Supplemental Labeling

Dow AgroSciences 9330 Zionsville Road Indianapolis, IN 46268-1054 USA

Trellis® SC
EPA Reg. No. 62719-659

For Weed Control in Bearing and Non-Bearing Bushberries (Subgroup 13-07B)
(Not for Sale, Use or Distribution in New York State)

This supplemental label expires on February 6, 2021 and must not be used or distributed after this date.

ATTENTION
• It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
• This labeling must be in the possession of the user at the time of application.
• Read the label affixed to the container for Trellis® SC herbicide before applying. Carefully follow all precautionary statements and applicable use directions.
• Use of Trellis® SC according to this supplemental labeling is subject to all use precautions and limitations imposed by the label affixed to the container for Trellis® SC.

Directions for Use

CAUTION

Bushberry (subgroup 13-07B) including Aronia berry; blueberry, highbush; blueberry, lowbush; buffalo currant; Chilean guava; cranberry, highbush; currant, black; currant, red; elderberry; European barberry; gooseberry; honeysuckle, edible; huckleberry; jostaberry; Juneberry (Saskatoon berry); lingonberry; native currant; salal; sea buckthorn; cultivars, varieties, and/or hybrids of these.

Refer to product label for General Use Precautions, Mixing and Application Instructions.

Use Trellis SC as a preemergence treatment for control of certain broadleaf weeds in bearing and non-bearing bushberries. Apply Trellis SC prior to germination of target weeds.

**Highbush blueberry:** Optimum weed control performance will be obtained when a banded application to the ground on each side of the rows at a minimum of 10 GPA is followed by overhead irrigation or rainfall within 21 days. A single rainfall or sprinkler irrigation of 0.5 inch or more is required to activate this product.

• Do not apply Trellis SC more than twice per crop year (harvest to harvest) up to a maximum total of 1.00 lb ai/acre (31 fl oz/acre) of Trellis SC per acre per crop year.
• Do not apply Trellis SC within 60 days of bushberry harvest.

**Lowbush blueberry:** Optimum weed control performance will be obtained when a broadcast or banded application (minimum 10 GPA) at dormancy (prior to bud break) to the treated area is followed by
overhead irrigation or rainfall within 21 days. A single rainfall or sprinkler irrigation of 0.5 inch or more is required to activate this product.

- Do not apply Trellis SC more than twice per crop year (harvest to harvest) up to a maximum total of 1.00 lb ai/acre (31 fl oz/acre) of Trellis SC per acre per crop year.
