**KEEP OUT OF REACH OF CHILDREN**

**DANGER**

**FIRST AID**

Have the product container or label with you when calling poison control center or doctor, or going for treatment. If In Eyes: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses if present and easy to remove; continue rinsing eye. Call a poison control center or doctor for further treatment advice.

**NOTE:** If on Skin or Clothing:

- Take off contaminated clothing.
- Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for further treatment advice.

**DISPOSITION**

- When used as directed this product is an effective sanitizer at an active quaternary concentration of 200-400 ppm when diluted in water up to 850 ppm hardness in public eating establishments, and food processing plants against Escherichia coli, Enterococcus faecalis and Campylobacter jejuni. Regular, effective cleaning and sanitization of equipment, utensils and work or dining surfaces that could harbor hazardous microorganisms minimizes the probability of contaminating food during preparation, storage or service. Effective cleaning will remove soil to prevent the accumulation of food residues, which may decompose or support the rapid development of food poisoning organisms or toxins. Application of effective sanitization procedures reduces the number of those disease causing organisms that may be present on equipment and utensils after cleaning. Effective sanitization reduces the potential for the transfer of disease, either directly through tableware such as glasses, cups and flatware or indirectly through food.

To prevent cross-contamination, kitchenware and equipment food contact surfaces must be washed, rinsed with potable water and sanitized after each use and following any interruption of operation during which time contamination may have occurred.

**FOOD CONTACT SURFACE SANITIZATION DIRECTIONS**

Sanitization: Recommended for use in restaurants, food processing plants, and bars.

PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS.
KEEP OUT OF REACH OF CHILDREN. CORROSIVE. Causes irreversible eye damage and skin burns. Do not get in eyes, on skin or on clothing. May be fatal if inhaled. Do not breathe spray mist. Harmful if swallowed or absorbed through skin. Wear goggles or face shield, rubber gloves and protective clothing when handling. Wash thoroughly with soap and water after handling and before eating, drinking, using tobacco or using the toilet. Remove contaminated clothing and wash before reuse.

STORAGE AND DISPOSAL
DO NOT CONTAMINATE WATER, FOOD, OR FEED BY STORAGE OR DISPOSAL.

PESTICIDE STORAGE - Store in a dry place no lower in temperature than 50°F or higher than 120°F. Store in a tightly closed container in an area inaccessible to children. PESTICIDE DISPOSAL - Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture, or rinsate is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance. CONTAINER DISPOSAL - Nonrefillable container. Do not reuse or refill this container. Offer for recycling, if available. Triple rinse container promptly after emptying. Triple rinse as follows: Fill container ¼ full with water and recap. Agitate vigorously. Follow Pesticide Disposal instruction for rinsate disposal. Drain for 10 seconds after the flow begins to drip. Repeat procedure two more times. Offer for recycling or reconditioning, if available. If not available, puncture and dispose in a sanitary landfill. PACKET DISPOSAL - Do not reuse; discard empty container and put in trash. SPILL OR LEAK PROCEDURES - Small spills may be mopped up, flushed away with water or absorbed on some absorbent material and incinerated. Large spills should be contained, the material then moved into containers and disposed of by approved methods for hazardous wastes.

See booklet for additional information and Directions for Use

KEEP OUT OF REACH OF CHILDREN DANGER

FIRST AID
Have the product container or label with you when calling poison control center or doctor, or going for treatment. If In Eyes: Hold eye open and rinse slowly and gently with water for 15-20 minutes.
2. Remove contact lenses if present and easy to remove. Continue rinsing eye. Call a poison control center or doctor for treatment advice. If on Skin or Clothing: Take off contaminated clothing.
3. Rinse skin immediately with plenty of water for 15-20 minutes. Call poison control center or doctor for treatment advice. If Swallowed: Call poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor. Do not give anything by mouth to an unconscious person.
6. Fresh sanitizing solution should be prepared at least daily or when visibly soiled or diluted.
6. Sanitized utensils on a rack or drain board to air dry. Wash thoroughly with soap and water after handling.

NOTE: A clean potable water rinse following sanitization is not permitted under Section HFS 196.13 of the Wisconsin Administrative Code.

