FIFRA SECTION 24(c) SPECIAL LOCAL NEED LABEL
FOR DISTRIBUTION AND USE ONLY WITHIN THE STATE OF OREGON

VITAFLO® 280
FLOWABLE FUNGICIDE
EPA Reg. No. 400-564    EPA SLN No. OR-190003

FOR USE ON GRASS SEED - FOR EXPORT ONLY

This label is valid until December 31, 2024 or until otherwise amended, withdrawn, canceled, or suspended.

ACTIVE INGREDIENTS: % BY WT.
Carboxin (5,6-dihydro-2-methyl-M-phenyl-1,4-oxathiin-3-carboxamide) ........................................... 15.59%*
Thiram (Tetramethylthiuram disulfide) ............................................................................................. 13.25%*
OTHER INGREDIENTS**: .................................................................................................................. 71.16%
TOTAL:............................................................................................................................................... 100.0%

*Contains 1.45 pounds of carboxin and 1.23 pounds of thiram per gallon.
*Contains 174 grams of carboxin and 147 grams of thiram per liter.
** Contains petroleum distillates.

KEEP OUT OF REACH OF CHILDREN
CAUTION / PRECAUCIÓN

ENVIRONMENTAL HAZARDS
This pesticide is toxic to fish, aquatic invertebrates, oysters and shrimp. Do not apply directly to water, to areas where surface water is present, or to intertidal areas below mean high-water mark. Drift and runoff from treated areas may be hazardous to aquatic organisms in neighboring areas. Do not contaminate water when disposing of equipment washwater or rinsate.

Treated seeds are hazardous to fish, birds and mammals. Do not plant treated seeds by broadcasting to the soil surface. Ensure that all seeds are thoroughly covered with soil, especially in turn areas. If seeds are not thoroughly incorporated by the planter during planting, additional incorporation may be required to thoroughly cover exposed seeds.

DIRECTIONS FOR USE
It is a violation of federal law to use this product in a manner inconsistent with its labeling. Read all label directions carefully before use.

Follow all applicable directions, restrictions, and precautions on this Special Local Need (SLN) label and the EPA-registered label for VITAFLO® 280, EPA Reg. No. 400-564.

This SLN label and the federal label for this product must be in the possession of the user at the time of pesticide application.
Do not apply this product in a way that will contact workers or other persons. Only protected handlers may be in the area during application. For any requirements specific to your State or Tribe, consult the agency responsible for pesticide regulation.

GENERAL INFORMATION

VITAFLO 280, a flowable fungicide, combines a systemic fungicide (carboxin) and a contact fungicide (thiram) to provide plant protection against seed and soil-borne seedling diseases. Thorough seed coverage is required.

Use only as a grass seed treatment for grass seed being exported to countries requiring treatment of carboxin before importation. Users should verify actual registered rate in country of destination and/or use. This label is based solely on treatment requirements made by countries requiring carboxin to be applied to imported grass seed. Arysta LifeScience North America, LLC (“Arysta”) makes no claims as to the effect of this product on disease control or seed germination. All such risks should be assumed by the Buyer.

APPLICATION DIRECTIONS – COMMERCIAL SEED TREATMENT

VITAFLO 280 is a seed treatment that is applied as a slurry treatment by machine. Application should be made using mechanical, slurry or mist-type seed treatment equipment. Use 3.3 - 12 fl oz VITAFLO 280 per 100 pounds of seed.

In most cases, VITAFLO 280 is ready to use and may be applied to seed as is; however, dilution with water may be appropriate for some types of treaters and/or when treating under dry and/or hot conditions, to achieve more uniform product to seed coverage. VITAFLO 280 water should be mixed thoroughly into a slurry prior to treating seed. Recalibrate treating equipment to compensate for the addition of water. The amount of dilution water that is most suitable depends on the seed, treater type and temperature. Contact your local Arysta representative or supplier for specific recommendations.

Seed should be sound and well cured prior to treatment. Care must be exercised in the handling of treated seed.

USE RESTRICTIONS

- Do not use treated seed for food or feed purposes.
- Treated seed cannot be planted in the United States and must be exported.

COMPATIBILITY

VITAFLO 280 can be used in combination with other flowable seed protectant fungicides and insecticides. Consult a seed treatment specialist regarding combining of products with VITAFLO 280 for specific seed crop allocations and slurry compatibility. Tank mixes should be pre-tested to determine physical compatibility between formulations, and to assure there will be no adverse phytotoxic reactions.

SEED LABELING (Commercial Seed)

Seeds that are treated with this product must contain the following labeling on the outside of the package or bag: For Export Only – Not to be sold or offered for sale in the United States. This seed has been treated with Carboxin and Thiram. Do not use treated seed for food, feed, or oil purposes.

NOTE: Treated seeds exposed on soil surface may be hazardous to birds. Cover or collect spilled seeds.
