BECAUSE PERFORMANCE COUNTS®

BELL PERFORMANCE

BELLCIDE®

BIOCIDE FOR THE TREATMENT AND PREVENTION OF MICROBIAL GROWTH KILLS BACTERIA, FUNGI AND OTHER MICROBES IN FUEL AND ELIMINATES SLIME

E.P.A. ESTABLISHMENT NO. 081937-SC-001
E.P.A. REGISTRATION NO. 84377-1

ACTIVE INGREDIENTS
2-(Thiocyanomethylthio)benzothiazole .................................................. 2.5%
Methylene bis(thiocyanate) ........................................................................ 2.5%
OTHER INGREDIENTS ........................................................................... 95.0%
TOTAL ................................................................................................. 100.0%

One gallon of product contains 0.215 lbs of each active ingredient.

KEEP OUT OF REACH OF CHILDREN

DANGER

BELL PERFORMANCE, INC 1340 BENNETT DR LONGWOOD, FL 32750

250 GALLONS — 946.35 LITERS
PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER: Corrosive. Causes irreversible eye damage or skin burns. May be fatal if swallowed, inhaled, or injected. Do not breathe vapor or mist. Do not get in eyes, on skin, or on clothing. Prolonged or frequent exposure of skin contact may cause allergic reactions in some individuals. Wear goggles or face shield. Wear coveralls over long-sleeved shirt and long pants; socks and chemical-resistant footwear; chemical-resistant gloves, such as barrier barrier; and head covering. If necessary, wear rubber, neoprene rubber, polyvinyl chloride or other resistant and respirator with an organic vapor filter cartridge with a recommended approved for personal use. NIOSH/OSHA/MSHA/NIKNI/NIKNI approved cartridge or a canister approved for pesticides (NIOSHINOS support number of SNX-14). A NIOSH approved respirator with an organic vapor (OV) cartridge or canister with any R, P, or N PPE. In addition to the PPE listed above, miners, loaders, and cleaners of equipment must also wear chemical-resistant gloves. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using the toilet. Remove and wash contaminated clothing before reuse.

USER SAFETY REQUIREMENTS: Follow manufacturer’s instructions for cleaning/maintaining PPE. If no such instructions for washables exist, use detergent and hot water. Keep and wash PPE separately from other laundry. Discard clothing and other absorbent materials that have been drenched or heavily contaminated with this product’s concentrate. Do not reuse them.

USER SAFETY RECOMMENDATION: User should wash hands before eating, drinking, chewing gum, using tobacco or using the toilet. User should remove clothing PPE immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing. Users should remove PPE immediately if PPE handling is done. As soon as possible, wash thoroughly and change into clean clothing.

ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish, aquatic invertebrates, oysters and shrimp. Do not discharge effluent containing this product into streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

PHYSICAL AND CHEMICAL HAZARDS: Do not expose to extreme temperatures.

DIRECTIONS FOR USE IN FUEL

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

NOTE TO USER: Do not apply this product in a way that will contact workers or other persons.

FUEL: BELLICIDE® can be used to eliminate and/or prevent the growth of bacteria and fungi in distillate and residual fuels, including Gasoline. Diesel and jet fuels. BELLICIDE® is intended for use in engines where residues and distillate fuels are used such as; bulk storage tanks, locomotive fuel tanks, diesel trucks, diesel boats and other equipment, construction equipment, and other generators.

BELLICIDE® should be added to the fuel at a rate of 2.5 to 2.5 fluid ounces per 100 gallons. BELLICIDE® should be led by injecting the product into the fuel line as the fuel is being added or added by batches while the fuel is being added to ensure adequate mixing.

For contaminated systems, BELLICIDE® should be added at a shock dose of 2.5 fluid ounces per 100 gallons (see table below). For clean systems, the maintenance dose is 1.25 to 2.5 fluid ounces per 100 gallons (see table below).

BELLICIDE® is not for use in aviation fuels. BELLICIDE® is not for use in on-road vehicles.

CONTAINER HANDLING:

Refill this container with pesticide only. Do not reuse this container for any other purpose. Cleaning the container before final disposal is the responsibility of the person disposing of the container. Cleaning before refilling is the responsibility of the refiller.

To clean the container prior to refilling or disposal, use a pressure washer as follows: Empty the remaining contents into application equipment or a mix tank. Use a pressure washer system that rinses all interior sides by piping a-dispenser containing 2.0 to 2.5 BELLICIDE® water into the clean wash tanks. The volume applied must provide 2.4 to 3.2 lbs. BELLICIDE® per 1000 gal. of water. Surface area of the tank should be cleaned by brushing, rinsing, and wiping with a cloth soaked in 2% BELLICIDE® until all soil is removed. The wash water should contain no more than 10 lbs. of BELLICIDE® water and should be disposed of for 4 to 6 hours after treatment. The shock treatment should be repeated every four months.

