Mosquito TREATMENT

Quickly controls mosquito larvae in 24 hours
Controls mosquito larvae in standing (containerized) water*

Floating pouch dissolves within minutes, releasing the granules for uniform coverage
Works even in stagnant, polluted or algae prevalent water
Water soluble - No Mixing - No Mess
Kills mosquitoes for up to 14 days
One pouch treats up to 50 sq. ft. of water
Will not harm fish or amphibians

ACTIVE INGREDIENT*:
Bacillus thuringiensis subsp. israelensis.......1.7%
(Equivalent to 100 ITU/mg)
OTHER INGREDIENTS........................................98.3%
TOTAL..............................................................100.00%

*The percent active ingredient does not indicate product performance and potency measurements are not federally standardized.
EPA Reg. No. 4-455-84732   EPA Est. No. 4-NY-1

Keep out of reach of children
CAUTION  (See back panels for additional Precautionary Statements and First Aid)
Net Contents:
5 - 0.2oz
Water Soluble Pouches

Model/Modelo
#36121
Mosquito TREATMENT

- Kills mosquitoes (mosquito larvae) before they hatch, including those which may transmit West Nile virus, encephalitis, and equine encephalitis.
- Can be used in all types of standing or containerized water* sites where mosquitoes breed, except finished, treated human drinking water sources (See Directions for Use for specific use sites).

PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION: Harmful if inhaled or absorbed through the skin. Avoid contact with skin or clothing. Avoid breathing spray mist. Wash thoroughly with soap and water after handling. Remove contaminated clothing and wash before reuse.

ENVIRONMENTAL HAZARDS: Do not apply to treated, finished drinking water reservoirs or drinking water receptacles, when the water is intended for human consumption.

FIRST AID

Have the product container or label with you when calling a poison control center or doctor, or going for treatment. You may also contact the National Pesticide Information Center at 1-800-858-7378 for emergency medical treatment information.

| If on Skin or Clothing: | Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice. |
| If Inhaled: | Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible. Call a poison control center or doctor for further treatment advice. |

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. smartpond® Mosquito Treatment is a highly selective microbial insecticide, effective against mosquito larvae in standing water. The active ingredient, Bacillus thuringiensis subsp. israelensis (or Bti) kills mosquito larvae upon ingestion by destroying the cellular lining of the insect digestive tract. smartpond® Mosquito Treatment will not harm fish, amphibians or other beneficial aquatic organisms.

This product can be applied to any water* except treated, finished water reservoirs or drinking water receptacles, when the water is intended for human consumption. Use smartpond® Mosquito Treatment to control mosquito larvae in standing water in irrigation or drainage ditches, pastures, livestock watering troughs/ponds/tanks, lawns, woodland pools, snow melt pools, tidal water, salt marshes, catch basins, storm water retention basins, water gardens, flower pots, rain barrels, roof gutters, bird baths, tree holes, unused swimming pools or spas, discarded automobile tires, and any other location around homes or other buildings where water can collect and form a breeding ground for mosquitoes and remain for extended periods. smartpond® Mosquito Treatment is provided in a water-soluble pouch to be placed directly on the surface of the water to be treated. The pouch will float on the water surface and disolve within a few minutes, releasing granules coated with Bti. These granules then slowly release the long-term Bti larvicide.

HOW TO APPLY: 1 pouch, 0.2 oz. will treat up to 50 sq. ft. of water surface (an area approximately 7' x 7'). When treating larger areas, distribute uniformly on the water surface to ensure adequate dispersion of the granules. Lower rate (1 pouch, 0.2 oz./50 sq. ft.) can be used in clear water, against low larval infestations or young larvae (from egg hatch to mid-third instar). When larval instars (late third instar to early fourth instar) predominate, larval populations are high, or water is polluted and/or algae are prevalent, use the higher rate of 2 pouches, 0.4 oz. per 50 sq. ft.

The following table can be used as a guide for determining how much smartpond® Mosquito Treatment to use in a particular situation. Application rates for areas smaller than 50 sq. ft. are listed after the table.

<table>
<thead>
<tr>
<th>Water Condition</th>
<th>Mosquito Infestation</th>
<th>Water surface area to be treated</th>
</tr>
</thead>
<tbody>
<tr>
<td>Clear Water (containing little or no algae or other organic matter)</td>
<td>Light infestation or small larvae</td>
<td>Up to 50 sq. ft.</td>
</tr>
<tr>
<td></td>
<td>Heavy infestation or large larvae</td>
<td>100 sq. ft.</td>
</tr>
<tr>
<td>Polluted water, high organic matter, or algae present</td>
<td>Light infestation or small larvae</td>
<td>1 pouch (0.2 oz.)</td>
</tr>
<tr>
<td></td>
<td>Heavy infestation or large larvae</td>
<td>2 pouch (0.4 oz.)</td>
</tr>
</tbody>
</table>

SMALL AREA APPLICATION: To apply this product to small, specific areas such as bird baths, tree holes, flower pots, etc... sprinkle granules onto the area to be treated, at the following rates:

- Store partially used pouches in original container.

Application can be repeated every 7 to 14 days, as needed. If environmental conditions favor continuous breeding of mosquitoes. Longer periods of mosquito suppression may result when sufficient numbers of aquatic parasites or predators of mosquito larvae are present, since these are not affected by smartpond® Mosquito Treatment and contribute to overall reduction in mosquito populations.

*In New York State, this product is for use only in containerized waters with no outflow to the natural environment.

STORAGE & DISPOSAL

Storage: Store and transport in an upright position. Store in a cool dry area inaccessible to children or pets.

Pesticide Disposal: If empty - Nonrefillable. Do not reuse or refill this container. Place in trash or offer for recycling if available. If partly filled - Call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.

For information on pesticide products (including health concerns, medical emergencies, or pesticide incidents), call the National Pesticide Information Center at 1-800-858-7378.
