Supplemental Labeling

For Weed Control in Bearing Apple
(Not for Sale, Use or Distribution in New York State)

This supplemental label expires on February 6, 2021 and must not be used or distributed after this date.

ATTENTION

• It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
• This labeling must be in the possession of the user at the time of application.
• Read the label affixed to the container for Trellis® SC herbicide before applying. Carefully follow all precautionary statements and applicable use directions.
• Use of Trellis® SC according to this supplemental labeling is subject to all use precautions and limitations imposed by the label affixed to the container for Trellis® SC.

Directions for Use on Bearing Apple

CAUTION

Refer to product label for Use Precautions, Mixing and Application Instructions.

Use Trellis SC as a preemergence treatment for control of certain broadleaf weeds in bearing apple. Apply Trellis SC prior to germination of target weeds.

Optimum weed control performance will be obtained when a banded, directed application to the orchard floor on each side of the tree rows at a minimum of 10 GPA is followed by overhead irrigation or rainfall within 21 days. A single rainfall or sprinkler irrigation of 0.5 inch or more is required to activate this product.

• Do not apply Trellis SC more than twice per crop year (harvest to harvest) up to a maximum total of 1.00 lb ai/acre (31 fl oz/ac) per crop year.
• Do not apply Trellis SC within 30 days of harvest.
