**EVANESCENT**

**Powered by Essential Oils**

**Insecticide/Fungicide**

Evanescent is a proprietary Nano-fusion of essential oils and science. It's effective against Spider mites, Russet mites, and Broad mites. Evanescent is effective against most species of Thrips, Aphids, and Caterpillars.

**INSTRUCTIONS:** Evanescent must be shaken well for 30 to 60 seconds to insure consistency before adding to water. Always spot test and observe for 48 hrs before treating whole crop. For preventative maintenance on young or tender plants or root drench: dilute 1/2 oz. for every gallon of water. For infestations add 1 oz. per gallon. Bottle makes 2-4 gallons. Spray plant thoroughly to ensure complete coverage. Repeat only if the infestation persists. Evanescent may be sprayed every other day to combat extreme infestations, otherwise 3 to 5 days between sprays is advised. Evanescent is safe to use with any type of sprayer and may be used as a root drench. Do not use on unrooted clones. Very young plants and recently rooted clones may experience mild burning. To avoid this, rinse the plant with water within 10 minutes after application. Repeat as needed. For preventative or maintenance sprays, 4 to 5 days between applications is advised. Do not spray within 5 days of use with another pesticide product. Wait 2 weeks before application if any sulfur product is used. Store in a cool dry place, and dispose of properly. **SHAKE WELL BEFORE USE. KEEP OUT OF REACH OF CHILDREN.**

**INGREDIENTS:** Active Ingredients: Rosemary Oil ... 16.7%, Clove Oil ... 33.9%  
Inactive Ingredients: Soap, purified water 80%

Made from all natural non-toxic ingredients. 25b exempt from EPA registration. PATENT PENDING
