EVERYTHING MUST REMAIN over the infested area at a rate of 4 to 6 oz per 1,000 square feet. Do not “water-in” the Turf Application:

For Outdoor Use Around Patios, Driveways, Sidewalks and Foundations Only:

Process plants . Before resuming operations. Do not store Lava-Lor™ Granular Bait in or around such locations and number of bait stations. Do not apply bait to any surface where food is stored areas and other areas where insects have been observed. Maintain strict account of location and number of bait stations. Do not apply bait to any surface where food is present or to intertidal areas below the mean high water mark. To protect the environment, do not allow pesticide to enter or run off into storm drains, drainage ditches, patterns or surface waters.

For use in and around the following areas: Homes, Apartment Buildings, Stores, Restaurants, Warehouses, Government Offices, Public Buildings and Institutions, and Research Facilities. Apply bait only in locations inaccessible to children and pets, such as in cracks and crevices, or in tamper-resistant bait stations. Do not apply to animals. Do not treat portions of buildings where animals can feed: on walls, floors, or in cracks, crevices, voids or in bait station up to 4 to 6 oz of bait per 1,000 sq. ft. For other surfaces inaccessible to children and pets, apply bait lightly to floors near bat populations, in cracks, under sinks, refrigerators and other appliances, vending machines, plumbing, wall voids, pipe chases, electrical conduits, around drains, chimneys, around and inside garbage cans and in other areas where food or baits or their signs are found. Use approximately 4 to 6 oz per crack, crevice, void, or surface water is present or to intertidal areas below the mean high water mark. To protect the environment, do not allow pesticide to enter or run off into storm drains, drainage ditches, patterns or surface waters.

This pesticide is highly toxic to birds, fish, and aquatic invertebrates. Do not apply directly to water, to areas where surface water is present or to intertidal areas below the mean high water mark. To protect the environment, do not allow pesticide to enter or run off into storm drains, drainage ditches, patterns or surface waters.

EVERYTHING MUST REMAIN bait, and make bait applications late in the day. Mole crickets come up to the surface to bait. For best results with mole crickets, irrigate the treatment area prior to applying.

Turf Application:
Use a shaker container or mechanical spreader to apply bait evenly.

For Outdoor Use Around Patios, Driveways, Sidewalks and Foundations Only:
Apply rate of 1 oz per 100 square feet. Apply bait around manhole covers and on ledges inside sewers at a feed after dusk.

Keep out of reach of children.

CAUTION
Keep out of reach of children. Apply only in locations accessible to children and pets, such as in cracks and crevices, or in tight resistant bait stations. Do not apply to animals. Do not treat portions of buildings where animals can feed on bait. Apply up to 0.5 oz per crack, crevice, void, or bait station up to 4 x 4 x 4 of bait per 1,000 sq ft. For other surfaces inaccessible to children and pets, apply bait tightly to floors, near bathtubs, in cribs, under sinks, refrigerators and other appliances, vending machines, drapery holes, wall voids, pipe chases, electrical conduits, around drains, chimneys, wells, around and inside garbage cans and in other areas where listed insects or their signs are found. Use approximately 4 lb of bait in a 1,000 sq ft vacuum 5 to 6 weeks after application.

Caution:
This product is highly toxic to birds. Pesticides may kill wildlife. Do not allow pesticide to enter or run off into storm drains, drainage ditches, ditches, patterns or surface waters.

Directions for Use:
Call a poison control center or doctor for treatment advice. Wash hands with soap and water promptly after use.

OUTLINE YOUR FONTS
Some Notes to the Designer:
1. Bold all text 1/8" from Cut Marks (like critical graphic elements).
2. Blend full coverage background graphics 1/8" beyond Cut Marks.
3. For use in the following areas: Restaurants (food areas), Poultry Packing, Red Meat Packing and Food Processing Plants, including Plants that are Federally Inspected, as well as Food Processing Areas of Stores, Warehouses, Government Offices, Public Buildings and Institutions.
4. If DP is not full coverage graphics, blend 1/64” to 3/32” into OP.
5. This Template is provided in 2 layers. Simply turn off the text layer to use the layout only as a placed image in your document.

