Hydrogen peroxide. 6.14%  

ACTIVE INGREDIENTS:  
MANUFACTURED BY: CONSEAL INTERNATIONAL, INC.  

*for use on Non-porous Hard Surfaces  
• Detergent Cleaner • Deodorizer  
• Sporicide* Sterilant  

ADDITIONAL PRECAUTIONARY STATEMENTS  
SEE SIDE PANEL FOR FIRST AID AND NET CONTENTS: 1 Gallon / 3.78 L  
• Sporicide Sterilant  

DANGER  
It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Contact your local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office at the EPA.  
This pesticide is toxic to birds, fish, and aquatic invertebrates. Do not discharge effluent containing this product into waterways.  

HAZARDS TO HUMAN AND DOMESTIC ANIMALS  
This pesticide is toxic to birds, fish, and aquatic invertebrates. Do not discharge effluent containing this product into waterways.  

FIRST AID  
IF IN EYES  
Hold open eyelids and flush with plenty of water for 15 to 20 minutes. Remove contact lenses, if present, after the first 5 minutes, and then continue rinsing. Call a poison control center or doctor for treatment advice.  

IF SWALLOWED  
Call poison control center or doctor immediately after treatment for advice. Have person sip a glass of water if able to swallow. Do not induce vomiting by mouth.  

IF ON SKIN OR CLOTHING  
Take off contaminated clothing. Rinse skin immediately with plenty of water for 15 to 20 minutes. Call a poison control center or doctor for treatment advice.  

NOTE TO PHYSICIAN: Probable mucosal damage may contraindicate the use of gastric lavage.  

PHYSICAL AND CHEMICAL HAZARDS  
Strong Oxidizing Agent. Corrosive. Never mix or use this product in combination with other sanitizers, cleaners or disinfectants.  

ENVIRONMENTAL HAZARDS  

STORAGE AND DISPOSAL  

PESTICIDE STORAGE:  
Store original container in a cool, dry place out of reach of children. Keep container closed at all times when not in use. Keep container out of direct sunlight.  

PROCEDURE FOR LEAKS OR SPILLS:  
Stop if spill is done without spillage. Use appropriate containment and personal and respiratory protection equipment. Disinfect affected area with the active ingredient of SteriCide in solution. Do not mix or use this product in combination with other sanitizers, cleaners or disinfectants.  

CONTAINER DISPOSAL:  
Drum/container wastes are acutely hazardous. Improper disposal of excess pesticide mixture, or rinsate is in violation of Federal Law. If material has been spilled, an acceptable method of disposal is to dilute with at least 20 volumes of water followed by discharge into a suitable treatment system in accordance with all local, state, and Federal environmental laws, rules, regulations, standards, and other requirements.  

Net Contents: 1 Gallon / 3.78 L
**PRECAUTIONARY STATEMENTS**

**HAZARDS TO HUMAN AND DOMESTIC ANIMALS**

**DANGER, CORROSIVE.** Causes irreversible eye damage. Harmful if swallowed. Avoid contact with skin or on clothing. Do not get in eyes or on clothing. Wear protective eyewear (goggles, face shield, or safety glasses). Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco. Remove and wash contaminated clothing before reuse.

**FIRST AID**

**IF IN EYES**
Hold eye open and rinse slowly and gently with water for 15-30 minutes. Remove contact lenses, if present, after the first 5 minutes, and then continue rinsing. Call a poison control center or doctor for treatment advice.

**IF SWALLOWED**
Call a poison control center or doctor immediately after treatment for advice. Have a person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor. Do not give anything by mouth to an unconscious person.

**IF ON SKIN OR CLOTHING**
Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-30 minutes. Call a poison control center or doctor for treatment advice.

Have the product container with you when calling a poison control center or going for treatment. You May also contact 1-800-222-1222 for emergency medical treatment information.

**NOTE TO PHYSICIAN:** Probable minimal damage may contaminate the use of gastric lavage.

**PHYSICAL AND CHEMICAL HAZARDS**

**Strong Oxidizing Agent.** Corrosive. Never mix or use this product in combination with other sanitizers, cleaners or organic substances.

**ENVIRONMENTAL HAZARDS**

This pesticide is toxic to birds, fish and aquatic invertebrates. It is also harmful to birds, fish, and invertebrates. Avoid damage to containers. Keep container closed at all times when not in use. Keep container out of direct sunlight.