U. S. PUBLIC HEALTH SERVICE FOOD SERVICE SANITIZATION RECOMMENDATIONS
Cleaning and sanitizing: Equipment and utensils must be thoroughly pre-flushed or pre-scraped and when necessary, pre-soaked to remove gross food particles and soil.
1. Thoroughly wash equipment and utensils in hot detergent solution.
2. Rinse utensils and equipment thoroughly with potable water.
3. Sanitize equipment and utensils by immersion in a use-solution of 1-2 ounces of this product per 4 gallons of water (or equivalent dilution) for at least 60 seconds at a temperature of 75°F.
4. For equipment and utensils too large to sanitize by immersion, apply a use-solution of 1-2 ounces of this product per 4 gallons of water (or equivalent dilution) by spraying, spraying or swabbing until thoroughly wet.
5. Allow sanitized surface to drain and air dry. Do not rinse.

To sanitize pre-cleaned and portable public eating establishments (dining glasses, dishes, eating utensils) in a 200-400 ppm active quaternary solution for at least 60 seconds, which is immersed in 2.5-5 ounces to 10 gallons of water or 5-10 ounces to 20 gallons of water (or equivalent dilution).

DILUTION SYSTEM SPECIFIC DIRECTIONS FOR USE
Packets: Open and pour contents into 5 gallons of water for a 242 ppm dilution. Keep packets in box until ready to use.

PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS
DANGER. KEEP OUT OF REACH OF CHILDREN. CORROSIVE. Causes irreversible eye damage and skin burns. Do not get in eyes, on skin or on clothing. Wear goggles or face shield, rubber gloves, and protective clothing. Harmful if swallowed. Remove contaminated clothing and wash before reuse. Wash thoroughly with soap and water after handling.

STORAGE AND DISPOSAL
DO NOT CONTAMINATE WATER, FOOD OR FEED BY STORAGE AND DISPOSAL.

PESTICIDE STORAGE: Store in a dry place no lower in temperature than 50°F or higher than 120°F. Close containers securely to a container inaccessible to children.

PESTICIDE DISPOSAL: Pesticides are generally hazardous. Improper disposal of pesticides, pesticide mixture, or rinsates is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

CONTAINER DISPOSAL: Nonrefillable container. Do not reuse or refill this container. Offer for recycling, if available. Triple rinse container promptly after emptying.

TRIPLE RINSE AS FOLLOWS: Fill container ¼ full with water and recap. Agitate vigorously. Follow Pesticide Disposal instructions for rinsate disposal. Drain for 10 seconds after the flow begins to drip. Repeat procedure two more times. Offer for recycling or reconditioning, if available. If not available, puncture and dispose in a sanitary landfill.

SPILL OR LEAK PROCEDURES
Small spills may be mopped up, flushed away with water or absorbed on some absorbent material and incinerated. Large spills should be contained, the material then moved into containers and disposed of by approved methods for hazardous wastes.

Sanitization of food processing equipment, utensils, and other food contact articles regulated under 40 CFR 180.940:
1. Scrape, flush, or pre-soak articles (whether mobile or stationary) to remove gross food particles and soil.
2. Thoroughly wash articles with a compatible detergent or cleaner.
3. Rinse articles thoroughly with potable water.
4. Sanitize by immersing articles with a use-solution of 1-2 ounces of this product per 4 gallons of water (or equivalent dilution) for at least 60 seconds. Articles too large for immersion should be thoroughly wetted by rinsing, spraying or swabbing.
5. Remove immersed items from solution to drain and then let air dry. Non-immersed items must be allowed to air dry.

Sanitization of food processing equipment: Equipment and utensils must be thoroughly pre-flushed or pre-scraped and when necessary, pre-soaked to remove gross food particles. Clean and rinse equipment thoroughly, then apply sanitizing solution containing 1-2 ounces of this product per 4 gallons of water (or equivalent use solution). Allow surfaces to remain wet for at least 60 seconds. No rinses is allowed.

Sanitization of Interior Hard, Non-Porous Surfaces of Ice Machines
Ice Machines: Sanitization should occur after initial installation, after the machine is serviced and periodically during its use.
1. Shut-off incoming water line to machine.
2. Unload Tank must be washed with a compatible detergent and rinsed with potable water before sanitizing.
3. Prepare a solution of 2 ounces of sanitizer per 3 gallons of water.
4. Circulate use-solution through machine making sure to wet all surfaces and allow a minimum contact of 60 seconds.
5. Let solution stand 10 minutes.
6. Return machine to normal operation.

