"The Way It's Made Matters™"

Provides lush green turf throughout the growing season
Grows deeper roots and improves water retention
Aids in the prevention of some common weeds

NET WT. 30 LB (13.6 KG)  COVERS UP TO: 3,000 SQ FT (278.7 M²)  9-0-0
### Use Directions

Dave Thompson’s Healthy Grow Gold may be used as both a natural source of nitrogen fertilizer and as a pre-emergent annual grass control for crabgrass and foxtail.

As a fertilizer, apply Healthy Grow Gold at the rate of 10 lbs./1,000 sq. ft. in early spring after the grass has greened up. Ninety percent of the nitrogen is slowly available and will begin to release as the soil warms with the season. Unlike other fertilizers, there is much less surge growth in the spring with Healthy Grow Gold.

Then, in not less than 30 days after the first application, apply the second application of Healthy Grow Gold at the rate of 10 lbs./1,000 sq. ft. The ideal timing for this application should coincide with the drop of the forsythia blooms. The timing of this application is critical to help with crabgrass/foxtail control. The flowering of the lilac in your neighborhood is the best indicator that soil temperatures are suitable for the germination of annual grasses and the absolute optimum time to apply a pre-emergent.

### Application

Apply with any type of drop or rotary spreader. Healthy Grow Gold is a homogenous product and each granule contains all of the essential nutrients and matter needed to produce a healthy lawn.

### Limitations

Pearl Valley Organics warrants that the product conforms to the specifications on its label. User assumes all risks associated with its use.

### Storage and Disposal

Store product in a cool, dry place out of the reach of children and pets. Keep bag tightly closed, away from moisture and light. Dispose properly in appropriate receptacle.

---

### Precautions

Do not apply near water, storm drains or drainage ditches. Do not apply if heavy rain is expected. Apply this product only to your lawn and sweep any product that lands on the driveway, sidewalk or street, back onto your lawn.

This product is classified as a minimum risk pesticide. This pesticide is exempt from federal registration under section 25(b) of the Federal Insecticide, Fungicide and Rodenticide Act (FIFRA).