**STORAGE AND DISPOSAL**

Do not use on food or beverage, or on any substance that may enter food or beverage. Do not contaminate water, food or feed by storage or disposal.

**PESTICIDE STORAGE:**

Avoid storage at high temperatures. Store in a cool dry place. Do not return SteriCide to the original container after it has been removed. Avoid all containers, especially dirt, reducing agents, and contaminants. Contamination may reduce shelf life and can induce decomposition. Avoid damage to containers. Keep container closed at all times when not in use. Keep container out of direct sunlight.

**PROCEDURE FOR LEAKS OR SPILLS:**

Stop leak if this can be done without risk. Shut off ignition sources: no flames, smoking, flares, or spark producing tools. Keep combustible and organic materials away. Flush spilled material with large quantities of water.

**PESTICIDE DISPOSAL:** Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide mixture, or residue is in violation of Federal Law. If these wastes cannot be disposed of by use according to label instruction, contact your State Pesticide or Environmental Control Agency, or Hazardous Waste representative at the nearest EPA Regional Office for guidance. If material has been spilled, an acceptable method of disposal is to dilute with at least 20 volumes of water before following into suitable treatment system in accordance with all local, state, and Federal environmental laws, rules, regulations, standards, and other requirements.

**CONTAINER DISPOSAL:** Nonrefillable container. Do not reuse or refill this container. If empty, securely wrap original container and discard. If partly filled, call your local solid waste agency for acceptable method of disposal.

ConSeal International Inc. warrants that this product complies with the specifications expressed on the label. To the extent consistent with applicable law, ConSeal International Inc. makes no other warranties, express or implied, including but not limited to warranties of merchantability and fitness for the intended purpose.

PHYSICAL AND CHEMICAL HAZARDS

Strong Oxidizing Agent. Corrosive. Never mix or use this product in combination with other sanitizers, cleaners or organic substances.

ENVIRONMENTAL HAZARDS

This pesticide is toxic to birds, fish and aquatic invertebrates. Do not discharge effluent containing this product into lakes, streams, ponds, ditches, or drains. Do not apply to waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office at the EPA.

DIRECTIONS FOR USE:

To Kill Fungi: SteriCide is an effective fungicide against Trichophyton mentagrophytes and Aspergillus niger. Heavily soiled surfaces must be pre-cleaned prior to disinfection; remove gross soil and then wash with SteriCide followed by thorough potable water rinse. Apply this product by wiping, mopping or as a coarse spray. Allow surface to remain thoroughly wet for at least 2 minutes, then wipe with a clean cloth or allow to air dry. Reapply weekly or when mold and mildew growth reappears.

To Kill Bacteria: SteriCide is not to be used as a sterilant on any surface or instrument that is introduced directly into the human body, either into or in contact with the bloodstream or other normally sterile areas of the body. This product is not approved for use as a sterilant on electrical and critical/semi-critical health care related devices. As required to be a Sterilant, SteriCide has been shown to be an effective sporicide against Bacillus subtilis and Clostridium spores when used as directed. * A Sterilant is an antimicrobial pesticide that destroys or eliminates all forms of microbial life in the inanimate environment, including bacterial spores. The term “sporicide” is deemed to be synonymous with “sterilizing”. Since sterilization includes eradication of all living microorganisms, such claims are intrinsically related to protection of human health (EPA OCSPP 810.2100 & 810 Series).

Sterilization by Flooding: Flooding application may be used in situations where a large volume can be spread over a floor or on a surface where the liquid can be contained for the entire contact time without complete evaporation. Remove gross soil from the surface to be sterilized. Use enough product to cover the surface to be treated, ensuring that the surface is covered with the product for the entire 20-minute contact time. Reapply product if it begins to dry out during the 20-minute contact time.

Sterilization by Immersion: Immersion may be used to treat impermeable non-electrical articles, tools, and devices that are not related to critical/semi-critical health care (e.g., jewelry, keys, eyewear, small containers, coins, toys). To Kill Fungi: SteriCide is not to be used in the inanimate environment, including bacterial spores. The term “sporicide” is deemed to be synonymous with “sterilizing”. Since sterilization includes eradication of all living microorganisms, such claims are intrinsically related to protection of human health (EPA OCSPP 810.2100 & 810 Series).