This product contains no phosphorus.

This product is for use as a sanitizer on dishes, glassware, utensils and dairy processing equipment at 200-400 ppm active quaternary without potable water rinse.

This product is for use as a sanitizer in public eating establishments, dairies and on food processing equipment at 200-400 ppm active quaternary without potable water rinse.

Regular, effective cleaning and sanitization of equipment, utensils and work or dining surfaces that could harbor hazardous microorganisms minimizes the probability of contaminating food during preparation, storage, or service. Effective cleaning will remove soil to prevent the accumulation of food residues, which may decompose or support the rapid development of food poisoning organisms or toxins. Application of effective sanitization procedures reduces the number of those disease causing organisms that may be present on equipment and utensils after cleaning. Effective sanitization reduces the potential for the transfer of disease, either directly through tableware such as glasses, cups and flatware or indirectly through food.

To prevent cross-contamination, kitchenware and equipment food contact surfaces must be washed, rinsed with potable water and sanitized after each use and following any interruption of operation during which time contamination may have occurred.

DIRECTIONS FOR USE
It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Labeling must be in the possession of the user at the time of using the product. See container label for FIRST AID and PRECAUTIONARY STATEMENTS and complete DIRECTIONS FOR USE before applying. Use of this product is subject to the precautions and limitations imposed by the label affixed to the container for this product.

FOOD CONTACT SURFACE SANITIZATION DIRECTIONS
Sanitization: Recommended for use in restaurants, food processing plants, and bars.

When used as directed this product is an effective sanitizer at an active quaternary concentration of 200-400 ppm when diluted in water up to 850 ppm hardness in public eating establishments, and food processing plants against Escherichia coli, Escherichia coli O157:H7, Staphylococcus aureus, Yersinia enterocolitica, Listeria monocytogenes, Salmonella typhi, Shigella sonnei, Vibrio cholera, Methicillin resistant Staphylococcus aureus (MRSA), Vancymycin resistant Enterococcus faecalis (VRE), and Campylobacter jejuni.

Remove all gross food particles and soil from areas, which are to be sanitized, with a good detergent, pre-flush, pre-soak or pre-scrub treatment. Rinse with a potable water rinse.

Prepare a fresh solution daily or more frequently as soil is apparent.

Sanitization of public eating establishment and dairy food contact surfaces is regulated under 40CFR180.940.

To sanitize pre-cleaned and potable water-rinsed, non-porous public eating establishment and dairy food contact surfaces: prepare a 200-400 ppm active quaternary solution by adding 1-2 ounces of this product to 4 gallons of water, 2.5-5 ounces to 10 gallons of water or 5-10 ounces to 20 gallons of water (or equivalent dilution).

To sanitize pre-cleaned-mobile items in public eating establishments (dining glasses, dishes, eating utensils) immersed in a 200-400 ppm active quaternary solution for at least 60 seconds making sure to immerse completely. Remove items, drain the use-solution from the surface and air dry.

To sanitize pre-cleaned public eating establishment surfaces (counters, tables, finished wood or plastic cutting boards), apply a 200-400ppm active quaternary solution with a cloth, or hand pump trigger sprayer making sure that the surface remains completely wet for at least 60 seconds and let air dry. Do not rinse.

WISCONSIN STATE DIVISION OF HEALTH DIRECTIONS FOR EATING ESTABLISHMENTS
1. Scrape and pre-wash utensils and glasses whenever possible.
2. Wash with a good detergent or compatible cleaner.
3. Rinse with clean water.
4. Sanitize in a solution of 1 ounce to 4-gallons of water. Immerse all utensils for at least two minutes or for contact time specified by governing sanitary code.
5. Place sanitized utensils on a rack or drain board to air dry.
6. Fresh sanitizing solution should be prepared at least daily or when visibly soiled or diluted.

NOTE: A clean potable water rinse following sanitization is not permitted under Section HFS 196.13 of the Wisconsin Administrative Code.