COOLING WATER: BELLICIDE® is used to control algae, bacteria, and fungi in industrial recirculating cooling water systems. Before treatment is begun, the system should be cleaned thoroughly to remove old algal growth, microbial slime, and other deposits. The system should then be drained, flushed, refilled with water, and treated with an initial dosage of 2.4 to 1.48 fluid oz. BELLICIDE® per 1000 gal. water in the system. Subsequent additions of 0.8 to 4.8 fluid oz. per 1000 gal. should be made every 1 to 5 days, depending upon your local Pesticide and severity of microbial fouling.

THICKER TOWERS & COLD WATER SYSTEMS GREATER THAN OR EQUAL TO 4000 GALLONS: Do not apply by open pouring or GLOWSIDE® COLD water systems. Water pump delivery system is required for this use and application method.

DRILLING FLUIDS: To inhibit bacterial and fungal degradation of the fluids or muds used in the drilling of wells, add BELLICIDE® in the drilling fluid at concentrations of 0.3 to 1.0% based on the total wet weight of the fluid.

PETROLEUM SECONDARY RECOVERY: BELLICIDE® is used to control sulfur-reducing bacteria, algae-forming bacteria and fungi in oil-field water, polymers, or miscellar fluids; water-disposal systems, and other oil-field systems at dosage rates of 15.6 to 50.0 fluid oz. BELLICIDE® per 1000 gal. of water treated. Additions should be made continuously or intermittently by means of a metering pump at the free water knockouts, before or after injection pumps and injection well heads.

CONTINUOUS FEED METHOD: When a system is continuously fouled, add 15 to 50.0 fluid oz. BELLICIDE® per 1000 gal. of water continually, or as needed to maintain control.

INTERMITTENT OR SLUG METHOD: When a system is noticeably fouled, or to maintain control, add 15 to 50.0 fluid oz. BELLICIDE® per 1000 gal. of water for 4 to 6 hours per week or 4 to 6 times per week, as needed to maintain control.

CRUDE AND REFINED OILS: BELLICIDE® is an all-purpose preservative for the control of bacteria and fungi that cause the degradation of crude oil and refined fuel oils during storage or transport (e.g., via tank, rail, ship, or pipeline). Crude and refined oils include, but are not limited to; limed, aromatic, paraffinic, and napthenic oils. It should be added to the oil as it is being transferred from the shipping container to the storage tank or directly to the transport conduits/container at the rate of 2.4 to 2.2 fluid oz. BELLICIDE® per 1000 gal. of oil. Additions should be made batchwise where mixing occurs or continuously to the suction side of the transfer pump.

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by or storage or disposal.

PESTICIDE STORAGE: Do not expose to extreme temperatures. Do not stack more than five drums high. Drums should be opened in well-ventilated areas. Leaking or damaged drums should be placed in overpack drums for disposal. Spills should be absorbed in sand/soil or sand and disposed of in a sanitary landfill. Keep container closed when not in use.

PESTICIDE DISPOSAL: Improper disposal of excess pesticide, spray mixture, or rinseate is a violation of Federal Law. Pesticide wastes are actually hazardous waste. Wastes resulting from the use of products that contain pesticides, spray mixture, or rinseate must be collected and disposed at an approved disposal facility. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide Program, local solid waste collection, or the Hazards Waste representative at your EPA Regional Office for guidance.

FIRST AID

IF IN EYES: Hold eyes open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for further treatment advice.

IF ON SKIN, CLOTHES: Take off contaminated clothing. Wash skin immediately with plenty of water for 1-2 minutes. Call a poison control center or doctor for further treatment advice.

IF SWALLOWED: Immediately call a poison control center or doctor. Do not induce vomiting unless told to do so by the poison control center or doctor. Do not give anything by mouth to an unconscious person.

IF INHALED: Move person to fresh air. For persons not breathing, give 2 to 1 or 10 breaths. If necessary, give artificial respiration, preferably mouth-to-mouth, if possible. Call a poison control center or doctor for further treatment advice.

HOT LINE NUMBER

Have the product container and label with you when calling a Poison Control Center or doctor or going for treatment. You may also call 1-800-353-5050 or 1-832-929-3500 for environmental aid treatment information.

NOTE TO PHYSICIAN

Probable mucosal damage may contaminantize the use of gastric lavage. This product may cause an allergic reaction. Contains petroleum distillates.

Product Weight 8.6 lbs. per gal. or 1.93 kg per L Net contents are marked on the container.
