KEEP OUT OF REACH OF CHILDREN

NET WT. 250 lbs.  (113.4 Kg)

EMERGENCY ASSISTANCE: Have the product container and label with you when calling a poison control center, doctor, or going for treatment. For additional information on this pesticide product (including health concerns, medical emergencies or pesticide incidents), you may call 1-800-222-1222, 24 hours per day, 7 days per week.

FEEDING AND MANAGEMENT INSTRUCTIONS:

When used as directed, Vitalix #12 Clarifly Tubs will provide sufficient Diflubenzuron to prevent the development of fly larvae in manure of treated horses. This product prevents the emergence of house and stable flies from the manure of treated horses. Existing adult flies will not be affected. Start feeding this product early in the spring before flies begin to appear and continue feeding throughout the summer and into the fall until cold weather restricts fly activity. Allow free choice to horses. Horses should consume an average of 2.4 ounces of this product per 100 lbs. of animal body weight per day, which is equivalent to 24 ounces per day for a 1,000 pound horse.

1. Assure horses are not starved for nutrients prior to feeding this product.
2. This product contains added copper. Do not feed to sheep and other species that have a low tolerance to supplemental copper.
3. Do not use in association with feeds containing supplemental selenium.
4. Remove all other self-limiting nutritional supplements.
5. Locate this product where horses congregate (watering, loafing, shade areas).
6. Replenish this product on a regular basis as needed.
7. If intake of this product is below 2.4 ounces per 100 pounds animal body weight per day for horses, increase the number of feeding locations and/or change location(s) to areas more frequented by horses.
8. If intake of this product is above 2.4 ounces per 100 pounds animal body weight per day for horses, reduce the number of feeding locations and/or change location(s) to areas less frequented by horses.

Introduction of this product after adult fly infestation is established may require treatment of horses with supplemental sprays to reduce the adult fly population coming from outside sources.

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal.

STORAGE: Store in a cool, dry place.

PESTICIDE DISPOSAL: Wastes resulting from the use of this product may be disposed of on-site at an approved waste disposal facility.

CONTAINER HANDLING: Nonrefillable container. Do not reuse or refill this container. Offer for recycling if available, or puncture and dispose of in a sanitary landfill or by other procedures approved by state and local authorities.

ACTIVE INGREDIENT

Diflubenzuron (CAS #35367-38-5) ........................................................................................................... 0.01%

OTHER INGREDIENTS: ..................................................................................................................................99.99%

CONTAINS 0.01% DIFLBENZURON PER POUND

GUARANTEED ANALYSIS
