Removes blood, feces, sweat, vomit and urine stains

Kills Human Immunodeficiency Virus Type 1 (HIV-1), Hepatitis B Virus, Hepatitis C Virus

Kills odor-causing bacteria on hard surfaces

Kills 99.9% of bacteria on fabric and upholstery

KEEP OUT OF REACH OF CHILDREN

32 FL OZ (1 QT) 946 mL

ACTIVE INGREDIENT:
Hydrogen Peroxide ................ 2.20%
OTHER INGREDIENTS: .......... 97.80%
TOTAL: ................................ 100.00%
It is a violation of Federal law to use this product in a manner inconsistent with its labeling. 

**DIRECTIONS FOR USE:**

1. **Refill and Pour** contents directly into empty bottle. 
2. **Surface** is thoroughly wet. 
3. **Contact** time listed on organism table.

**USE:**

- **Spray** area until it is covered with the solution. Allow surface to remain wet for contact time listed on label. For Canine Distemper, let stand for 10 minutes. 
- **Wipe** off with a clean cloth, mop or sponge and thoroughly rinse all surfaces in the area with potable water.

**ENVIRONMENTAL NOTE:**

- This pesticide is toxic to birds, fish and aquatic invertebrates. Caution should be used in applications where domestic animals are present. 
- It is a violation of Federal law to use this product on or in a manner inconsistent with its labeling. 
- Do not use or store this container except as described in the directions for use. 

**STORAGE AND DISPOSAL:**

- Store this product in a cool, dry area, away from direct sunlight and heat, to avoid deterioration. 
- Do not reuse or refill this container except as described in the directions for use. 
- Treat spilled materials as hazardous waste. 
- Offer for recycling or place in trash. 

**Disposal of Infectious Materials:**

- Use disposable impervious gloves, gowns, masks and eye coverings. Blood and other body fluids must be autoclaved and disposed of according to local regulations for infectious waste disposal.

**TO PRECLEAN INSTRUMENTS PRIOR TO TERMINAL STERILIZATION/HIGH-LEVEL DISINFECTION:**

- **Rinse** instruments under running water to remove visible, gross debris. Scrub instruments using a stiff bristle brush until visibly clean. 
- **Disinfect** instruments with over-the-counter disinfectant for 3 minutes, followed by an appropriate terminal sterilization/high-level disinfection process. 
- **Cleaning and Disinfecting the Exterior of Toilets and Urinals:**
  - Remove gross soil before disinfecting. 
  - Apply product to exposed surfaces. Allow product to remain in contact for 1 minute, followed by an appropriate terminal sterilization/high-level disinfection process.

Remove gross filth before disinfection. Apply product to brush until visibly clean. Rinse instruments thoroughly. Follow with an appropriate disinfection process. Cleaning of critical and semicritical devices must be followed by an appropriate terminal sterilization/high-level disinfection process.

ENVIRONMENTAL HAZARD: equipment, cages, utensils, instruments, kennels, stables, catteries, etc. Remove all animals and feed from premises, animal transportation vehicles, and in which the surfaces/objects likely to be soiled with blood or body fluids can be associated with the potential for transmission of Human Immunodeficiency Virus (HIV-1) (associated with AIDS), Human Hepatitis B (Virus) (HBV) and Human Hepatitis C (Virus) (HCV).

**CLOROX**

Disinfecting Bio Stain & Odor Remover

KEEP OUT OF REACH OF CHILDREN

1 GAL (128 FL OZ) 3.78 L

**ACTIVE INGREDIENT:**

Hydrogen Peroxide ................ 2.20%

**OTHER INGREDIENTS:** .......... 97.80%

**TOTAL:** ........................... 100.00%

EPA Reg. No. 67619-33

Clorox Commercial Solutions

Clorox Disinfecting Bio Stain & Odor Remover
DIRECTIONS FOR USE:

**HARD, NONPOROUS SURFACES:** Spray 6”–8” from surface until surface is thoroughly wet. Allow this product to penetrate and remain wet for contact time listed on organism table. Then wipe. For heavily soiled areas, a precleaning is required. Rinse with potable water for food-contact surfaces. For all others, no rinsing is required.

This product is not to be used as a terminal sterilant/high-level disinfectant on any surface or instrument that (1) is introduced directly into the human body, either into or in contact with the bloodstream or normally sterile areas of the body, or (2) contacts mucous membranes, but which does not otherwise penetrate the blood barrier or otherwise enter normally sterile areas of the body. This product may be used to preclean or decontaminate critical or semicritical medical device prior to sterilization or high-level disinfection.

