1. Product Description

Trimex® Speed Lawn Weed Killer Ready-To-Use is a selective herbicide that provides post-emergence control of broadleaf weeds in established lawns. It may be applied to lawns containing Kentucky bluegrass, perennial ryegrass, fine fescues, tall fescue, bentgrass, bermudagrass, buffalograss, centipedegrass, zoysiagrass, and St. Augustinegrass (except Floratam). Trimex® Speed Lawn Weed Killer Ready-To-Use will control or suppress more than 250 broadleaf weeds, dandelion, clover, black medic, chicory, crackseed, cudweed, groundclover, herbparnassus, hop clover, and hop medic. Results will be visible within hours of application. Symptoms of injury may result in ground water contamination. Application around a cistern or well may result in contamination of drinking water or groundwater.

2. Directions for Use

1. Determine the total area to be treated. Spray just enough to cover the area to be treated.

2. Adjust nozzle to narrow fan spray, to prevent excessive wetting and wide spray. Spray when weeds are actively growing.

3. Avoid applying the product when wind is expected to exceed 90°F for 6 hours.

4. Apply the product to lawns containing bareground, bare soil, and exposed root system or adventitious shoots within the drip line of desirable trees and shrubs, since injury may result in the treated area(s) to the point of runoff or apply when raining or when rain is expected that day. Do not apply directly to or near water, storm drains, gutters, sewers, or drainage ditches. Do not apply as a fine mist because of potential for injury to desirable plants. Do not use this product on or near desirable plants, including crape myrtle, blueberry, currant, and strawberry.
