Storage and Disposal

Pesticide Storage: Store in a cool, dry area, out of the reach of children.

PRECAUTIONARY STATEMENTS

DIRECTIONS FOR USE

Shake Well Before Using

Spray upward into rooms, such as bathrooms, churches, classrooms, kitchens, living rooms, meeting rooms, recreation rooms and sickrooms, as well as entire rooms to provide effectiveness throughout the room.

Pre-Cleaning

Before using Homebright® Disinfectant Spray for disinfection and/or sanitization*, thoroughly pre-clean surfaces to be treated.

Disinfectant and Sanitizer

Spray upward into rooms, such as bathrooms, churches, classrooms, kitchens, living rooms, meeting rooms, recreation rooms and sickrooms, using 3 second bursts. Direct the spray into corners and center of room, filling the room with a fine mist.

Sanitizing

Spray upward into rooms, such as bathrooms, churches, classrooms, kitchens, living rooms, meeting rooms, recreation rooms and sickrooms, using 3-4 seconds, from a distance of 6-8 inches, until surface is wet. Allow spray to dry without wiping or allow spray to contact treated surface for a minimum of 10 minutes prior to wiping.

Disposal of Refillable Materials:
- Empty used spray bottles.
- Disposal of container is subject to state and local regulations for infectious waste disposal.

Federal regulations prohibit CPC propellants in aerosols.

Pre-Cleaning Environmental Surfaces/Objects Soiled with Blood/Body Fluids:

Before using Homebright® Disinfectant Spray for disinfection and/or sanitization*, thoroughly pre-clean surfaces to be treated.

Disinfection and Sanitization

Spray upward into rooms, such as bathrooms, churches, classrooms, kitchens, living rooms, meeting rooms, recreation rooms and sickrooms, using 3 second bursts. Direct the spray into corners and center of room, filling the room with a fine mist.

Special Instructions for Cleaning and Decontamination Against HIV on Surfaces/Objects Soiled with Blood/Body Fluids:

- Air Freshener • Disinfectant • Sanitizer • Space Deodorizer

*Sanitizer: Kills 99% of Campylobacter jejuni, Escherichia coli, Klebsiella pneumoniae, Salmonella enterica and Staphylococcus aureus (Staph) on hard, non-porous, non-food contact surfaces in 10 minutes.
