Disinfection and Cleaning

**Blood / Body Fluids:**

- Autoclave and dispose of according to federal, state, and local regulations for infectious waste disposal.
- Blood / body fluids must be autoclaved and disposed of according to federal, state, and local regulations.

**Disposal of Infectious Materials:**

- Contact time of 4 minutes at 25°C [77°F] (room temperature).
- HBV and HCV are inactivated after a 10-minute contact time.

**Cleaning Procedures:**

- Mix 1/2 oz. of Sani-Clean 2 per gallon of water [or equivalent dilution].
- HIV-1 [AIDS virus] is inactivated after a 10-minute contact time.

**Surfaces / Objects Soiled with Blood / Body Fluids:**

- Disposable protection gloves, gowns, face masks and eye coverings must be worn during all cleaning of contact surfaces: utensils, glassware and dishes.
- Wipe dry with a clean cloth, sponge or mop or allow to air dry.
- Rinse or allow to air dry. Rinsing of floors is not necessary unless they are to be waxed or polished.
- Spraying of objects is not necessary as Sani-Clean 2 is an effective surface treatment. For cleaning of inanimate, non-porous surfaces with blood / body fluids, Sani-Clean 2 is recommended for use as an all-purpose, neutral pH, germicidal detergent and deodorant effective in hard water up to 200 ppm [calculated as CaCO3].

**FUNGICIDAL DIRECTIONS:**

- Sani-Clean 2 will effectively control the growth of mold and mildew plus the odors caused by them when thoroughly wetted on surfaces.
- It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.
- Effective against Pseudomonas aeruginosa, Staphylococcus aureus and Salmonella enterica for up to one year when stored in a sealed container such as a spray bottle. If product becomes visibly dirty or contaminated, the use-life must be discarded and fresh product prepared. Always use clean, properly labeled containers. Bactericidal stability of Sani-Clean 2 in a water-dilution does not apply to open containers such as buckets or bulls.

**FIRST AID**

- If in eyes: Immediately flush with large amounts of water. Hold eye open and rinse slowly and gently with water for 15-20 minutes. For sprayer applications, use a coarse spray device. Spray 6-8 inches from the surface, rub with a brush, cloth or sponge. Do not breathe spray. Let solution remain on surface for a minimum of 10 minutes. Remove heavy soil deposits from surface. Then thoroughly wet with Sani-Clean 2.
- If inhaled: Remove from source of exposure. Let patient take several deep breaths. If symptoms continue, call a physician immediately.
- If swallowed: Seek medical attention immediately. Call a poison control center or doctor immediately for treatment advice. Have person ingest nothing by mouth (including solid food) unless physician directs.
- Sodium hydroxide 40% (damage to skin, eyes or mucous membranes will result in severe damage).

**Hazardous ingredients:**

- Chlorine 14.4% (corrosive). Use caution when handling and before eating, drinking, chew gum or using tobacco or use the toilet. Remove contaminated clothing and wash skin thoroughly before eating, drinking, chewing gum or using tobacco or using the toilet.

**NOTICE:** Pesticide wastes are acutely hazardous. Improper disposal of pesticide wastes is a violation of Federal Law. If these wastes cannot be disposed of by use according to label directions, contact your State Pesticide or Environmental Control Agency or the Hazardous Waste Responsible at the EPA Regional Office.

**CONTAINER DISPOSAL:** Non-refillable Container. Do not reuse or repair this container. Wash empty container and put in trash.
