NET CONTENTS : 64 fl oz (1.89 L)
Nature-Cide Pest Management X2 is a Commercial Concentrate insecticide. Nature-Cide Pest Management X2 Commercial Concentrate has been formulated to kill by contact a variety of listed pests in dwellings, gardens, commercial sites and any place where infestations might occur. Unlike other insecticides, Nature-Cide Pest Management X2 Commercial Concentrate can be used daily without any harm to most washable surfaces. Always test product on an inconspicuous area prior to large area application. Nature-Cide Pest Management X2 Commercial Concentrate is an effective insect killer and is proven to kill by contact: Spiders, Silverfish, Cockroaches, Bed Bugs, Flies, Fleas, Ticks, Ants and Mosquitoes.

**DIRECTIONS FOR USE:** Read entire label prior to use and use as directed. Shake well before each use. Spray surfaces where insects are present from a distance of 8-12 inches, directly spraying listed pests whenever possible. Spray surfaces until wet, even to the point of runoff in heavy infestations. **PLEASE NOTE:** When mixing, always inject water into concentrate for best water/concentrate bonding (Never pour concentrate into water, as concentrate and water will not bond correctly).

**RECOMMENDED USE:** Using safety glasses is recommended when handling any solutions that are sprayed. We recommend mixing in a 1 to 2-gallon pressure pump sprayer. Mix 2 fl. oz. of Nature-Cide Pest Management X2 Commercial Concentrate per gallon of water for outdoor use depending on target pest. Always shake containers well before pouring, mixing or spraying.

**OUTDOOR USE:** Using your pressure pump sprayer, spray generously around all dwelling bases, around roof eves, in and around all outdoor areas including barns, patios, picnic tables, lawns and non-edible gardens, shrubs and trees. Most insects will die by contact but use caution when applying Nature-Cide Pest Management X2 Commercial Concentrate in pest-infested areas, as pests will immediately migrate out of treated areas. Do not spray directly on bees or at times when bees are active.

For Commercial Motorized Sprayers to cover larger areas including lawns, play areas and more, mix as follows: Mix 2 fl. oz. of Nature-Cide Pest Management X2 Commercial Concentrate per gallon of water into reservoir/tank. Set gun wand sprayer head to the widest setting for best results. For best coverage, fog-spray areas where pests might be harboring. This is great for fleas and ticks in lawns or areas that are frequented by pets, farm animals or livestock.

**INDOOR USE:** Using your pressure pump sprayer, spray generously onto all hard surfaces and surrounding areas like door jams, window frames, baseboards and hard to reach corners. Once area is covered, mop up excess product and let dry. For carpeted areas, treat in the same manner, however, test product on an inconspicuous area prior to large area application.

Nature-Cide Pest Management X2 Commercial Concentrate was developed to use regularly, daily if needed, to get pests under control. After management of your property on a regular basis, you will find that Nature-Cide Pest Management X2 Commercial Concentrate will need to be used less frequently to maintain a pest free environment.

**PRECAUTIONARY STATEMENTS:**

**CAUTION:** Avoid contact with eyes and skin; may cause irritation. This product may, after prolonged or frequent skin contact, cause allergic reactions in some individuals.

**FIRST AID: If in Eyes:** Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists, get medical attention. **If on Skin:** Wash with plenty of soap and water. If irritation or rash occurs, get medical advice/attention. Wash contaminated clothing before reuse. Have the product container or label with you when calling a poison control center or doctor or going for treatment. For additional information on this pesticide product call 1-800-222-1222.

**Storage and Disposal:** Keep away from children. Store in original, closed container. Do not reuse or refill empty container. Offer container for recycling, if available, otherwise dispose in trash.
