The Smart Solution
To Control Ants & Crawling Insects

BugProof Multi Pest Killer kills ants & crawling insects* on contact when used as directed. Confidently protect your home and your family from listed ants, crawling insects and spiders. Use everywhere in the house including kitchen and bathrooms. Use outdoors on hard surfaces such as driveways, patios, and along your home’s foundation.

Made using cold-pressed neem oil, Terramera’s patent-pending technology unleashes the power of neem oil to create a zone of protection.

STOP - Read the Label Before Use. Shake well prior to use.

DIRECTIONS FOR USE

Shake well prior to use. Spray listed pests directly, and treat surfaces until moist. Use one ounce of product per 3~6 sq.ft. of surface area depending on the pest or material treated. Re-apply as needed when listed pests reappear.

General Precaution
• Make small inconspicuous spot treatments to test all surfaces and fabrics for colorfastness, discoloration or damage before use.
• Do not apply directly to electrical or metal equipment or to other potential destruction hazards.
• Do not spray to the point of unnecessary dripping or excess runoff to avoid potential material damage.
• Allow treated areas to dry completely before use.
• Do not make outdoor applications during rain or if rain is expected within 4 hours.

To Kill Cockroaches: Spray directly over and around cockroaches at the rate of one ounce per 1.5~6 sq.ft. to immobilize them. A direct spray or surface treatment will help to ensure that wind or rain does not blow or wash pesticide off the treatment area.

To Kill Spiders (Except Black Widow Spiders): Spray directly over and around spiders for continuous exposure at the rate of one ounce per 1~3 sq.ft. to immobilize them. A direct spray or treated surface will help to ensure that wind or rain does not blow or wash pesticide off the treatment area.

To Kill Moisture, Pavement and Field Ants: Spray pests directly if they are visible at the rate of one ounce per 3~6 sq.ft. Do not apply around electrical equipment due to the possibility of shock hazard. Continuous exposure at the rate of one ounce per 1.5 sq.ft. to immobilize them. A direct spray or treated surface will help to ensure that wind or rain does not blow or wash pesticide off the treatment area.

To Kill Crickets, Firebrats, Silverfish, Millipedes, Centipedes, Sow Bugs, Aphids, Bottle Flies: Spray pests directly if they are visible at the rate of one ounce per 1~6 sq.ft. to immobilize them. A direct spray or treated surface will help to ensure that wind or rain does not blow or wash pesticide off the treatment area.
