In case of emergency, call a poison control center or doctor for treatment advice.

Inhalation: Remove to fresh air. If symptoms of exposure persist, seek medical attention immediately.

Swallowing: Do not induce vomiting. If swallowed, call a poison control center or doctor for treatment advice.

Contact: With skin or clothing, remove contaminated clothing immediately.

FIRST AID

PERTH: Didecyl dimethyl ammonium chloride

Hazardous materials: Didecyl dimethyl ammonium chloride.

ODOR CONTROL:

This ready-to-use product is intended for use on washable hard, non-porous environmental surfaces/objects likely to be soiled with blood or body fluids. These wastes cannot be disposed of by use according to label instructions, unless otherwise permitted by local regulations for infectious disposal.

FRONT LOAD WASHING MACHINES:

For disposal, communicate with your distributor or the nearest EPA Regional Office for guidance.

If you have questions about the proper disposal of your wastes, contact your state Poison Control and/or Environmental Control agency, or, on hazardous wastes, the appropriate EPA Regional Office for guidance. If any solid waste has absorbed hazardous waste, dispose of it as hazardous waste.

MISCELLANEOUS:

If the product is not going to be used within 5 minutes, remove excess water from the spray tip and apply the remaining solution for 10 minutes. Thoroughly wet all hard, non-porous surfaces. Scrub to loosen all soils. Surface must remain visibly wet for 10 minutes. Immerse all equipment in the treatment solution for 10 minutes. Thoroughly wet all hard, non-porous surfaces. Scrub to loosen all soils. Surface must remain visibly wet for 10 minutes. Immerse all equipment in the treatment solution for 10 minutes. Thoroughly wet all hard, non-porous surfaces. Scrub to loosen all soils. Surface must remain visibly wet for 10 minutes.
