FLEXDEL

UltraGard
PREMIUM ANTI-FOULING

❖ For Fiberglass & Wooden Boats
❖ High Load Ablative Action Repels Barnacles & Other Growth
❖ Outstanding Performance

ACTIVE INGREDIENTS: Cuprous Oxide ..... 37.5%
INERT INGREDIENTS: .......................... 62.5%
Total .................................................. 100.00%
Copper as Metallic .............................. 33.3%
Contains Petroleum Distillates

1 US Gallon / 3.785 Liter
65101
Black

WARNING! Keep out of reach of children.
See side panel for additional precautionary statements
PRECAUTIONARY STATEMENTS
WARNING: HAZARDOUS TO HUMANS AND DOMESTIC ANIMALS
Causes eye irritation. Harmful or fatal if swallowed or absorbed through skin. Avoid contact with skin, eyes or clothing. Wear protective clothing such as gloves, long-sleeved shirt, long pants and hat. Harmful if inhaled. Do not breathe vapor, spray mist, or dust. While spraying paint, sanding or sandblasting, wear a mask or respirator approved by the National Institute for Occupational Safety and Health. Remove contaminated clothing and wash before reuse. Wash thoroughly with soap and water after handling.
KEEP OUT OF REACH OF CHILDREN!
FIRST AID: If swallowed: 1.) Call a poison control center or doctor immediately for treatment advice. 2.) Have person sip a glass of water if able to swallow. 3.) Do not induce vomiting unless told to do so by a Poison Control Center or doctor. 4.) Do not give anything by mouth to an unconscious person.
If on skin or clothing: 1.) Take off contaminated clothing. 2.) If on skin wash with plenty of water for 15-20 minutes. 3.) Call poison control center or doctor for treatment advice.
If inhaled: 1.) Move person to fresh air. 2.) If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible.
3.) Call poison control center or doctor for treatment advice.
If in eyes: 1.) Hold eye open and rinse slowly and gently with water for 15-20 minutes. 2.) Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. 3.) Call a poison control center or doctor for treatment advice.
Other: Have the product container or label with you when calling a poison control center or doctor or going for treatment.
Note to Physician: Probable mucosal damage may contra-indicate the use of gastric lavage.
PRODUCT EMERGENCIES: 1-800-424-9300
ENVIRONMENTAL HAZARDS: This pesticide is toxic to aquatic organisms including fish and shellfish. Do not apply directly to water by cleaning of equipment or disposal of wastes. Do not allow chips and dust generated during paint removal to enter water. Dispose of paint debris in an approved landfill. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or public waters unless this product is specifically identified an addressed in an NPDES permit. Do not discharge effluent containing this product to sewer systems without previously notifying the sewage treatment plant authority. For guidance contact your state water board or regional office of the EPA.
COMBUSTIBLE!
DISCLAIMER: The performance of any marine paint or coating depends on many factors outside the control of Flexdel Corp. including environmental conditions. Therefore, Flexdel Corp. cannot guarantee this product's suitability for your particular purpose of application. Implied warranties of fitness for particular purpose and of merchantability are excluded. Flexdel Corp. shall not under any circumstances, be liable for incidental or consequential damages. By purchase or use of this product, buyer agrees that sole and exclusive remedy, if any, is limited to the refund of the purchase price or replacement of the product at Flexdel Corp.'s option.
DIRECTIONS FOR USE
This is a cuprous oxide pigmented coating, formulated especially to prevent the attachment of both plant and animal fouling on vessels immersed in both seawater and “brackish” water.

1A) Surface preparation: New / Bare Fiberglass Hulls:
Wipe down surface with Aquagard 180 Wash & Dewaxer. Change rags frequently to assure complete removal of wax and mold release agent & contaminates. Sand surface thoroughly with 80 or 100 grit sand paper. Wipe down surface again with Aquagard 180 Wash & Dewaxer to remove sanding residue and immediately apply one (1) coats of Aquagard Primer with a roller or brush. Allow Primer to dry for minimum of two (2) hours.

1B) Surface preparation: For previously painted surface:
To prepare the surface for coating, remove all loose coating and fouling residue by either washing with high pressure water, scraping or by sanding. Apply a small patch of Flexdel UltraGard Anti-Fouling Paint to test compatibility with the old paint. If Flexdel UltraGard Anti-Fouling Paint cracks or lifts, all the old paint will have to be removed. Then follow the “Bare Fiberglass Hulls” system specified above. If nothing appears to happen when this product is applied, let the test patch dry for several hours and then scrape this product to see if it is adhering to the old paint satisfactorily. If the adhesion looks good, sand the entire surface thoroughly with 80 grit sandpaper.

Previously painted surfaces in poor condition (such as chipping, peeling or flaking) should be stripped to bare fiberglass. Then proceed with the “Bare Fiberglass Hulls” preparation.

2) Application: A clean dry surface (free of scale, corrosion, dirt, grease, oil, marine fouling, or other foreign matter) will provide the optimum performance of this coating, when used for either complete coating or touch-up. Wipe down surface with Aquagard 180 Wash & Dewaxer. Inadequate surface preparation will result in unsatisfactory performance. Mix the coating thoroughly for a minimum of five (5) minutes to insure complete pigment reincorporation. Apply by either brush, roller or spray. Flexdel UltraGard Anti-Fouling Paint should be applied at or above 50°F. Apply two (2) coats of Flexdel UltraGard Anti-Fouling Paint. Allow four (4) hours drying time between coats. Let final coat dry eight - twelve (8-12) hours before launching the boat. The theoretical coverage of this product is approximately 400 square feet per gallon. Clean up with paint thinner or white spirits when finished.

STORAGE AND DISPOSAL: Do not contaminate water, food or feed by storage or disposal. Store in cool dry area away from heat or open flame. Open dumping is prohibited.

PESTICIDE DISPOSAL: Pesticide spray mixture or rinsate that cannot be used according to label instructions must be disposed of according to applicable Federal, State or local procedures.

CONTAINER DISPOSAL: Non-refillable container. Do not reuse this container to hold materials other than pesticides or diluted pesticides (rinsate). Offer for recycling if available or puncture and dispose of in a sanitary landfill, or by other procedures approved by state and local authorities. If rinsate can not be used follow pesticide disposal instructions. If not triple rinsed, these containers are acute hazardous wastes and must be disposed in accordance with local state and federal regulations.

RESIDUE REMOVAL INSTRUCTIONS: Triple rinse container (or equivalent) promptly after emptying. Triple rinse as follows: empty the remaining contents into application equipment or a mix tank and drain for 10 seconds after the flow begins to drip. Fill the container ¼ full with mineral spirits and recap. Shake for 10 seconds. Pour rinsate into application equipment or mix tank or store rinsate for later use or disposal. Drain for 10 seconds after the flow begins to drip. Repeat this process two more times.
