**KnockOut™ WEED & GRASS KILLER**

**Fast Acting Concentrate**

**Fast-Acting**
For Visible Results In 12 Hours

**KILLS THE ROOT**

**RAINPROOF IN 30 MINUTES**

**Active Ingredient:**
*Glyphosate, isopropylamine salt* .................. 18.00%
Diquat dibromide ......................................... 0.73%
Other ingredients: ........................................ 81.27%
Total ................................................ 100.00%
*Contains 1.19 lbs glyphosate acid per US gallon.

**Net Contents:** 32 fl oz (1 qt / 946 mL)

**Keep Out of Reach of Children**
CAUTION
See back panel booklet for additional precautionary statements

HOW IT WORKS
This product is absorbed by the weed’s leaves. It moves through the weed to the root, stopping the function of an essential enzyme found in plants (but not humans or animals). Weeds die, roots and all—so weeds don’t grow back. Kills only what you spray. Any product not absorbed by the plant will be deactivated after it hits the soil.

HOW TO SPRAY
• Spray the weeds or grasses you want to kill until thoroughly wet.
• When spot treating weeds around desirable plants, shield plants from drift with a sheet of cardboard or plastic.
• If desirable plants are accidentally sprayed, rinse off immediately with water (or cut off treated area).

IMPORTANT: Do not spray plants or grasses you like—they will die. Not recommended for spot weed control in lawns since this product kills lawn grasses.

APPLICATION RESTRICTIONS:
• Do not apply this product in a way that will contact any person or pet, either directly or through drift. Only the person applying this product may be in the area during application.
• Do not mix, store or apply with (in) a galvanized or unlined steel (except stainless steel) sprayer, or apply through any irrigation system.
• DO NOT USE for spot weed treatment after planting any fruits or vegetables.
• People and pets must not enter treated areas until spray has dried.

WHEN TO APPLY
• Apply when weeds are actively growing.
• For best results, apply during warm, sunny weather above 60° F.
• Apply when air is calm to prevent drift to desirable plants.
• RAINPROOF Protection: Rain or watering 30 minutes after application will NOT wash away effectiveness.

WHEN TO REPLANT
• All ornamental flowers, trees and shrubs may be planted 1 day after application.
• Lawn grasses, herbs, vegetables, and fruits may be planted 3 days after application.

ADDITIONAL USES
To Kill Vines
• If vines are growing up poles, fences, or tree trunks with mature bark, cut vines to a height of 3 to 4 feet and spray vines thoroughly.
• If vines are climbing shrubs or tree trunks with green bark, cut vines at base and treat as directed for stumps or spray regrowth. If spraying regrowth, shield shrubs and tree trunks from spray drift with a sheet of cardboard or plastic.

AMOUNT TO USE
For best results
• Add 3-6 fl. oz. per gallon of water (use the higher rate for larger weeds).
• Apply on warm days in bright sunlight
• For easy to kill weeds such as small seedlings, add 3 fl. oz. per gallon of water

MIXING INSTRUCTIONS
Tank Sprayer: Use a plastic, fiberglass, plastic-lined steel or stainless steel sprayer. Do not mix, store or apply in a galvanized or unlined steel sprayer (container).
• For tough established weeds and for best results, add 6 fl oz to 1 gallon of water.
• Spot treat or spray evenly over 300 sq ft.

USER SAFETY RECOMMENDATIONS
Users should:
1. Wash hands before eating, drinking, chewing gum, using tobacco, or using the toilet.
2. Remove clothing immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing.
For Lawn Replacement: For lawn replacement use this product to kill lawn and weeds before planting new lawn. 
- Spray anytime plants are actively growing. 
- Use 6 fl oz per gallon of water for each 300 sq. ft. Apply evenly over treatment area. 
- If soil is dry, water before application and 2 to 3 days after application. 
- If green patches remain after 7 days, reapply. 
- Wait at least 3 days after last application to rake, till or replant with seed or sod.

For Flowerbed & Garden Preparation
- Use this product to kill weeds, grasses and brush before planting flowers, fruits, vegetables, trees or shrubs. 
- If soil is dry, water before application and 2 to 3 days after application. 
- Use 6 fl oz per gallon of water for each 300 sq. ft. Apply evenly over treatment area. 
- Wait 1 to 3 days after last application before planting garden. (See When to Reapply section for details)
