TREATMENT OF VISIBLE POOL ALGAE:

1. Initially apply 8 fluid ounces of this product per 10,000 gallons of pool water directly to the pool surface-compatible brush.

2. Prior to the initial application of this product, test pool water for the presence of metals. If metals are present, apply a metal stain preventative per label directions.

3. When using other products, always follow label directions for those products.

4. In use dilution, this product is non-staining to pool surfaces.

5. The next day, thoroughly brush pool surfaces.

6. Continuously circulate pool water for 24 hours.

7. In cases of persistent algae, repeat brushing and product application after 2-4 days.

TO PREVENT POOL ALGAE:

1. Initially apply 8 fluid ounces of this product per 10,000 gallons of pool water with pump and filter operating.

2. Thereafter, for weekly application intervals, add 1.5 fluid ounces per 10,000 gallons of pool water each week. Follow manufacturer’s recommendations for the presence of metals. If metals are present, apply a metal stain preventative per label directions.

3. Wait at least 15 minutes after application before entering pool.

4. Vacuum leaves and any other foreign debris from pool.

5. Brush visible algae thoroughly from the pool’s surface with a surface-compatible brush.

ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish and aquatic organisms.

Note: User assumes all responsibility for use not in accordance with directions. Metals from source water, leekers or poorly sequestered algaecides have the potential to stain pool surfaces. Treat these problems with an appropriate stain and scale inhibitor (chelating agent) before using this product.
