DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

How to Use - Outdoors

• Apply at the onset of termite activity or for infestations of up to 3 months.
• Apply in a band 10 to 15 ft. wide around the perimeter of the building. Apply the product to the wood and the ground. Apply the product to the ground around the building to a height of 2 ft. This product can be applied where it is safe and will not damage the building, but not the foundation. The volume of the product is limited to that which can be applied to the trees and shrubs as well as to areas where the product can be applied.
• The volume of the product should be applied to the exposed wood members where pests are active and may find entrance.

How to Use - Indoors

• Apply early in the season or when insects appear.
• Apply in a band 5 to 10 ft. wide around the perimeter of the building. Apply the product to the wood and the ground. Apply the product to the ground around the building to a height of 2 to 3 feet where pests are active and may find entrance. Thoroughly and uniformly wet the band area.
• Concentrate treatment at visible termite trails as well as cracks or crevices where pests may enter the structure.
• The surface to be treated should be dry at the time of application.

• Apply as a perimeter treatment or as a spot treatment.
• Apply to any trails, around doors and windows and other places where pests may be found.
• For the control of termites such as in a foundation, apply the product to the wood and around the doors and windows. Apply the product to a height of 3 feet from the ground. The product can be applied to the ground around the building to a height of 2 feet.
• For termites - For localized infestations only. Apply in a band around the base of the building and along the perimeter of the building where pests may enter the structure.
• For carpenter ants - Apply around the perimeter of the building and along the perimeter of the building where pests may enter the structure.
• For ants and termites - Apply in a band around the perimeter of the building and along the perimeter of the building where pests may enter the structure.

Wood Damaging Insects

Carpenter Ants

• Kills damaging listed insects fast and prevents new infestations for up to 3 months.
• Protects your home, deck and other wood structures from listed wood-destroying insects.
• Non-staining, no odor formula.
• For the control of termites such as in a foundation, apply the product to the wood and around the doors and windows. Apply the product to a height of 3 feet from the ground. The product can be applied to the ground around the building to a height of 2 feet.
• For termites - For localized infestations only. Apply in a band around the base of the building and along the perimeter of the building where pests may enter the structure.
• For carpenter ants - Apply around the perimeter of the building and along the perimeter of the building where pests may enter the structure.
• For ants and termites - Apply in a band around the perimeter of the building and along the perimeter of the building where pests may enter the structure.

Before Use:

• Cover all exposed food and cooking utensils.
• Cover all food handling surfaces or wash thoroughly after treatment.

How to Use - Outdoors

• Apply early in the season or when insects appear.
• Apply in a band 5 to 10 ft. wide around the perimeter of the building. Also treat the building foundation to a height of 2 to 3 feet where pests are active and may find entrance. Thoroughly and uniformly wet the band area.
• Concentrate treatment at visible ant trails as well as cracks or crevices where ants may enter the structure.
• The surface to be treated should be dry at the time of application.
• Apply as a perimeter treatment as described above.
• For best results, locate and treat ant nests.
• Do NOT treat firewood.
• Apply to any trails, around doors and windows and other places where ants may be found.
• Use as a spot treatment – Spray insects directly or spray lightly around doors, windows and other places where insects may be found or enter premises.
• Spray localized areas where insects hide, such as baseboards, cracks and crevices, pantry areas, closets, around water pipes, behind and under refrigerators, cabinets, sinks, furnaces, and stoves, the underside of shelves, drawers, carports, garages, and storage sheds.

How to Use - Indoors

• Apply early in the season or when insects appear.
• Apply in a band 5 to 10 ft. wide around the perimeter of the building. Also treat the building foundation to a height of 2 to 3 feet where pests are active and may find entrance. Thoroughly and uniformly wet the band area.
• Concentrate treatment at visible ant trails as well as cracks or crevices where ants may enter the structure.
• The surface to be treated should be dry at the time of application.
• Apply as a perimeter treatment as described above.
• For best results, locate and treat ant nests.
• Do NOT treat firewood.

FIRST AID

If swallowed
• Call a poison control center or doctor immediately for treatment advice.
• Have the person sip a glass of water if able to swallow.
• Do not induce vomiting unless told to do so by the poison control center or doctor.
• Do not give anything by mouth to an unconscious person.

If in eyes
• Hold eye open and rinse slowly and gently with water for 15-20 minutes.
• Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.

To protect the environment, do not allow pesticide to enter or run off into storm drains, drainage ditches, gutters or surface waters. Applying this product in calm weather when rain is not predicted for the next 24 hours will help to ensure that wind or rain does not blow or wash pesticide off the treatment area. Rinsing equipment used in or near the treated area will help to prevent run-off to water bodies or drainage systems. Care should be taken to avoid spraying water onto non-target areas that may become a source of contamination. Be aware of your surroundings to avoid spraying trees, shrubs, and plants. Applying this product on trees or shrubs may cause injury to people and pets, damage to plants, and affect the environment.

NOTE TO PHYSICIAN
Skin contact (vapor or powder) may be followed by transient tingling or numbness, usually of the face, but this subsides without treatment. This product is a pyrethroid. If large amounts have been ingested, the stomach and intestines should be evacuated. Treatment is symptomatic and supportive.

PRECAUTIONARY STATEMENTS

ENVIRONMENTAL HAZARDS
This pesticide is extremely toxic to fish, aquatic invertebrates, wildlife and humans. To protect the environment, do not allow pesticide to enter or run off into creeks, streams, ditches, gutters or surface waters. Applying this product in calm weather when rain is not predicted for the next 24 hours will help to ensure that wind or rain does not blow or wash pesticide off the treatment area. Rinsing equipment used in or near the treated area will help to prevent run-off to water bodies or drainage systems. Care should be taken to avoid spraying water onto non-target areas that may become a source of contamination. Be aware of your surroundings to avoid spraying trees, shrubs, and plants. Applying this product on trees or shrubs may cause injury to people and pets, damage to plants, and affect the environment.

This pesticide is highly toxic to bees exposed to direct treatment or residues on blooming crops or weeds. Do not apply this product to or allow drift to blooming crops or weeds when bees are foraging in the treated area.
DIRECTIONS FOR USE

IMPORTANT – Directions for Storage and Disposal

Storage

Store in a cool, dry place. Keep out of reach of children. Returned material not in original container shall be returned to spray manufacturer.

IMPORTANT – Directions for Storage and Disposal

Storage

Do not store product in a way that will touch adults, children, or pets, other directly or through drift.

Do not allow adults, children, or pets to enter the treated area until it is safe to do so. After use, wash and remove any contact with the treated area.

Do not put this product into any drain during or after application. Do not allow this product to enter any drain during or after application.

Do not use this product from any storm drains, sanitary sewers, or any other waterway where drainage to sewers, storm drains, water bodies, or aquatic habitat can occur. Do not use this product in a way that will contact adults, children, or pets, other directly or through drift.

Do not make applications during rain.

Do not store this product in any container other than the original container.

Do not use in aircrafts.

Do not use on food processing equipment.

Do not use in food handling establishments in which food is held, processed, prepared, and/or served.

Do not water the treated area to the point of run-off.

Do not apply directly to watercourses.

Do not make applications using a blower sprayer.

Do not apply directly to watercourses.

Do not apply this product to any area like a gutter where drainage to sewers, streams, brooks, bodies of water, or aquatic habitat can occur.

Do not use this product in a way that will contact adults, children, or pets, other directly or through drift.

Do not apply this product to any area like a gutter where drainage to sewers, streams, brooks, bodies of water, or aquatic habitat can occur.