**TO DISINFECT FOOD PROCESSING PREMISES (floors, walls and storage areas):** Hold container 6”–8” from the surface to be treated and spray area until it is covered with solution. Allow surface to remain wet for contact time listed on the label. For Canine Distemper, let stand for 10 minutes. Wipe off with a clean cloth, mop or sponge and thoroughly rinse all surfaces in the area with potable water. Newly soiled areas must be precleaned before using this product. Final products and packaging material must be removed or carefully protected prior to using this product.

**To Deodorize:** Spray until area is saturated. DO NOT SATURATE. Allow air to dry. For heavily soiled areas, a precleaning is required.

**To Sanitize Soft Surfaces:** Spray 6”–8” from surface. Spray until it is wet. DO NOT SATURATE. Let stand for 5 minutes. Allow to air dry. 

*This product is not to be used as a terminal sterilant/high-level disinfectant on any surface or instrument that (1) is introduced directly into the human body, either into or in contact with the bloodstream or normally sterile areas of the body, or (2) contacts mucous membranes, but which does not otherwise penetrate the blood barrier or otherwise enter normally sterile areas of the body. This product may be used to preclean or decontaminate critical or semicritical medical device prior to sterilization or high-level disinfection.*

ENVIRONMENTAL HAZARD:

This product is toxic to birds, fish and aquatic invertebrates. Caution should be used when applying indoors, because pets may be at risk.

**SPECIAL INSTRUCTIONS FOR USING THIS PRODUCT TO CLEAN AND DECONTAMINATE AGAINST HIV-1, HBV AND HCV ON SURFACES/OBJECTS SOILED WITH BLOOD/BODY FLUIDS:**

**Personal Protection:** When handling items coated with blood or body fluids, use disposable impermeable gloves, gowns, masks and eye coverings. **Cleaning Procedure:** Block and other body fluids must be thoroughly cleaned from surfaces and other objects before applying this product.

Contact Time: Allow surface to remain wet for 1 minute for HBV and HCV and 30 seconds for HIV-1. The contact time for after treatments and viricides may differ. See product label for specific times. **Disposal of Infectious Materials:** Use disposable impermeable gloves, gowns, masks and eye coverings. Blood and other body fluids must be autoclaved and disposed of according to local regulations for infectious waste disposal.

**TO PRECLEAN INSTRUMENTS PRIOR TO TERMINAL STERILIZATION/HIGH-LEVEL DISINFECTION:**

Blood and other body fluids must be autoclaved and disposed of according to local regulations for infectious waste disposal. If there is any expectation that soiled surfaces or objects have blood or body fluids, such methods may be used to preclean or decontaminate critical or semicritical medical devices prior to sterilization or high-level disinfection.

**One-Step Disinfection and Cleaning the Extent of Toilets and Urinals:**

Remove gross film before disinfection. Apply product to cover all visible surfaces. Allow surface to remain wet for contact time listed on organism table. For Canine Distemper, let stand for 10 minutes. Wipe off with a clean cloth, mop or sponge and thoroughly rinse all surfaces in the area with potable water.

**Environmental Hazards:** This pesticide is toxic to birds, fish and aquatic invertebrates. Caution should be used when applying to areas, because pets may be at risk.

**STORAGE AND DISPOSAL:** Store this product in a cool dry area, away from direct sunlight and heat to avoid deterioration. Nonrefillable container. Do not return or refill empty container. Handle empty container as if it contained a liquid. 

**Organisms to be Inactivated:**

- **Bacteriophage:**
  - Bacillus subtilis (ATCC 6633)
  - Enterococcus faecalis (ATCC 29212)
  - Staphylococcus aureus (ATCC 6538)
  - Staphylococcus epidermidis (ATCC 12228)
  - Staphylococcus hominis (ATCC 14457)
  - Staphylococcus saprophyticus (ATCC 12228)
  - Staphylococcus warneri (ATCC 12228)
- **Viruses:**
  - Adenovirus type 7
  - Retropseudorabies virus (ATCC CRL-11079)
  - Reovirus type 3
- **Prions:**
  - Staphylococcus aureus
- **Other Organisms:**
  - Salmonella typhi
  - Salmonella enterica serovar Typhimurium
  - Staphylococcus aureus
  - Staphylococcus epidermidis
  - Staphylococcus saprophyticus
  - Staphylococcus hominis
  - Staphylococcus warneri

**Contact Times:**

- **Solutions®**
  - 1 minute contact time
  - 10 minute contact time
  - 30 minute contact time
  - 15 minute contact time
