SeaKlear Yellow Klear Algaecide

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in waters containing aquatic life. All dosages are for 10,000 gallons of water. Adjust accordingly. Prior to using this product, ensure water is properly balanced (pH between 7.6 and 8.6, total alkalinity between 120 and 180 ppm).

BREAKOUT TREATMENT TO REMOVE VISIBLE ALGAE ACCUMULATIONS:
1. Brush areas affected with algae accumulations.
2. Apply 4 oz (1 capful) of this product per 10,000 gallons close to the affected areas. For severe accumulations, add 8 oz per 10,000 gallons.
3. To activate, add one of the following: 1 lb dry chlorine compounds (sodium hypochlorite 70%), 2 lb 10% liquid hypochlorite (55%), 1 gallon sodium hypochlorite (liquid chlorine compounds) 10-12%, 2 gallons sodium hypochlorite (liquid chlorine compounds) 5.25%, or 1 lb potassium monopersulfate per 10,000 gallons of water.

Use a suitable test kit to test for residual chlorine. Ensure that the chlorine residual is 1 ppm or lower before re-entering the pool.

For use to control and prevent algae growth and to maintain clear water in swimming pools.

Active Ingredient:
Sodium Bicarbonate: 99%
Inert Ingredients: 1%
Total: 100%

KEEPS OUT OF REACH OF CHILDREN

WARNING
See first aid statement and additional precautions on back panel.
