**PRECAUTIONARY STATEMENTS**

**HAZARDS TO HUMANS AND DOMESTIC ANIMALS**

**DANGER:** Causes irreversible organ damage if swallowed. Do not eat, drink, or smoke in vicinity of treated areas. Wash exposed skin and eyes thoroughly with soap and water. If irritation persists, get medical advice.

**CAUTION:** Causes irreversible organ damage if swallowed. Do not eat, drink, or smoke in vicinity of treated areas. Wash exposed skin and eyes thoroughly with soap and water. If irritation persists, get medical advice.

**FIRST AID**

**IF IN EYES:** Remove contact lenses (if present and easily accessible). Wash out with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

**IF INHALED:** Remove person to fresh air. If not breathing, give artificial respiration. If breathing has stopped, get medical advice immediately. Call a poison control center or doctor for treatment advice.

**IF SWALLOWED:** Call a poison control center or doctor immediately for treatment advice. Have the product container (if possible) and if known the quantity ingested. Do not induce vomiting unless told to do so by a poison control center or doctor.

**HAZARDS TO THE ENVIRONMENT**

**STORAGE & DISPOSAL**

Keep out of reach of children. Store under direct sunlight or excessive heat. Do not incinerate. Do not burn containers. Store in a cool, dry, well-ventilated area. When removing empty containers, follow the procedures for handling chemicals described on this label.

**DISPOSAL**

In 5 minutes against Tuberculosis meningitis (ATCC 1331), Candida albicans (ATCC 10231) and Penicillium chrysogenum (ATCC 9533) on hard, non-porous surfaces.

SANTIZATION:

Prepare use solution according to label instructions. This product is a hard surface sanitizer for pre-cleaned hard, non-porous, non-food contact surfaces in clean rooms and controlled areas. Apply solution according to label instructions. For heavily soiled areas, a pre-cleaning step is required. Apply solution to hard, non-porous surfaces in clean rooms and controlled areas with a mop, cloth, disposable wipe or soaping on to wet all surfaces thoroughly. Allow to remain wet for a minimum of 5 minutes and then either allow to air dry or wipe dry with a cloth or wiper. When used as directed at a 5 minute contact time, this product is effective against Gram-negative bacteria (ATCC 13642) and Penicillium chrysogenum (ATCC 9533). The product is stable for 24 hours. Prepare a fresh solution daily. For use as a STERILIZANT:

Disinfectant solutions must remain wet for the required contact time indicated in the product label. Use the product as directed at the required contact time. After product is diluted in water, it is stable for 24 hours. The diluted solution is effective against Gram-negative bacteria (ATCC 13642) and Penicillium chrysogenum (ATCC 9533). The product is stable for 24 hours. Prepare a fresh solution daily. For use as a STERILIZANT:

This product is effective against Clostridium perfringens (ATCC 5384) and Bacillus subtilis (ATCC 29532) spores. Remove used solution and entrapped soil with a clean, dry, sterile cloth.

physical and chemical hazards:

Contains strong oxidizing agent. Use only with clean, dry equipment. Do not use with water. Do not mix with acids, enamels or any other product or chemical that may release chlorine or other hazardous gases.

environmental hazards:

This product is toxic to fish and aquatic organisms.

storage & disposal:

Do not incinerate. Store in a cool, well-ventilated area away from food or flammable materials. In case of decomposition, isolate container from other materials. In case of fire, stop spill, and move fire to a safe area.

protection equipment:

When preparing and applying the product, use suitable protective clothing, including rubber gloves. Wear protective eye and face equipment, such as safety glasses or goggles, and protective clothing, such as a laboratory coat, apron, and boot coverings. Remove used solution and entrapped soil with a clean, dry, sterile cloth.