**KEEPOUT OF REACH OF CHILDREN**

**DANGER**

**FIRST AID**

Have the product container or label with you when calling poison control center or doctor, or going for treatment. If In Eyes: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice. If on Skin or Clothing: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call poison control center or doctor for treatment advice. If Swallowed: Call poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor. Do not give anything by mouth to an unconscious person. If Inhaled: Move person to fresh air. If person is not breathing, call 911 or an ambulance then give artificial respiration, preferably by mouth-to-mouth, if possible. Call a poison control center or doctor for further treatment advice.

**NOTE TO PHYSICIAN:** Probable mucosal damage may contraindicate the use of gastric lavage.

**ORDER NO:** SFS18, CP1605
**ACTIVE INGREDIENTS**
Alkyl (60% C14, 30% C16, 5% C12, 5% C18) dimethyl benzyl ammonium chlorides.................................5.0%
Alkyl (68% C12, 32% C14) dimethyl ethylbenzyl ammonium chlorides ..................................................5.0%

---

**STORAGE AND DISPOSAL**

**PESTICIDE STORAGE** - Store in a dry place no lower in temperature than 50°F or higher than 120°F. Store in a tightly closed container in an area inaccessible to children. **PESTICIDE DISPOSAL** - Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture, or rinsate is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance. **CONTAINER DISPOSAL** - Nonrefillable container. Do not reuse or refill this container. Offer for recycling, if available. Triple rinse container promptly after emptying. Triple rinse as follows: Fill container ¼ full with water and recap. Agitate vigorously. Follow Pesticide Disposal instruction for rinsate disposal. Drain for 10 seconds after the flow begins to drip. Repeat procedure two more times. Offer for recycling or reconditioning, if available. If not available, puncture and dispose in a sanitary landfill. **PACKET DISPOSAL** - Do not reuse; discard empty container and put in trash. **SPILL OR LEAK PROCEDURES** - Small spills may be mopped up, flushed away with water or absorbed on some absorbent material and incinerated. Large spills should be contained, the material then moved into containers and disposed of by approved methods for hazardous wastes.

See booklet for additional information and Directions for Use

PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS.
KEEP OUT OF REACH OF CHILDREN. CORROSIVE. Causes irreversible eye damage and skin burns. Do not get in eyes, on skin or on clothing. May be fatal if inhaled. Do not breathe spray mist. Harmful if swallowed or absorbed through skin. Wear goggles or face shield, rubber gloves and protective clothing when handling. Wash thoroughly with soap and water after handling and before eating, drinking, using tobacco or using the toilet. Remove contaminated clothing and wash before reuse.

STORAGE AND DISPOSAL
DO NOT CONTAMINATE WATER, FOOD, OR FEED BY STORAGE OR DISPOSAL.
PESTICIDE STORAGE - Store in a dry place no lower in temperature than 50°F or higher than 120°F. Store in a tightly closed container in an area inaccessible to children. Cleaning and sanitizing:

Equipment and utensils must be thoroughly pre-flushed or pre-scraped and when necessary, pre-soaked to remove gross food particles. Call a poison control center or doctor for treatment advice. If on Skin or Clothing: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call poison control center or doctor for treatment advice. If Swallowed: Call poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor. Do not give anything by mouth to an unconscious person.

NOTE: A clean potable water rinse following sanitization is not permitted under Section HFS 196.13 of the Wisconsin Sanitary Code. Sanitize by immersion in a use-solution of 1-2 ounces of this product per 4 gallons of water (or equivalent use dilution). Allow surfaces to remain wet for at least 60 seconds, making sure to immerse completely. Remove immersed items from solution to drain and then let air dry. Non-immersed items must be allowed to air dry.

NOTE TO PHYSICIAN: Probable mucosal damage may contaminate the use of gastric lavage.

NOTE: A clean potable water rinse following sanitization is not permitted under Section HFS 196.13 of the Wisconsin Sanitary Code.

First Aid:

Have the product container or label with you when calling poison control center or doctor, or going for treatment. If on Eyes: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if worn, after the last traces of liquid are removed from the lenses, then continue rinsing eye. Call a poison control center or doctor for treatment advice. If on Skin or Clothing: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call poison control center or doctor for treatment advice. If Swallowed: Call poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor. Do not give anything by mouth to an unconscious person.

