DIRECTIONS FOR USE
This product is ready to use - no shaking or mixing is required. Some plants with new growth or tender tissues can be sensitive to this product. Always test spray a few leaves 1 day before spraying entire plant or garden. Spray all plant surfaces thoroughly, including top and bottom of leaves. Apply with a hand sprayer, pump sprayer, or fogger. Peppermint Fury works as a fungicide - allow treated plant to air dry for 30 minutes with little or no air movement. Do not spray in direct sunlight or under high intensity lighting. To prevent garden pests, use every two weeks. Usually only one application is required to control powdery mildew. Repeated applications are needed to control insect infestations; spray every three days for two weeks. For best results, use in rotation with other natural pesticides.

CONDITIONS OF USE
Read entire label and use as directed. Peppermint Fury is a minimum-risk pesticide under FIFRA 25(b) and is exempt from federal registration. GardenCare Naturals is not responsible for the use or misuse of this product in any way. Liability is limited to replacement of the same amount of product ONLY.

STORAGE AND DISPOSAL
Return unused product to original, sealed container. Store in a cool, dry place inaccessible to children and pets. Avoid temperature extremes. After use, recycle or discard empty container.

PRECAUTIONARY STATEMENT AND FIRST AID
Avoid contact with eyes or sensitive skin. Vapors may cause minor irritation. Do not swallow. To remove product from skin, eyes, or clothing, flush thoroughly with water. Do not induce vomiting.
