**Non-Agricultural Use Requirements**

Use this product only in accordance with the label and with the Wisconsin Pest Management Review Guide (PMR) for petrochemical agents (40 CFR part 171). This Wisconsin Pest Management Review applies when the product is used to protect agricultural plants or jewelries, ornamentals, or nursery stock. Do not allow adults, children, or pets to enter the treated areas until dust has settled.

**Storage and Disposal**

Do not contaminate water, food or feed by storage or disposal. Nonrefillable container. Do not reuse or refill this container. Offer for recycling, if available. Keep and store container in a safe place. For end use, follow local, state, and federal regulations. If burned, stay out of smoke. Improper disposal is a violation of Federal law. Pesticide, mixtures, or equipment used to handle these pesticides must be disposed of in accordance with the instructions on the label. The instructions in this box apply to use of this product that are covered by the Worker Protection Standard. For any requirements specific to your State or Tribe, consult the agency responsible for pesticide regulation.

**Fungicide - Specific Diseases, Rates, and Application Timing**

**General Information**

This product is a systemic fungicide used for turfgrass for the control and suppression of disease.

**Applications**

Do not apply this product through any type of irrigation system.

Use this product in a preventative disease control program. Properly calibrate the spreader to ensure thorough coverage. Apply after mowing. For control of turf diseases, apply to wet foliage. For control of soil-borne diseases, this product can be mixed in a fertilizer application. Under conditions of high temperatures and high humidity, disease pressure can be high before the start of the season due to weather conditions. If disease pressure is low to begin the season, disease pressure may increase during the season. Under conditions of high temperatures and high humidity, disease pressure can be high before the start of the season due to weather conditions. Proper diagnosis of the organism causing the disease is important. Use of diagnostic kits or other means of identification of the disease organism is essential to determine the best control measures.

**Important:**

Bermudagrass can be sensitive to this product. Do not exceed 0.3 lbs./1,000 sq. ft. every 30 days on any site of any severity in bermudagrass. In Florida, do not apply this product to bermudagrass golf courses when lampkinson exceed 400.

Note:

- Do not graze animals on treated turf. Do not feed clipping from treated areas to livestock or poultry.
- Turfgrass - Specific Diseases, Rates, and Application Timing

**Disease**

- Dollar spot
  - Brown spot
  - Red thread
  - Pythium leaf blight
  - Phytophthora leaf blight
  - Hairy root
  - Pythium root blight

**Application Timing/Interval**

- **Dollar spot**
  - Brown spot
  - Red thread
  - Pythium leaf blight
  - Phytophthora leaf blight
  - Hairy root
  - Pythium root blight

- **Applications**
  - 0.25 lbs./1,000 sq. ft.
  - 0.5 lbs./1,000 sq. ft.
  - 1.0 lbs./1,000 sq. ft.
  - 1.5 lbs./1,000 sq. ft.

- **Application Frequency**
  - 2, 4, 6, 8

- **USE ONLY IN AGRICULTURAL USE**
  - 12, 18

- **Non-Agricultural Use Requirements**
  - 4, 8

**Important:**

READ BEFORE USE:

Read this entire Directions for Use and the Warranty Declaration and Limitation of Liability before using the product. If the consumer is not acceptable, return the unused product container at once. By using the product, the user or Buyer accepts the following Warranty Declaration and Limitation of Liability:
