**PROPER USE OF EQUIPMENT**

Spray equipment that prevents the movement of spray away from the target.

**DIRECTIONS FOR USE:**

- For broadcast application: For broadcast application to control weeds, apply 15 to 30 gallons of this product per acre. Thorough coverage is important. For the treatment of all the weeds, apply 20 to 30 gallons per acre.

**TYPICAL WEEDS CONTROLLED**

- Cinquefoil (silvery)
- Common groundsel
- Hairy nightshade
- velvetleaf
- Foxtail
- Mustard
- Redroot pigweed
- Rumex phoenicolasius
- Sandbur
- Spotted knapweed
- Spotted sowthistle
- Tarweed
- Wild mustard
- Woolly thistle

**APPLICATION GUIDELINES:**

- When applying this product, follow the grower’s recommended site for maximum control of weeds.
- When applying this product in a broadcast application utilize a hooded sprayer, shielded or other equipment (PPE) and restricted entry interval (REI). The requirements in this box only apply to uses of this product that are NOT within the scope of the Worker Protection Standard (WPS) which the residues degrade promptly in the soil. Foliar contact results in rapid desiccation and control of annual weeds. This product is effective in controlling established perennial weeds, retreatment may be necessary. Vinagreen may be applied up to two days before harvest.
- For terrestrial use only. Do not apply directly to water. Do not apply to water adjacent to the treated area. For aquatic use, apply this product only to high flow areas.
- Keep unprotected persons out of the treated areas until spray has dried.
- Do not apply this product near fish-bearing streams or other aquatic vegetation.
- Always apply this product to the soil. Do not apply this product on bare ground.
- Do not contaminate water, food, or feed by storage and disposal.
- The requirements in this box apply to uses of this product that are NOT within the scope of the Worker Protection Standard (WPS) which the residues degrade promptly in the soil.