If Inhaled: Have person take 3 to 5 slow breaths of fresh air. If person is not breathing, call 911 or an ambulance then give artificial respiration, preferably by mouth-to-mouth, if possible. Call a poison control center or doctor for further treatment advice.

NOTE: A clean potable water rinse following sanitization is not permitted under Section HFS 196.13 of the Wisconsin Sanitary Code.

中毒急救:

将混有产品容器或标签与您一起拨打中毒控制中心或医生，或去就医。如果在眼睛中：保持眼睛睁开并以缓慢而温和的方式用清水冲洗15-20分钟。取出配戴的隐形眼镜（如果戴有隐形眼镜），然后继续冲洗眼睛。打电话给中毒控制中心或医生，或就医。如果皮肤或衣服上沾染了：脱下受污染的衣物。立即用大量清水冲洗皮肤。立即拨打中毒控制中心或医生，或就医。如果吞咽了：立即拨打中毒控制中心或医生，或就医。

NOTE: 在中毒控制中心或医生，或就医前不要给任何昏迷的患者服用任何东西，除非医生特别指示。如果不能吃，使口或使衣服。戴面罩或面罩，橡胶手套，并为该衣物穿上保护衣物。用食指或中指插入患者的咽喉。立即拨打中毒控制中心或医生，或就医。

Sanitization

Equipment and utensils must be thoroughly pre-flushed or pre-scraped and when necessary, pre-cleaning and sanitizing:

NOTE: A clean potable water rinse following sanitization is not permitted under Section HFS 196.13 of the Wisconsin

Ice Machines:
Sanitization should occur after initial installation, after the machine is serviced and periodically during its use.

60 seconds. No rinse is allowed.

containing 1-2 ounces of this product per 4 gallons of water (or equivalent use dilution). Allow surfaces to remain wet for at least

Sanitization of food processing equipment:
Sanitization of food processing equipment, utensils, and other food contact articles regulated under 40CFR180.940:

NOTE: A clean potable water rinse following sanitization is not permitted under Section HFS 196.13 of the Wisconsin

Administrative Code.

Use in: schools, restaurants, cafeterias, bars, food establishments, and food processing plants.

ORDER NO: SFS16 - CP1610

U. S. PUBLIC HEALTH SERVICE FOOD SERVICE SANITIZATION RECOMMENDATIONS

Cleaning and sanitizing: Equipment and utensils must be thoroughly pre-flushed or pre-scraped and when necessary, pre-soaked to remove gross food particles and soil.

1. Scrape and wash articles and utensils in hot detergent solution.
2. Rinse with clean water.
3. Sanitize and utensils by immersion in a use-solution of 1-2 ounces of this product per 4 gallons of water (or equivalent dilution) for at least 60 seconds at a temperature of 75°F.
4. For equipment and utensils too large to sanitize by immersion, apply a use-solution of 1-2 ounces of this product per 4 gallons of water (or equivalent dilution) by swabbing, spraying or swabbing until thoroughly wet.
5. Allow sanitized surface to drain and air dry. Do not rinse.

To sanitize pre-cleaned mobile food processing equipment and surfaces (tanks, finished wood or plastic cutting boards, counter tops, conveyors) flood the area with a 200 to 400 ppm active quaternary solution for at least 60 seconds, making sure to immerse completely. Remove items, drain the use-solution from the surface and air dry. Do not rinse.

To sanitize pre-cleaned mobile food processing equipment (tanks, finished wood or plastic cutting boards, counter tops, conveyors) flood the area with a 200 to 400 ppm active quaternary solution for at least 60 seconds, making sure to immerse completely. Remove items, drain the use-solution from the surface and air dry.

Sanitization of food processing equipment, utensils, and other food contact articles regulated under 40CFR180.940:

1. Scrape, flush, or pre-soak articles (whether mobile or stationary) to remove gross food particles and soil.
2. Thoroughly wash articles with a compatible detergent or cleaner.
3. Rinse articles thoroughly with potable water.
4. Sanitize by immersing articles with a use-solution of 1-2 ounces of this product per 4 gallons of water (or equivalent dilution) for at least 60 seconds. Articles too large for immersion should be thoroughly wetted by rinsing, spraying or swabbing.
5. Remove immersed items from solution to drain and then let air dry. Non-immersed items must be allowed to air dry.

