WARNING: Harmful if inhaled, swallowed or allowed to get in eyes, on skin or in wounds. Call a Poison Control Center or doctor if you think you have been exposed. Keep out of reach of children.

DIRECTIONS FOR USE

This is a Federal Law. Under Federal law, a product claim may not be made unless the product conforms to the claim. Contact your dealer for complete instructions. Apply Disinfectant Spray Plus as directed to floors, walls, ceilings, etc., having been properly disinfected. Thoroughly wet, use enough so that treated surfaces and objects remain wet for at least 10 minutes. May be applied with a sponge or brush, a pump or a fogger. Allow to remain until thoroughly dry. For best results carpets should be cleaned before application. When treating mold, mildew, fungus or odors caused by bacteria, fungi and mildew, the product should be applied to all affected surfaces until they are thoroughly wet. If spraying equipment, protective clothing, gloves and respirator. Heavy treated spaces should be adequately ventilated and not re-entered for at least one hour after treatment.

STORAGE AND DISPOSAL

Storage:
Keep from freezing. Store in ventilated areas. Do not contaminate water, food or feed by storage and disposal. Dispose leftovers.

Disposal:
Rugs, carpets and in storage areas to control mold, mildew, fungus and odors wherever they are a problem.

Disinfectant Spray Plus is a Broad Spectrum Disinfectant and is Also Effective Against Fungi, Mildew and Odors caused by Bacteria.

INGREDIENTS

Diisobutylphenoxyethoxy ethyl o-Phenylphenol

GENERAL METHOD OF APPLICATION

Surfaces and objects must be cleaned before disinfectant is applied. Spray surfaces and articles until thoroughly wet, and allow them to remain wet for at least 10 minutes. May be applied with a sponge to impervious covers and surfaces, allowing for 10 minutes. For fogging and other large volume applications use appropriate spraying equipment, protective clothing, gloves and respirator. Heavily treated spaces should be adequately ventilated and not re-entered for at least one hour after treatment.

AS A MILDEWICIDE, BACTERICIDE, FUNGICIDE AND DISINFECTANT (ANTI-MICROBIAL)

Disinfectant Spray Plus is a Broad Spectrum Disinfectant and is Also Effective Against Fungi, Mildew and Odors caused by Bacteria.

Disinfectant Spray Plus should be applied with hand or power operated sprayers, foggers, automated metering systems or gravity drip dispensers as a broad spectrum disinfectant, mildewcide, fungicide and deodorizing agent to previously cleaned surfaces. Spray articles until thoroughly moist, giving special attention to cracks and crevices. Allow to remain indoors for drying. It is not necessary to

Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice. Do not give anything by mouth unless told to do so by a Poison Control Center or doctor. Do not give anything by mouth. Give nothing by mouth, as well as forks, shovels and scrapers used for removing litter and manure. Ventilate buildings, feeding and watering appliances. Thoroughly clean all surfaces with soap or detergent and rinse with water. Saturate all surfaces with

For cleanup operations in areas such as attics, wall voids, basements, areas above suspended ceilings and similar inaccessible spaces in buildings. Spray articles until thoroughly moist, giving special attention to cracks and crevices. Allow to remain indoors for drying. It is not necessary to
