Bug Barrier product to keep ants, roaches, spiders, and many other insects away.

STORAGE & DISPOSAL:
Store in a cool, dry place away from heat or open flame.

INDOORS: FLEAS:
Spray directly at insects, keeping about 3 feet from interior walls, fabrics, and furniture. This product will not remove fleas already on a pet as they will continue to feed on the pet and may become resistant to this product. If fleas persist after 1 week of treatment, consult a veterinarian for further advice.

TO KILL CRAWLING INSECTS:
Spray around pipes, window frames, and baseboards where ants crawl, hitting as many as possible. When spraying by stoves or water heaters, stay at least 3 feet from plants and bushes. Allow a couple of minutes for product to start killing insects. If possible, spray outside of house around hot and cold air vents, and crawl spaces. It is not for use on edible plants or flowers and may harm tender foliage, young plants and new growth.

CRICKETS, SOWBUGS, PILLBUGS:
Spray directly onto the bugs or on surfaces where they are commonly found, staying at least 3 feet from plants and bushes. Allow a couple of minutes for product to start killing insects. For best results, use daily until no signs of infestation can be seen.

ANTS:
Spray around refrigerators, stoves and storage areas. When spraying by stoves or water heaters, stay at least 3 feet from plants and bushes. Allow a couple of minutes for product to start killing insects. Be careful when spraying around pets as they may have the residual product on their fur.

SPIDERS, SOWBUGS, PILLBUGS:
Spray around pipes, window frames, and baseboards where ants crawl, hitting as many as possible. When spraying by stoves or water heaters, stay at least 3 feet from plants and bushes. Allow a couple of minutes for product to start killing insects. For best results, use daily until no signs of infestation can be seen.
