrate or 1 part Pyra-Tex® Concentrate and 39 parts water (3.2 ounces per gallon). This makes a 0.05% permethrin ready-to-use product. For the remainder of applications, concentrate of Pyranha Stock Guard® Concentrate or Pyra-Tex® Concentrate and 39 parts water (3.2 ounces per gallon) is more efficient. Use non-thermal mechanical or compressed air equipment that is adjusted to deliver a fine mist. Close doors and windows to minimize drift. The spraying may be done in weather conditions not favorable for drift. The insecticide may be applied to non-food areas such as garages, barns and kennels. No insecticide drift is expected when the wind velocity is less than 1.5 mile/h. For entire applications, concentrate of Pyranha Stock Guard® Concentrate or Pyra-Tex® Concentrate and 39 parts water (3.2 ounces per gallon) is more efficient. Use non-thermal mechanical or compressed air equipment that is adjusted to deliver a fine mist. Close doors and windows to minimize drift. The spraying may be done in weather conditions not favorable for drift. The insecticide may be applied to non-food areas such as garages, barns and kennels. No insecticide drift is expected when the wind velocity is less than 1.5 mile/h. The spraying may be done in weather conditions not favorable for drift. The insecticide may be applied to non-food areas such as garages, barns and kennels. No insecticide drift is expected when the wind velocity is less than 1.5 mile/h. The spraying may be done in weather conditions not favorable for drift. The insecticide may be applied to non-food areas such as garages, barns and kennels. PRECAUTIONARY STATEMENTS

Handlers

Caution: The product is harmful when inhaled, ingested, absorbed through the skin or by contact with the eyes. Proper PPE (personal protective equipment) must be used at all times. PPE includes impermeable gloves, boots, protective clothing, and a tight-fitting face mask (e.g., N95 respirator).* Do not use on plants being grown for sale or other commercial use. This product should not be used in or around food or feedstuffs. Use only on hard, non-porous surfaces. For commercial use, the product must be used according to the label instructions and appropriate recommendations. *Other handlers, (including during mixing/loading, repair and cleaning of equipment and disposal of pesticide) must wear the following:

- Footwear plus socks, chemical-resistant headgear, if overhead exposure, and a half-face, full-face or hood style
- Sleeved shirt and long pants, chemical-resistant gloves made of any waterproof material, chemical-resistant
- Wash hands with soap and water after handling and before eating, drinking, chewing gum, using tobacco, or using

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

Caution: Causes moderate eye irritation. Harmful if swallowed. Avoid contact with eyes, skin or clothing.

NOTES TO PESTICIDE APPLICATIONER

- Do not apply near water, or to areas where surface water is present or to intertidal areas below the mean water mark. Do not contaminate water when disposing
- Do not apply when weather conditions favor drift from treated areas. Drift and run-off from treated areas may be

Additional Precautions

- Keep and wash PPE separately from other laundry. If not used, wash Wood Guard with detergent and hot water. Keep and wash PPE separately from other laundry. For residual infestations, continue to apply up to 4 treatments (1 every 1-2 weeks) at the same concentration.

When using indoors:

- Treat all exposed food and cooking utensils and cover all food-processing surfaces or wash thoroughly after
- Insect pests that may enter premises. Treat
- Ant trails, nests and points of entry. Spray bookcases for
- Apply to the inside of doors, kitchen cabinets, walls, and joints. After airing, infested items may be treated lightly,
- Do not spray in areas of extreme moisture, e.g., bathrooms, garages, or basements. If a sprinkler system is used, it should be turned off before spraying.
- Apply in tight crevices and other difficult-to-treat areas. Make sure to thoroughly cover the area with a fine mist.
- Keep nozzle at least 3 feet from fabric to avoid staining.
- Do not apply near water, or to areas where surface water is present or to intertidal areas below the mean water mark. Do not contaminate water when disposing
- Do not apply when weather conditions favor drift from treated areas. Drift and run-off from treated areas may be

When using outdoors:

- Do not apply near water, or to areas where surface water is present or to intertidal areas below the mean water mark. Do not contaminate water when disposing
- Do not apply when weather conditions favor drift from treated areas. Drift and run-off from treated areas may be