Sanitization of food processing equipment: Equipment and utensils must be thoroughly pre-flushed or pre-scraped and when necessary pre-soaked to remove gross food particles. Clean and rinse equipment thoroughly, then apply sanitizing solution containing 1-2 ounces of this product per 4 gallons of water (or equivalent use dilution). Allow surfaces to remain wet for at least 60 seconds. No rinse is allowed.

Sanitization of Interior Hard, Non-Porous Surfaces of Ice Machines
Ice Machines: Sanitization should occur after initial installation, after the machine is serviced and periodically during its use.

1. Shut-off incoming water line to machine.
2. Unload tanks must be washed with a compatible detergent and rinsed with potable water before sanitizing.
3. Prepare a solution of 2 ounces of sanitizer per 8 gallons of water.
4. Circulate use-solution through machine making sure to wet all surfaces and allow a minimum contact of 60 seconds.
5. Return machine to normal operation.

This product contains no phosphorus.

This product is for use as a sanitizer on dishes, glassware, utensils and dairy processing equipment at 200-400 ppm active quaternary without potable water rinse.

This product is for use as a sanitizer in public eating establishments, dairies and on food processing equipment at 200-400 ppm active quaternary without potable water rinse.

Regular, effective cleaning and sanitization of equipment, utensils and work or dining surfaces that could harbor hazardous microorganisms minimizes the probability of contaminating food during preparation, storage or service. Effective cleaning will remove soil to prevent the accumulation of food residues, which may decompose or support the rapid development of food poisoning organisms or toxins. Application of effective sanitization procedures reduces the number of those disease causing organisms that may be present on equipment and utensils after cleaning. Effective sanitization reduces the potential for the transfer of disease, either directly through tableware such as glasses, cups and fl owerets or indirectly through food.

To prevent cross-contamination, kitchenware and equipment food contact surfaces must be washed, rinsed with potable water and sanitized after each use and following any interruption of operation during which time contamination may have occurred.

DIRECTIONS FOR USE
It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Labeling must be in the possession of the user at the time of using the product. See container label for FIRST AID and PRECAUTIONARY STATEMENTS and complete DIRECTIONS FOR USE before applying. Use of this product is subject to the precautions and limitations imposed by the label affixed to the container for this product.

FOOD CONTACT SURFACE SANITIZATION DIRECTIONS
Sanitization: Recommended for use in restaurants, food processing plants, and bars.

When used as directed this product is an effective sanitizer at an active quaternary concentration of 200-400 ppm when diluted in water up to 650 ppm hardness in public eating establishments, and food processing plants against Escherichia coli, Escherichia "coli53 H7, Staphylococcus aureus, Yersinia enterocolitica, Listeria monocytogenes, Salmonella typhi, Shigella sonnei, Vibrio cholera, Methicillin resistant Staphylococcus aureus (MRSA), Vancmycin resistant Enterococcus facialis (VRE), and Campylobacter jejui.

Remove all gross food particles and soil from areas, which are to be sanitized, with a good detergent, pre-flush, pre-soak or pre-scrape treatment. Rinse with a potable water rinse.

Prepare a solution daily or more frequently as soil is apparent.

Sanitization of public eating establishment and dairy food contact surfaces is regulated under 40CFR180.940.
To sanitize pre-cleaned and potable water-rinsed, non-porous public eating establishment and dairy food contact surfaces: prepare a 200-400 ppm active quaternary solution by adding 1-2 ounces of this product to 4 gallons of water, 2.5-5 ounces to 10 gallons of water or 5-10 ounces to 20 gallons of water (or equivalent dilution). To sanitize pre-cleaned mobile items in public eating establishments (drinking glasses, dishes, eating utensils) immerse in a 200-400 ppm active quaternary solution for at least 60 seconds making sure to immerse completely. Remove items, drain the use-solution from the surface and air dry. Do not rinse.
To sanitize pre-cleaned public eating establishment surfaces (counters, tables, finished wood or plastic cutting boards), apply a 200-400ppm active quaternary solution with a cloth, or hand pump trigger sprayer making sure that the surface remains completely wet for at least 60 seconds and let air dry. Do not rinse.

