KEEP OUT OF REACH OF CHILDREN
DANGER

FIRST AID

IF IN EYES:
- Hold eye open and flush with large amounts of water for 15-20 minutes.
- Remove contact lenses, if present, after the first 5 minutes.
- Then continue rinsing eyes.
- Call a poison control center or doctor for treatment advice.

IF INHALED:
- Make sure the victim is breathing well.
- If breathing is difficult, give artificial respiration, preferably mouth-to-mouth.

If swallowed:
- Immediately call a poison control center or doctor for treatment advice.
- Have person sip a glass of water if able to swallow.
- Do not induce vomiting unless told to do so by the poison control center or doctor.
- Do not give anything by mouth to an unconscious person.

IF ON SKIN OR CLOTHING:
- Take off contaminated clothing.
- Immediately wash affected parts with plenty of water for 15-20 minutes.
- Call a poison control center or doctor for treatment advice.

For emergencies, call the poison control center at 1-800-222-1222.

Active Ingredient:
Calcium Hypochlorite (CAS No. 7783-54-3) .......................... 65%
Other Ingredients .......................................................... 35%
Total ............................................................................ 100%

NOTE TO PHYSICIAN: Permanent nervous damage may result from the use of poison-laden water.

See back panel for additional Precautionary Statements and complete Directions for Use.
**PRECAUTIONARY STATEMENTS**

**Hazards to Humans and Domestic Animals**

**DANGER:** Corrosive. Causes irreversible eye damage and skin burns. Fatal if swallowed or absorbed through skin. Do not get in eyes, on skin or on clothing. Wear long-sleeved shirt, long pants, goggles or face shield and rubber gloves when handling this product. Irritating to nose and throat. Avoid breathing dust. Thoroughly wash with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using the toilet. Remove and wash contaminated clothing before reuse.

**Environmental Hazards**

This product is toxic to fish and aquatic organisms. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or public waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product into sewer systems without notifying the sewage treatment plant authority. For guidance, contact your State Water Board or the Regional Office of the U.S. EPA.

**Physical or Chemical Hazards**

Strong Oxidizing Agent. Mix only with water. Add product to water; do not add water to product. Use clean, dry utensils. Do not add this product to any dispensing device containing remnants of any other product; such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter or other chemicals will start a chemical reaction and generate heat, chlorine gas and possible fire and explosion. In case of contamination or decomposition, do not reseal container. If possible, isolate container in open air or well-ventilated area then flood area with large volumes of water if necessary.

**NOTICE:** This product may be applied only by the methods specified on the labeling.

**DIRECTIONS FOR USE**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

**SWIMMING POOL WATER DISINFECTION**

For a new pool or spring startup, superchlorinate with 10-20 oz of product for each 10,000 gallons of water to yield 5-10 ppm available chlorine by weight. Check the level of available chlorine with a test kit. Adjust and maintain pool water pH to between 7.2-7.6.

To maintain the pool, add monochlor or by a feeder device 2 oz of this product for each 10,000 gallons of water to yield an available chlorine residual between 0.6-1.0 ppm by weight. In stabilized pools maintain a residual of 1.0-1.5 ppm available chlorine. Frequently test the pH, available chlorine residual and alkalinity of the water with appropriate test kits.

Frequency of water treatment will depend upon temperature and number of swimmers. Every 7 days, or as necessary, superchlorinate the pool with 10-20 oz of product for each 10,000 gallons of water to yield 5-10 ppm available chlorine by weight. Check the level of available chlorine with a test kit. Do not reenter pool until the chlorine residual is below 1.5 ppm. Recently treated pools is prohibited above levels of 4 ppm due to risk of bodily harm. At the end of the swimming pool season or when water is to be drained from the pool, chlorine must be allowed to dissipate from treated pool water before discharge. Do not chlorinate the pool within 24 hours prior to discharge.

**Winterizing Pools:** When water is still clear and clean, apply 0.6 of product per 1,000 gallons of water, while filter is running, to obtain a 3 ppm available chlorine residual, as determined by a suitable test kit. Cover pool, prepare heater filter and heater components for winter by following manufacturers' instructions.

**STORAGE & DISPOSAL**

Do not contaminate soil or water by improper storage or disposal of equipment.

Pesticide Storage: Keep this product dry in a tightly closed container when not in use. Store in a cool, dry, well-ventilated area away from heat or open flame. In case of decomposition, isolate container if possible and flood area with large amounts of water to dissolve all material before container disposal.

Container Disposal: Nonrefillable container; do not reuse or refill container.

If empty: Place in trash or offer for recycling if available.

If partially filled: Call your local solid waste agency for disposal instructions. Never place undiluted unused product down any indoor or outdoor drain.
