DIRECTIONS FOR USE:
If accidental ingestion occurs, call a poison control center or doctor for treatment advice.

CONTAINER HANDLING:
• Do not re-use or re-fill this container.

STORAGE AND DISPOSAL:
• Place in original container and seal.
• Store in a secure, childproof container.

NOTE TO PHYSICIANS IN VETERINARY MEDICINE:
Animals may be exposed to anticoagulant baits for several days to a week before mortality is seen. To minimize the risk of nontarget animal exposure, it is recommended that anticoagulant baits be applied as a single treatment, and that treated areas be thoroughly cleaned prior to a return visit.

ENVIRONMENTAL HAZARDS:
Do not contaminate water, food or feed by storage or disposal of containers. Do not apply this product near water, to bodies of water, or waterways.

Baiting Strategy:
1. Each bait station contains 0.75 oz. of bromethalin. If one bait station is not satisfactory, two or more bait stations may be used.
2. Bait stations should be placed in areas where house mice are commonly found. This includes places where mice have been seen and other rodent harborage areas. Evaluate the environment and select the best locations for baiting. Areas close to food sources or where mice are commonly found will be the best locations. If a baited area shows no signs of feeding, move bait stations to a new location.

CAUTION:
Bait stations should be placed out of reach of children and pets. If placed too close to children or pets, they may become exposed to bromethalin. To avoid accidental ingestion, do not apply this product near children or pets. Keep out of reach of children and pets.

If on skin or clothing:
• Remove contaminated clothing.
• Wash immediately with plenty of water.

If in eyes:
• Have the product container or label with you.
• Call a poison control center or doctor for treatment advice.

If swallowed:
• Do not give anything by mouth unless instructed to do so by a doctor or poison control center.
• Do not induce vomiting unless instructed to do so by a doctor or poison control center.
• Have person sip a glass of water if able to swallow.
• Call a poison control center or doctor.

If on skin or in eyes:
• Have the product container or label with you.
• Call a poison control center or doctor for treatment advice.

STATION HANDLING:
• Do not place bait station in an area where children could accidentally come into contact with it.

APPLICATION DIRECTIONS:
• Do not place bait station in areas where children or animals are likely to come into contact with it.

TREATMENT FOR PET POISONING:
• Do not use this product on or near pets. If a pet eats bait, call a veterinarian at once. Do not treat pets with anticoagulants.

DO NOT USE THIS PRODUCT OUTDOORS OR IN WATER.

IMPORTANT:
Do not use this product unless you can follow all instructions and directions on this label.

READ THIS LABEL CAREFULLY.

KEEP OUT OF REACH OF CHILDREN.

The presence of food and water can be detrimental to the efficacy of this product. It is recommended that any food or water be removed from the area where bait stations are being used.

Keep out of reach of children. This product contains bromethalin, a rodenticide with anticoagulant properties. If swallowed, it can be harmful to children and pets. If you think you or someone else might have ingested this product, call a poison control center or doctor immediately.

This product is intended for use in buildings and structures, including private homes, to control house mice. It is also recommended for use in animal houses, such as barns, stables, and livestock buildings, to control rodents.

The product is available in a disposable bait station that can be placed in areas where house mice are commonly found. The bait station is designed to be easy to use and is not intended for use outdoors or in water.

The anticoagulant properties of the product make it effective for controlling house mice, as well as other rodents such as rats and squirrels. It is recommended that this product be used in conjunction with other rodent control methods, such as trapping and sealing entry points, to achieve maximum effectiveness.

The product is easy to use and can be applied in a variety of ways, including placing the bait station on the floor or wall, or hanging it from the ceiling. It is important to follow all instructions and directions on the label to ensure safety and effectiveness.

The product is safe for use around children and pets, as long as it is used as directed and kept out of reach. It is important to follow all instructions and directions on the label to ensure safety and effectiveness.

This product is not recommended for use on or near water or in water bodies. It is important to follow all instructions and directions on the label to ensure safety and effectiveness.

The product is available in a variety of forms, including bait stations and strips. It is important to choose the appropriate form for the application site and to follow all instructions and directions on the label to ensure safety and effectiveness.

The product is effective against a variety of pests, including house mice, rats, and squirrels. It is important to choose the appropriate product for the application site and to follow all instructions and directions on the label to ensure safety and effectiveness.

This product is available in a variety of packaging sizes, including 2, 4, and 12 bait stations. It is important to choose the appropriate packaging size for the application site and to follow all instructions and directions on the label to ensure safety and effectiveness.

The product is effective against a variety of pests, including house mice, rats, and squirrels. It is important to choose the appropriate product for the application site and to follow all instructions and directions on the label to ensure safety and effectiveness.
