Why Fertilize the Lawn?

1. Watering and soil aeration help your lawn grow
2. Provide a high-quality fertilizer
3. Aerate your soil by placing a small amount of fertilizer around each hole

DIRECTIONS FOR USE

Measure the ground area to be fertilized and then divide by the area to be treated. Apply a small amount of fertilizer around each hole. Water the area to ensure proper application and distribution of the fertilizer. Repeat the process every 3 weeks.

MIXED_DIRECTIONS:

1. Water the area to be fertilized
2. Apply a high-quality fertilizer
3. Water the area again to ensure proper application and distribution of the fertilizer

Next Feeding

Apply early spring. Apply as soon as the grass begins to grow.

Or

Apply anytime during the growing season. Apply as soon as the grass begins to grow.
