DIRECTIONS FOR USE (cont'd)

OUTDOOR USE

- Apply to exterior surfaces of the house.
- Spray a band 1 to 4 feet wide around and alongside the foundation and perimeter of the house.
- Tilt nozzle, if necessary, to adjust to foundation and perimeter of the house. Also moisten 1 to 2 feet up along the side of the dwelling.
- For more serious problems, a broad band of treatment, up to 15 feet, may be necessary.
- Spray with the wind to avoid drift of the spray onto skin or clothing.
- Treat where desirable building materials meet, where brick meets wood trim or where siding meets window or door area, where cracks are visible or around and into any openings. Where water enters the house. Spray around doors and windows frames, at base of walls, and at eaves.
- Treat vegetation around soil piles and storage sheds. Spray on tree trunks and fruit trees.
- For walls, houses, yellow jackets: Application of nests should be made late in the evening when insects are active.
- To avoid control of the bees indoors and other outdoor home recreation areas, thoroughly drench the entire house area. Spray provides control activity and residual in the active area. Use a sprayer and apply promptly to avoid disturbing the bees. Make for best results apply in cool weather 60 to 80°F, or in early morning or late evening hours. Treat once a month as necessary.

WOOD-INFESTING PESTS

- For control of termites and wood-infesting beetles found above ground, apply to woods and holes in damaged wood and in spaces between wooden structures and between the sill plates and foundation where wood is exposed.
- Apply over exposed wood, and white or grayish, mottled or orangish-brown areas of the wood. Then, if necessary, repeat application to affected areas.
- For control of termite and wood-infesting beetles, apply a coarse spray to the surface of the item on which the pests are present.
