ORGANOCIDE® BEE SAFE 3-in-1 GARDEN SPRAY QUART CONCENTRATE

Read entire label before use. Use only in accordance with label instructions.

Directions for Use (not recommended for indoor use): SHAKE WELL FIRST. Dilute 3 oz. of Organocide® Bee Safe 3-in-1 Garden Spray per gallon of water and shake well to blend. Once blended, shake often while in use to prevent separation. Diluted solution can be used up to 30 days. Use a sprayer that will put out a fine spray. Spray leaves and stems of plants, making sure tops and bottoms are covered, until run-off. If spraying on severely stressed or damaged plants, consider using a lower rate such as 1 oz. per gallon to avoid adding additional stress. For best results, spray during the coolest time of the day (early morning or late evening) and allow 3-4 hours for product to dry. Do not apply when temperatures exceed 95°F. A single application is normally enough for preventative control. For normal maintenance, spray once per month or as needed to spot treat areas. For severe problems, make two applications 3-4 days apart. Reapply in 7 days if problem persists.

Garden Insects: Organocide® Bee Safe 3-in-1 Garden Spray kills the eggs, larvae, nymphs, and the adult stages of over 25 soft bodied insects including (but not limited to) Aphids, Hemlock Wooly Adelgid, Leafrollers, Mealy Bugs, Thrips, White-Flies, and Fungus Gnats.

Spider Mites: Including, (but not limited to) European Red Mite, Spruce Mite, Maple Mite, Southern Red Mite, Two Spotted Mite, Six Spotted Mite, Texas Citrus Mite and Rust Mite.

Scale Insects: Including (but not limited to) Sago Palm Scale, Magnolia Scale, Oleander Scale, San Jose Scale, Hemlock Wooly Adelgid and Euonymus Scale.

Diseases: Organocide® Bee Safe 3-in-1 Garden Spray controls certain fungal diseases such as (but not limited to) Powdery Mildew, Downy Mildew, Black Spot on Roses, Helminthosporium and Greasy Spot on Citrus.

Plant Compatibility: When used as directed, Organocide® Bee Safe 3-in-1 Garden Spray has an unusually high degree of safety to most plants. However, some plants in the Euphorbia family (Crown of Thorns, Poinsettia) have shown some sensitivity. If in doubt, test first on a small area of foliage to determine plant safety.
