CRABGRASS PREVENTER PLUS FERTILIZER

Stops Crabgrass Before it Starts
Prevents Up To 200 Weeds
Money Back Guarantee

DIRECTIONS FOR USE

1. Determine size of area to be treated – measure length and width in feet, then multiply to determine coverage area in square feet (length x width). Next, subtract non-lawn areas.

2. Use the spreader setting chart to determine the appropriate setting.

3. Apply evenly over dry grass, avoiding streaks, skips and overlaps – thorough coverage is important. On hot days (above 80°F), water the area prior to application or in sequential applications to control weeds germinating throughout the season.

Nonrefillable container: Do not reuse or refill this container. Offer for recycling, if available.

STORAGE AND DISPOSAL

IF EMPTY:

1. Gather all materials used to apply this product in a plastic bag.

2. Store in original container in a locked storage area out of reach of children and domestic animals.

3. Place in a location inaccessible to livestock.

4. Do not contaminate surface waters.

5. Do not place in or on storm drains.

6. Do not dispose of in sinks.

7. Do not dispose of in toilets.

8. Do not dispose of in or on surface waters.

Apply only to actively growing turf. Do not apply near water, storm drains or drainage ditches. Do not apply if heavy rain is expected. Apply this product only to your lawn and feed livestock forage cut from treated areas.

CRABGRASS GERMINATION DATES

Approximate Date

1. January 1 to May 10: After May 10

2. June 1 to November 1: After April 20

NOTE: To prevent crabgrass and other weed germination, apply this product no later than five weeks prior to the time when your grass turns green.

AVERAGE PENETRATION TIMES (IN DAYS)

Species | AVERAGE PENETRATION TIMES |
-------|---------------------------|
Kentucky Bluegrass | 10 Days |
Buffalograss | 20 Days |
Creeping Bentgrass | 40 Days |
St. Augustinegrass | 45 Days |
Seashore Paspalum | 50 Days |