DILUTION SYSTEM SPECIFIC DIRECTIONS FOR USE
PACKETS: Open and pour contents into 10 gallons of water for a 242 ppm dilution. Keep packets in box until ready to use.

PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS
DANGER, KEEP OUT OF REACH OF CHILDREN. CORROSIVE. Causes irreversible eye damage and skin burns. Do not get in eyes, on skin or on clothing. Wear goggles or face shield, rubber gloves, and protective clothing. Harmful if swallowed. Remove contaminated clothing and wash before reuse. Wash thoroughly with soap and water after handling.

STORAGE AND DISPOSAL
DO NOT CONTAMINATE WATER, FOOD OR FEED BY STORAGE AND DISPOSAL.

PESTICIDE STORAGE - Store in a dry place no lower in temperature than 50°F or higher than 120°F. Store in a tightly closed container in an area inaccessible to children.

PESTICIDE DISPOSAL - Pesticide wastes are acute hazardous. Improper disposal of excess pesticide, spray mixture, or rinseate is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

CONTAINER DISPOSAL - Nonrefillable container. Do not reuse or refill this container. Offer for recycling, if available. Triple rinse container promptly after emptying.

TRIPLE RINSE AS FOLLOWS: Fill container ¾ full with water and recapture. Agitate vigorously. Follow Pesticide Disposal instruction for rinseate disposal. Drain for 10 seconds after the flow begins to drip. Repeat procedure two more times. Offer for recycling or reconditioning, if available. If not available, puncture and dispose in a sanitary landfill.

PACKET DISPOSAL - Do not reuse; discard empty container and put in trash.

SPILL OR LEAK PROCEDURES
Small spills may be mopped up, flushed away with water or absorbed on some absorbent material and incinerated. Large spills should be contained, the material then moved into containers and disposed of by approved methods for hazardous wastes.
Sanitizer FS

For use in: schools, restaurants, cafeterias, bars, food establishments, and food processing plants.

KEEP OUT OF REACH OF CHILDREN

DANGER

FIRST AID
Have the product container or label with you when calling poison control center or doctor, or going for treatment. If In Eyes: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice. If on Skin or Clothing: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call poison control center or doctor for treatment advice. If Swallowed: Call poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor. Do not give anything by mouth to an unconscious person. If Inhaled: Move person to fresh air. If person is not breathing, call 911 or an ambulance then give artificial respiration, preferably by mouth-to-mouth, if possible. Call a poison control center or doctor for further treatment advice.

NOTE TO PHYSICIAN: Probable mucosal damage may contraindicate the use of gastric lavage.

KEEP OUT OF REACH OF CHILDREN
DANGER
PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS.
KEEP OUT OF REACH OF CHILDREN. CORROSIVE. Causes irreversible eye damage and skin burns. Do not get in eyes, on skin or on clothing. May be fatal if inhaled. Do not breathe spray mist. Harmful if swallowed or absorbed through skin. Wear goggles or face shield, rubber gloves and protective clothing when handling. Wash thoroughly with soap and water after handling and before eating, drinking, using tobacco or using the toilet. Remove contaminated clothing and wash before reuse.

STORAGE AND DISPOSAL
DO NOT CONTAMINATE WATER, FOOD, OR FEED BY STORAGE OR DISPOSAL.
PESTICIDE STORAGE - Store in a dry place no lower in temperature than 50°F or higher than 120°F. Store in a tightly closed container in an area inaccessible to children. PESTICIDE DISPOSAL - Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture, or rinsate is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance. CONTAINER DISPOSAL - Nonrefillable container. Do not reuse or refill this container. Offer for recycling, if available. Triple rinse container promptly after emptying. Triple rinse as follows: Fill container ¼ full with water and recap. Agitate vigorously. Follow Pesticide Disposal instruction for rinsate disposal. Drain for 10 seconds after the flow begins to drip. Repeat procedure two more times. Offer for recycling or reconditioning, if available. If not available, puncture and dispose in a sanitary landfill. PACKET DISPOSAL - Do not reuse; discard empty container and put in trash. SPILL OR LEAK PROCEDURES - Small spills may be mopped up, flushed away with water or absorbed on some absorbent material and incinerated. Large spills should be contained, the material then moved into containers and disposed of by approved methods for hazardous wastes.
