| Walnut Blight (Xanthomonas campestris pv juglandis)  | 64 fl oz/A (0.084 lb ai/A) | - Apply at a rate of 64 fl oz/A in at least 100 gal of water by ground application.  
- Reduced spray volumes may be utilized for small trees where complete coverage can be obtained with a less than 100 gal of water/A.  
- Begin applications when conditions favor disease development.  
- For airblast application: To help reduce off-target drift, direct spray into the canopy, and turn off outward pointing nozzles at row ends and when spraying outer rows. |

**RESTRICTIONS:**
- Do not apply more than 64 fl oz/A (0.084 lb ai/A) in a single application.  
- Do not apply more than 256 fl oz (0.336 lb ai/A) of KASUMIN 2L per acre per year.  
- **In California:** Do not apply more than 128 fl oz (0.168 lb ai/A) of KASUMIN 2L per acre per year.  
- Do not make more than 4 applications of KASUMIN 2L per year with a minimum interval of 7 days between applications.  
- **In California:** Do not make more than 2 applications of KASUMIN 2L per year.  
- Do not apply more than 2 consecutive applications of KASUMIN 2L before alternating with another fungicide/bactericide of a different mode of action. If additional bactericide applications are needed, utilize an alternate product registered for this use. Two more consecutive KASUMIN 2L applications may be made subsequent to use of the alternate registered product.  
- Do not use an alternate tree-row application method.  
- Do not apply kasugamycin in orchards in which the soil has been fertilized with animal waste/manure or human biosolids.  
- Animal grazing in treated areas is prohibited. The public must be notified by posting restriction signs along the perimeter of the treatment area.  
- Do not apply KASUMIN 2L through any type of irrigation system, including chemigation.  
- Do not apply KASUMIN 2L by aerial application.  
- Preharvest Interval (PHI) = 100 days.  
- Use only the specified and full-strength application rates.
