This product has not been registered by the U.S. EPA.

Manufactured for: Woodstream Corporation
69 North Locust Street, Lititz, PA 17543 • 1-800-800-1819

For most applications, straighten the stake (included) and insert it into the top of unit. Attach one of the enclosed stakes to the underside of the station, carrying them to the area you are protecting to allow the scent to work effectively. Please adjust units installed on plants that grow significantly during the season to maximize the effectiveness of scent-based repellents.

Units should be installed near the top level of the plant or vegetation to ensure maximum effectiveness. Insert station and stakes into the ground to desired height. For shorter applications, like pots or low-lying plants, you can cut the stake to a shorter length with a simple pair of wire cutters. You may also use string, wire, or even Christmas ornament hooks (not included) to secure the top of each unit.

Units may be placed closer together to increase effectiveness as necessary. For plants growing through the fence, you may want to cut the stakes in half using a wire cutter. Wear safety glasses and be careful of sharp edges when cutting stakes.

By following the instructions below, this product will remain effective throughout the entire growing season – Spring, Summer and Fall. However, the effectiveness of scent-based repellents can be diminished in temperatures below 40 degrees F.

This product works throughout the entire growing season – Spring, Summer and Fall. However, the effectiveness of scent-based repellents can be diminished in temperatures below 40 degrees F.

This product contains a non-toxic blood product that some dogs, cats and raccoons may find attractive. Please avoid placing the units in the direct spray of a lawn sprinkler head as the spray may damage or disrupt the unit.

Units may be placed closer together to increase effectiveness as necessary. For potted flowers/plants, simply place one unit in each pot.

Critter Ridder® Deer Repellent Stations are perfect for use in vegetable gardens. No offensive odors to humans • Safe for vegetable gardens

RUGGED HOUSING

4.6321" H x 2.4571" W x 6.5" L

All-Natural Deer & Rabbit Repellent stations should be placed to cover an 8' x 1' area for rabbits. For Deer, place station on top of unit. Or wire through loop

For shorter applications, like pots or low-lying plants, you can cut the stake to a shorter length with a simple pair of wire cutters.

The stakes are designed to fit snugly so that wind and animals cannot easily disrupt them. Insert the other end of the stake in the ground and press down to achieve desired height.

The patented waterproof station protects the repellent and keeps on working even during rain.

Air flows through the station, carrying repellent scent across your garden.

This product contains a non-toxic blood product that some dogs, cats and raccoons may find attractive.

PETS AND RACCOONS:

Please avoid placing the units in the direct spray of a lawn sprinkler head as the spray may damage or disrupt the unit.

Units may be placed closer together to increase effectiveness as necessary. For potted flowers/plants, simply place one unit in each pot.

SPACING/COVERAGE:

Units should be placed 4 to 8 feet apart in any direction within your garden or vegetable gardens.

PLEASE NOTE: THE FILTER SIDE OF THE UNIT MUST BE DIRECTLY FACING THE GROUND ONCE INSTALLED!
