KEEP OUT OF REACH OF CHILDREN

DANGER / PELIGRO
Si usted no entiende la etiqueta, busque a alguien para que se la explique a usted en detalle. (If you do not understand the label, find someone to explain it to you in detail.)

ENVIRONMENTAL HAZARDS
This chemical is toxic to fish. Do not apply directly to water or areas where surface water is present or to intertidal areas below the mean high water mark. Drift and runoff from treated areas may be hazardous to aquatic organisms in neighboring areas. Do not contaminate water when cleaning equipment or disposing of equipment washwaters or rinsate.

DIRECTIONS FOR USE
It is a violation of federal law to use this product in a manner inconsistent with its labeling. Follow all applicable directions, restrictions, and precautions on this Section 24c label and the main EPA-registered label. This 24(c) SLN label and the main EPA-registered label for this product must be in the possession of the user at the time of pesticide application. Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your State or Tribe, consult the agency responsible for pesticide regulation.

AGRICULTURAL USE REQUIREMENTS
Use this product only in accordance with its labeling and with the Worker Protection Standard (WPS), 40 CFR Part 170. This standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, greenhouses and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification and emergency assistance. It also contains specific instructions and exceptions pertaining to the statements on this label about personal protective equipment (PPE), restricted entry interval (REI) and notification to workers. The requirements in this box only apply to uses of this product that are covered by the WPS.

Do not enter or allow worker entry into treated areas during the REI. The REI for each crop is listed in the directions for use associated with each crop.

PPE required for early entry to treated areas that is permitted under the WPS and that involves contact with anything that has been treated, such as plants, soil or water is: Coveralls, chemical-resistant gloves made of any waterproof material, shoes plus socks and protective eyewear.

Eye-Protection: To mitigate eye irritation concerns from post application exposures, the Agency is requiring that, for at least seven days following the application of captan:
1. At least one container designed specifically for flushing eyes must be available in operating condition at the WPS-required decontamination site for workers entering the area treated with captan, and
2. Workers must be informed orally, in a manner they can understand:
   • that residues in the treated area may be highly irritating to their eyes,
   • that they should take precautions, such as refraining from rubbing their eyes, to keep the residues out of their eyes,
   • that if they do get residues in their eyes, they should immediately flush their eyes with the eyeflush container that is located at the decontamination site, and
   • how to operate the eyeflush container.

Double Notification: Notify workers of the application by warning them orally and by posting warning signs at entrances to treated areas.
GENERAL USE PRECAUTIONS
Captan is not a stand-alone product for control of the entire complex of rot organisms. Use Captan in combination with other fungicides registered for use on Easter Lily bulbs. For additional information on products that Captan should be combined with, contact Oregon State University Extension or the Easter Lily Research Foundation.

CROP USE: Directions for Aid in Controlling Root Rot in Easter Lily Bulbs
The Restricted Entry Interval (REI) for Ornamentals for commercial or research use is 48 hours.
To aid in the control of root rot in Easter Lily bulbs, mix 1 gallon of this product with enough water to make a 100 gallons dip solution.
Soak bulbs for a minimum of 15 minutes before planting.
Apply the remaining post-application mixture or “left-over” solution in-furrow over the bulbs or over the top of the planting beds. When disposing of the post-application mixture, do not exceed the rate of 100 gallons of solution per acre or the maximum per acre of any other product in the tank-mix.