STORAGE AND DISPOSAL:

Do not return SteriCide to the original container after it has been removed. Avoid all containers, especially diet, endorsing agents and metals. Contamination may reduce shelf life and can induce decomposition. Avoid damage to containers. Keep container closed at all times when not in use. Keep container out of direct sunlight.

PESTICIDE STORAGE: Avoid storage at high temperatures. Store in a cool dry place. Do not return SteriCide to the original container after it has been removed. Avoid all containers, especially diet, endorsing agents and metals. Contamination may reduce shelf life and can induce decomposition. Avoid damage to containers. Keep container closed at all times when not in use. Keep container out of direct sunlight.

PROCEDURE FOR LEAKS OR SPILLS: Stop leak if this can be done without risk. Shut off ignition sources: no flames, smoking, flares, or spark producing tools. Keep combustible and organic materials away. Fluch spilled material with large quantities of water.

PESTICIDE DISPOSAL: Pesticide waste are acutely hazardous. Improper disposal of excess pesticide or rinse is a violation of Federal law. If these wastes cannot be disposed of by use according to label directions, contact your State Pesticide or Environmental Control Agency or the Hazardous Waste representative at the nearest EPA Regional Office for guidance. If material has been spilled, an acceptable method of disposal is to dilute with at least 20 volumes of water followed by discharge into suitable treatment system. In accordance with all local, state, and Federal environmental laws, rules, regulations, standards, and other requirements.

CONTAINER DISPOSAL: Nonhazardous container; do not reuse or refill this container. Triple rinse (or equivalent) container promptly after emptying. Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank. Fill the container 1/4 full with water. Replace and tighten closures. Tip container on its side and roll it back and forth, ensuring at least one complete revolution, for 30 seconds. Stand the container on its end and tip it back and forth several times. Turn the container over onto its other end and tip it back and forth several times. Empty the rinse into application equipment or a mix tank or store rinse for later use or disposal. Repeat this procedure two more times. Then offer for recycling if available or reconditioning, or puncture and dispose of in a sanitary landfill, or incineration, or, if allowed by state and local authorities, by burning, if burned, stay out of smoke.

---

SteriCide is an effective broad-spectrum hospital or medical environment disinfectant against gram positive and gram-negative bacteria (i.e., Staphylococcus aureus, Methicillin Resistant Staphylococcus aureus (MRSA), Bacillus subtilis, and Pseudomonas aeruginosa as a sterilant on electrical and critical/semi-critical health care related devices. As required to be a Sterilant, SteriCide has been shown to be an effective sporicide against Bacillus subtilis and Clostridium spores when used as directed. * A Sterilant is an antimicrobial pesticide that destroys or eliminates all forms of microbial life in the inanimate environment, including bacterial spores. The term “sporicide” is deemed to be synonymous with “sterilizing”. Since sterilization includes eradication of all living microorganisms, such claims are intrinsically related to protection of human health (EPA OCSPP 810.2100 & 810 Series).

Sterilization by Flooding: Flooding application may be used in situations where a large volume can be spread over a floor or on a surface where the liquid can be contained for the entire contact time without complete evaporation. Remove gross soil from the surface to be sterilized. Use enough product to cover the surface to be treated, ensuring that the surface is covered with the product for the entire 20-minute contact time. Reapply product if it begins to dry out during the 20-minute contact time.

Sterilization by Immersion: Immersion may be used to treat impermeable non-electrical articles, tools, and devices that are not related to critical/semi-critical health care (e.g., jewelry, keys, eyewear, small containers, coins, toys). To Kill Fungi: SteriCide is not to be used in the inanimate environment, including bacterial spores. The term “sporicide” is deemed to be synonymous with “sterilizing”. Since sterilization includes eradication of all living microorganisms, such claims are intrinsically related to protection of human health (EPA OCSPP 810.2100 & 810 Series).

PESTICIDE DISPOSAL: Pesticide waste are acutely hazardous. Improper disposal of excess pesticide or rinse is a violation of Federal law. If these wastes cannot be disposed of by use according to label directions, contact your State Pesticide or Environmental Control Agency or the Hazardous Waste representative at the nearest EPA Regional Office for guidance. If material has been spilled, an acceptable method of disposal is to dilute with at least 20 volumes of water followed by discharge into suitable treatment system. In accordance with all local, state, and Federal environmental laws, rules, regulations, standards, and other requirements.