Lava-Lor Granular Bait

1.0 oz

1.0 lb

A0768-37

EPA Reg. No . 89459-94

Precautionary Statements
HAZARDS TO HUMANS AND DOMESTIC ANIMALS: CAUTION. Causes moderate eye irritation. Avoid contact with eyes or clothing. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco, or using the toilet.

FIRST AID
If in eyes: Hold eye open and rinse slowly and gently. Call a poison control center or doctor for treatment advice. If on skin or clothing: Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco, or using the toilet.

EVERYTHING MUST REMAIN WITHIN GREEN TEXT LIMIT

bait. For best results with mole crickets, irrigate the treatment area prior to applying over the infested area at a rate of 4 to 6 oz per 1,000 square feet. Do not “water-in” the Turf Application:
at the rate of 4 to 6 oz per 1,000 sq ft of infested area, taking care to treat any cracks or bait evenly in a band 2 to 3 feet wide around foundations, patios, driveways or sidewalks before resuming operations. Do not store Lava-Lor™ Granular Bait in or around such Sewer Application:
Apply bait around manhole covers and on ledges inside sewers at a have ceased for the day. Remove all bait stations from the edible products areas of location and number of bait stations. Do not apply bait to any surface where food is entry points, support structures, walkways, garbage chutes/bins, refuse containers in Offices, Public Buildings and Institutions. Only apply bait in cracks, crevices and other inaccessible areas, or in tamper-resistant bait stations. Do not apply to animals. Do not treat portions of buildings where animals can feed on bait. Apply up to 0.5 oz per crack, crevice, void, or bait station up to 4 to 6 oz of bait per 1,000 sq ft. For other surfaces inaccessible to children and pets, apply bait lightly to floors near bathtubs, in cracks, under sinks, refrigerators and other appliances, vending machines, door sills, wall voids, pipe chases, electrical conduits, around drains, chimneys, wells, and inside garbage cans and in other areas where pets or pests are found. Use approximately 4 lb of bait over a 30-foot path in attics, basements, or crawlspaces. Replace bait as it is consumed.

For use in the following areas: Restaurants (food areas), Poultry Packing, Red Meat Packing and Food Processing Plants, including Plants that are Federally Inspected, as well as Food Processing Areas of Stoves, Warehouses, Government Offices, Public Buildings and Institutions. Only apply bait in cracks, crevices and other inaccessible areas, or in tamper-resistant bait stations, or in paper, pasteboard or other material that will permit removal. Locate these bait stations on window sills, on floors near walls, beams, around doors and other entry points, support structures, walkways, garbage chutes/bins, refuse containers in storage areas and other areas where insects have been observed. Maintain strict accurate location and number of bait stations. Do not apply bait to any surface where food is present, prepared, or served. Do not apply bait in edible product areas until operations have ceased for the day. Remove all bait stations from the edible products areas before resuming operations. Do not store Lava-Lor™ Granular Bait in or around such processing plants.

For Outdoor Use Around Patios, Driveways, Sidewalks and Foundations Only: Apply bait evenly in a band 2 to 3 feet wide around foundations, patios, driveways or sidewalks at the rate of 4 to 6 oz per 1,000 sq ft of infested area, taking care to treat any cracks or crevices. Also treat beneath concrete drain spillways.

Turf Application: Use a shaker container or mechanical spreader to apply bait evenly from the treated area at a rate of 4 to 6 oz per 1,000 square feet. Do not “water-in” the bait. For best results with mole crickets, irrigate the treatment area prior to applying bait and make bait applications prior to the day. Make crickets come up to the surface to feed after dusk.

Sewer Application: Apply bait around manhole covers and on ledges inside sewers at a rate of 1 oz per 100 square feet. LIGHTLY SO THAT BAIT IS BARELY VISIBLE. BAITS MAY BE BROADCAST IN UNFINISHED ATTICS, BASEMENTS OR CRAWLSPACES. REPLACE BAIT AS IT IS CONSUMED.
