KILLS RATS, HOUSE MICE, AND MEADOW VOLES**

For Indoor and Outdoor Rat, House Mouse, and Meadow Vole* Control

Norway rats and house mice may consume a lethal dose in a single feeding with first dead rats and mice appearing four or five days after feeding begins. This product may only be used inside and within 100 feet of agricultural buildings and manmade agricultural structures.

ACTIVE INGREDIENT:
Bromadiolone: .................................................. 0.005%

OTHER INGREDIENTS**: .................................... 99.945%

TOTAL: .............................................................. 100.00%

**Contains denatonium benzoate

**This product has been treated with 5-methoprene to protect the bait from infestation by insects.

DIRECTIONS FOR USE

- Determine areas where rats, mice, or meadow voles* will most likely find bait stations.
- Place 2 to 10 packs (at intervals of 15 to 30 feet) per placement in areas open to hoofed livestock, raccoons, bears or other potentially destructive mammals and birds.
- Where surface water is present, or in intertidal areas below the mean high water mark. Runoff also may be hazardous to aquatic organisms in water adjacent to treated areas. Do not contaminate water when disposing of equipment washwater or rinsate.
- Protect bait from rain and snow. Remove as much alternative food as possible.
- Protect bait from infestation by insects.
- Replace contaminated or spoiled bait immediately. Wearing gloves, collect and dispose of all dead exposed animals and leftover bait.
- Do not expose children, pets or other nontarget animals to the bait by maintaining PPE. If no such instructions for washables, use detergent and hot water. Keep and replenish bait as needed.
- Open to hoofed livestock, raccoons, bears, or other potentially destructive mammals and birds might be poisoned if they feed upon animals that have eaten this bait. This pesticide is toxic to fish. Do not contaminate water when disposing of equipment washwater or rinsate.

STORAGE AND DISPOSAL

- Do not contaminate water, food or feed by storage and disposal.
- Do not contaminate water, food, foodstuffs, food or feed handling equipment, or milk or meat handling equipment or surfaces that come into direct contact with food. Do not broadcast bait. When used in USDA inspected facilities, this product must be applied in tamper-resistant bait stations.
- Do not sell this product in individual containers holding less than 8 pounds of bait.

APPLICATION DIRECTIONS

- RATs: Place 2 to 10 packs (at intervals of 15 to 30 feet) per placement in infested areas. Maintain an uninterrupted supply of fresh bait for 10 days or until signs of rat activity cease to appear.
- MICE AND MEADOW VOLES*: Place one pack at 8 to 12 feet intervals in infested areas. Maintain an uninterrupted supply of fresh bait for 15 days or until signs of mouse or meadow vole* activity cease to appear.

FOLLOW-UP:
- Replace contaminated or spoiled bait immediately. Wearing gloves, collect and dispose of all dead exposed animals and leftover bait.
- To prevent reinfestation, limit sources of rodent food, water and harborage as much as possible. If reinfestation occurs, repeat treatment. Where a continuous source of infestation is present, establish permanent bait stations and replenish bait as needed.

CONDITIONS OF SALE

- To the extent consistent with applicable law, Seller warrants this product in its unopened packages conforms to the chemical description on the label and is reasonably fit for the purposes set forth on the label when used according to directions under normal use conditions as specified on the label. There are no other warranties, expressed or implied, concerning the use of this product other than as indicated on the label. To the extent consistent with applicable law, this warranty does not extend to the handling or use of this product contrary to label instructions or under abnormal conditions or conditions not reasonably foreseeable to Seller, and Buyer assumes all risk of any such use.

Precautionary Statements

Hazards to Humans and Domestic Animals

Caution: Harmful if swallowed. Keep away from children, domestic animals, and pets. All handlers (including applicators) must wear long pants and shoes plus socks. Any person who retrieves carcasses or unused bait following application of this product must wear gloves.

User Safety Requirements

Follow manufacturer’s instructions for cleaning/maintaining PPE. If no such instructions for washables, use detergent and hot water. Keep and wash PPE separately from other laundry. Users should remove clothing/ PPE immediately if pesticide gets inside. Remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash hands thoroughly after applying bait and before eating, drinking, chewing gum, using tobacco, or using the toilet and change into clean clothing.

Environmental Hazards:

This product is extremely toxic to mammals and birds. Dogs, cats and other predatory and scavenging mammals and birds might be poisoned if they feed upon animals that have eaten this bait. This pesticide is toxic to fish. Do not contaminate water when disposing of equipment washwater or rinsate.

DIRECTIONS FOR USE

1. Store unused product out of reach of children and pets.
2. Apply bait in locations out of reach of children, pets, domestic animals and nontarget wildlife, or in tamper-resistant bait stations. These stations must be resistant to destruction by dogs and by children under six years of age, and must be used in a manner that prevents such children from reaching into bait compartments and obtaining bait. If bait can be shaken from stations when they are lifted, units must be secured or otherwise immobilized. Stronger bait stations are needed in areas open to hoofed livestock, raccoons, bears or other potentially destructive mammals, or in areas prone to vandalism.
3. Dispose of product container, unused, spoiled and unconsumed bait as specified on this label.

Note: Bait stations are mandatory for outdoor above-ground use. Tamper-resistant bait stations must be used wherever children, pets, nontarget mammals, or birds may have access to the bait placement location.

Use Restrictions:

This product may only be used to control the following species in California: Cotton rat, Eastern harvest mouse, Golden mouse, Polynesian rat, Meadow vole, White-throated vole, Southern plains vole, and Mexican vole.

Other Ingredients:

Bromadiolone (99.945%)**

**Contains denatonium benzoate

NOTE TO PHYSICIAN

If swallowed, this material may reduce the clothing ability of the blood and cause bleeding. If ingested, administer Vitamin K, intramuscularly or orally. Repeat as necessary based on monitoring of prothrombin times.

TREATMENT FOR PET POISONING

If animal eats bait, call veterinarian or 1-800-498-5743 at once.

NOTE TO VETERINARIAN

Anticoagulant Bromadiolone: For animals ingesting bait and/or showing poisoning signs (bleeding or elevated prothrombin times), give Vitamin K. If needed, check prothrombin times every 3 days until values return to normal (up to 30 days). In severe cases, blood transfusions may be needed.

First Aid

Have label with you when obtaining treatment advice.

If Swallowed:

- Call a poison control center or doctor immediately for treatment advice.
- Have person sip a glass of water if able to swallow.
- Do not induce vomiting unless told to do so by the poison control center or doctor.
