Spray trails, nest and point of entry. Spray on ants and scorpions: power of the jet spray to reach and cover the scorpion. Stand at a safe distance and use the spray away from the nest. Do not stand directly underneath. All outdoor applications to impervious surfaces such as sidewalks, driveways, patios, porches and structural surfaces (such as windows, doors and eaves) are limited to spot and crack-and-crevice treatments only. Application is prohibited directly onto sewers or drains, or to any area like a gutter where drainage to sewers, storm drains, water bodies or aquatic habitat can occur. Do not allow the product to enter any drain during or after application.

WASPS, HORNETS & YELLOWJACKETS:
1. Apply at sunset when insects are least active.
2. Stand a safe distance from the nest. Don’t stand directly underneath.
3. Shake can well before each use. Aim spray away from the person. Push button to spray.
4. Spray the nest until soaked. This product’s powerful spray will also kill insects that return to the nest over the next few days.
5. Wait at least 24 hours before removing the nest.

Use of this product on evergreen and holly is not recommended as damage may result. This product is non-staining to most home siding where the spray may contact home siding, test in an inconspicuous area and recheck in a few hours.

USE TIPS
- It’s windy, stand with the wind at your back to avoid spray drift.
- Do not use this product on or on electrical equipment due to possibility of shock hazard.

OTHER PESTS
Tent Caterpillars: Apply in the late afternoon or evening when caterpillars have returned to their tents. Soak tents on all sides.
Scorpions: Stand at a safe distance and use the power of the jet spray to reach and cover the scorpion.
Ants: Spray trails, nest and point of entry. Spray on ants where possible.
