**FOR INDUSTRIAL USE:** It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protect handlers may be in the area during application.

**LUMBER TREATMENT: SINESTRO PFB is to be used on control inappetant, wood and decay on green or freshly cut lumber and wood products like a. log, poles, girds, poles, deciduous in weathered, and other exterior surfaces treated for non-food contact papermilling and manufacturing or components for no food contact/antibiotic. Lumber damage must be treated with this product. Do not apply to structures that are not adequately sealed.

**A delay in treatment of 24 hours or more permits, mild and decay growth to start which requires an increased concentration of antiallasept treatment to achieve adequate control.** Treated lumber must be protected from rain and removed from direct solar GROUND contact. Direct treated with SINESTRO PFB will not be used in food-handling facilities. Do not use treated lumber in structures that will come in contact with food or food products.

**Always follow label directions when applying SINESTRO PFB.** Treated lumber must be stored under cover, indoors, or at least 18 months from any pond, lake, stream, wetland, or river to prevent possible runoff of the product into the environment. Treated lumber stored under 100 feet of a pond, lake, stream, wetland, or river must be either covered with plastic or surrounded by a barrier to prevent surface water runoff into the nearby waterway. If a barrier or wake is used around the site, it must cover all soil pores and prevent water from entering the waterway during rainfall.
