**Active Ingredient:**
Bromethalin (CAS No: 63333-35-7) 0.01%

**Other Ingredients**
99.99%

**Total:**
100.00%

**EPA REG. NO.** 61282-75-56 • **EPA EST. NO.** 56-OH-1

**Net Contents:** 128 X 0.5 oz. Blocks

**Active Indoor and Outdoor Control of Norway Rats, Roof Rats, Cotton Rats*, Polynesian Rats*, House Mice, Eastern Harvest Mice*, Golden Mice*, and Meadow Voles.*

**Kills Norway Rats, Roof Rats, Cotton Rats*, Polynesian Rats*, House Mice, Eastern Harvest Mice*, Golden Mice*, and Meadow Voles.**

This product may only be used inside and within 100 feet of man-made structures or inside of transport vehicles (ships, trains, or aircraft).

*Not permitted for use against the following species in California: Cotton rat, Eastern harvest mouse, Golden mouse, Polynesian rat, Meadow vole.

**FNB75004FTGH**

**KEEP OUT OF REACH OF CHILDREN
CAUTION
SEE SIDE/BACK PANEL FOR ADDITIONAL PRECAUTIONARY STATEMENTS**

**Effective Indoor and Outdoor Control of Norway Rats, Roof Rats, Cotton Rats*, Polynesian Rats*, House Mice, Eastern Harvest Mice*, Golden Mice*, and Meadow Voles.**

**Kills Norway Rats, Roof Rats, Cotton Rats*, Polynesian Rats*, House Mice, Eastern Harvest Mice*, Golden Mice*, and Meadow Voles.**

This product is effective against anticoagulant-resistant Norway Rats, Roof Rats, and House Mice.

**TREATMENT FOR PET POISONING**
If animal eats bait, call veterinarian or 1-800-498-5743 at once.

**NOTE TO PHYSICIAN OR VETERINARIAN**
Contains the nerve poison Bromethalin. This is not an anticoagulant type rodenticide. For humans or animals ingesting bait and/or showing poisoning signs (such as muscle tremors, loss of hind limb use, or seizures for animals), limit absorption by either emesis or gastric lavage. Sublethal symptoms, if present, would be the result of cerebral edema and should be treated accordingly through administration of an osmotic diuretic and corticosteroid.

For 24-hour emergency information on this product, call 1-800-498-5743 (US & Canada) or 1-651-523-0318 (all other areas).

**Precautionary Statements**

**Hazard to Humans and Domestic Animals**

**Caution:** Harmful if swallowed or absorbed through the skin. Causes moderate eye irritation. Keep away from children, domestic animals, and pets. Do not get in eyes, on skin, or on clothing. All handlers (including applicators) must wear long-sleeved shirt and barrier laminate gloves. Any person who retrieves carcasses or unused bait following application of this product must wear barrier laminate gloves.

**User Safety Requirements**
Follow manufacturer’s instructions for cleaning/maintaining PPE. If no such instructions for washables exist, use detergent and hot water. Keep and wash PPE separately from other laundry. Remove PPE immediately after handling this product. Wash the outside of barrier laminate gloves before removing them. As soon as possible, wash hands thoroughly after applying the bait and before eating, drinking, chewing gum, using tobacco or using the toilet and change into clean clothing.

**First Aid**

**If on skin or clothing:**
• Take off contaminated clothing. Wash skin immediately with plenty of water for 15-20 minutes.
• Call a poison control center, or doctor, or 1-800-498-5743 immediately for treatment advice.

**If in eyes:**
• Hold eye open and rinse slowly and gently with water for 15-20 minutes.
• Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.
• Call a poison control center, or doctor, or 1-800-498-5743 immediately for treatment advice.

Have product container or label with you when calling a poison control center or doctor for treatment advice.

ENVIRONMENTAL HAZARDS

This product is extremely toxic to mammals and birds. Dogs and scavenging mammals and birds might be poisoned if they feed upon animals that have eaten this bait. Do not apply directly to water, to or around wells, to water sources where surface water is present or to intertidal areas below the mean high water mark. Runoff may also be hazardous to aquatic organisms in water adjacent to treated areas. Do not contaminate water when disposing of equipment wash water or rainwater.

DIRECTIONS FOR USE

IT IS A VIOLATION OF FEDERAL LAW TO USE THIS PRODUCT IN A MANNER INCONSISTENT WITH ITS LABELING.

READ THIS LABEL: Read this entire label and follow all use directions and use precautions. Use only for the sites, pests, and application methods described on this label.

IMPORTANT: Do not expose children, pets or other non-target animals to rodenticides. To help prevent accidents:

1. Store product not in use in a location out of reach of children and pets.
2. Apply bait in locations out of reach of children, pets, domestic animals and non-target wildlife, or in tamper-resistant bait stations. These stations must be resistant to destruction by dogs and by children under six years of age, and must be used in a manner that prevents such children from reaching into bait compartments and obtaining bait. If it can be taken from stations when they are filled, units must be secured or otherwise immobilized. Even stronger barrier laminate gloves, collection and proper disposal of all dead rodents and leftover bait. To discourage reinfestation, limit access to food, water, and harborage as much as possible. If reinfestation does occur, repeat treatment. Where a continuous source of infestation is present, establish permanent bait stations and replenish them as needed.

*Not permitted for use against the following species in California: Cotton rat, Eastern harvest mouse, Golden mouse, Polynesian rat, Meadow vole

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

Pesticide Storage: Store in original container in a cool, dry place inaccessible to children and pets. Keep containers closed and away from other chemicals.

Pesticide Disposal: Dispose of wastes resulting from the use of this product in trash or at an approved waste disposal facility. Container Handling: Nonrefillable container. Do not reuse or refill this container. Triple rinse (or equivalent) then offer for recycling or reconditioning; or puncture and dispose of container in a sanitary landfill; or by incineration.

LIMITED WARRANTY

To the extent permitted by applicable law, J.T. EATON & CO., INC. makes no warranty concerning uses which extend beyond the use and application conditions described in the use directions and precautions on the label. To the extent permitted by applicable law, J.T. EATON & CO., INC. shall not be liable for (1) any consequential, incidental or special damages related in any way to this product or its uses, or (2) any damages related in any way to resistance to pesticides.

For non-emergency (e.g., current product information), Call: 1-800-321-3421

DIRECTIONS FOR USE (CONTINUED)

APPLICATION DIRECTIVES:

The active ingredient in this product is different from the anticoagulant rodenticides. Norway rats, roof rats and house mice cease feeding after consuming a toxic dose.

Rats: Apply 2 to 12 blocks. Space placements at intervals of 15 to 30 feet in infested areas. Maintain an uninterrupted supply of fresh bait for at least 15 days or until there no longer are signs of new feeding by rats.

Mice and Meadow Voles*: Apply 1 to 2 blocks at each placement location. Space placements at 5- to 12-foot intervals. Larger placements (up to 2 ounces) may be needed at points of very high mouse activity. Maintain an uninterrupted supply of fresh bait for at least 15 days or until there no longer are signs of new feeding by house mice or meadow voles.

FOLLOW-UP: Adjust the amount of bait applied to the level of feeding expected at each bait placement location. Highest bait consumption is expected to occur on the first day or two after treatment. After several days, inspect bait placements and replenish bait at sites where there is heavy feeding or where there is continuous evidence of rat, mouse or meadow vole activity. Maintain baiting for at least one week or until there are no longer fresh signs of rat, mouse or meadow vole activity or it becomes clear that the remaining rats, mice or meadow voles are not attracted to the bait. Wearing barrier laminate gloves, collect and properly dispose of all dead rodents and leftover bait. To discourage reinfestation, limit access to food, water, and harborage as much as possible. If reinfestation does occur, repeat treatment. Where a continuous source of infestation is present, establish permanent bait stations and replenish them as needed.

*Not permitted for use against the following species in California: Cotton rat, Eastern harvest mouse, Golden mouse, Polynesian rat, Meadow vole

SELECTION OF TREATMENT AREAS: Determine areas where rats, mice or meadow voles will most likely find and consume the bait. Generally, these areas are along walls, by gnawed openings, in corners and concealed places, between floors and walls, or in locations where signs of these rodents have been seen. Protect bait from rain or snow. Remove as much alternative food as possible.
