AQUACULTURAL USES
Aqua Des removes and breaks up bottom containing slime-forming bacteria in fish ponds and on fish pond equipment.

FISH PONDS: Remove fish from ponds prior to treatment. Thoroughly mix 1 to 4 fluid ounces of Aqua Des with 70 gallons of water to achieve 0.400 ppm of peracetic acid and 50 ppm hydrogen peroxide. Add 3 to 4 times weekly or as needed to maintain desired levels. Do not use fish pond water for irrigation purposes.

TREATMENT EQUIPMENT: Thoroughly clean all equipment, prior to treatment. Thoroughly mix 0.5 to 1.0 fluid ounces of Aqua Des with 10 gallons of water to achieve 1.62 to 3.25 ppm peracetic acid and 0.25 to 0.50 ppm hydrogen peroxide. Peracetic acid should not exceed 1.0 ppm for a total of 1.5 ppm of chemical and 0.50 ppm hydrogen peroxide.

SANITIZATION
Aqua Des is in a pre-cleaning sanitation of all equipment and surfaces contact with water, pipes, vessels, tanks, drains, pumps, filters, etc.

SANITIZATION PRO-CLEANED NON-POUSIBLE FOOD CONTACT SURFACES SUCH AS TANKS, PIPING SYSTEMS, PUMPS

Clean equipment such as tanks immediately after use. Rinse gross food particulate matter and oil by a warm water flush, or pre-flush, or a pre-scar and, or as needed, pre-treatment.

SANITIZE AFTER FEEDING CENTER;

ENTRANCE SANITIZATION
To help prevent cross-contamination from unwashed hands to treated areas, apply a sanitizing solution to the entire surface of the hands from front to back and hold for 20 seconds. Then thoroughly rinse with soap and water for 20 seconds. Do not use on treated areas.

TRACTOR TRAILER SANITIZATION
Aqua Des may be used to sanitize tractor-trailer units such as trucks, trailers, rail cars, tanks. (Including truck bodies, parts and tires, axles, wheels) Hot water, the Aqua For to prevent loss of construction between the water and concrete. For concrete and for use as a concrete rebar in construction areas. After treatment, rinse up to a week of water and then re-use or other suitable detergent and rinse.
